Billing Method

CIS is a pay-per-use service. The cost is calculated according to the actually configured resources and the usage time without having to make advance payment.

Instance

Instances are available free of charge during the internal trial.

Network

BGP multi-line access is provided by Tencent Cloud for all ISPs to ensure the link quality. You can choose a network based on your business needs.

The network of CIS supports billing by traffic. For more information on billing, see [Purchase Public Network](#).

Preparations Before Purchase

You need to sign up for a Tencent Cloud account and complete identity verification before purchasing a container instance. For more information, see [Sign up for Tencent Cloud](#).

Available Region

Container instances are available in "Guangzhou" region. More regions are coming soon.

Instance Quota

Resource	Limit	Notes
Maximum number of instances supported in a region	30	Including those that are being created and running

If the number of instances you need to purchase exceeds the quota limit in the corresponding region, you can submit an application for increasing the quota. Tencent Cloud will assess your actual needs and increase your quota as appropriate.

How to apply for quota increase:

You need to [submit a ticket](#). Select **Apply for increasing CIS quota**, enter the target region, the target quota, the application reason and problem description based on the actual situation, and your valid phone number, and then click **Submit**.

Note:

- To apply for a quota in one availability zone or apply for the same quota in multiple availability zones, you can just select the availability zone(s) and enter the target quota.
- You need to apply for different quotas in multiple availability zones separately.

Supported Configuration

During the internal trial:

- The maximum configuration supported for a CIS instance is 6 cores and 14 GB.
- The number of containers in a CIS instance is limited to 5.

The following configuration is supported for a container in a CIS instance:

CPU/core	Memory/GB
0.25	0.25, 0.5, 0.75, 1
0.5	0.5, 1, 1.5, 2
1	1, 2, 3, 4
2	2, 3, 4, 5, 6, 7, 8
4	4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14
