CU

Compute Unit (CU) is the smallest unit for computing resources provided by SCS. 1 CU represents 1-core CPU and 4 GB Memory. You are charged for your actual usage of CU.

Integrator

Integrator (Stream Connector data integration task): Imports Topic data into cloud products. A topic can enable multiple Integrators to import data into different cloud products.

Partition

Stream Connector partition: The smallest unit of the data stored in a Topic. You can create multiple partitions for topics with high throughput.

Project

Project: Similar to a database, it is the basic unit of Stream Connector data, which consists of several topics.

Topic

Topic: The smallest unit of Stream Connector to subscribe and publish. Similar to a table in database, it represents a category or a type of streaming data.
