Billing Overview

Last updated : 2020-09-14 09:58:51

This document describes NAT billing modes.

Billing Description

NAT Gateway fees consist of the gateway usage (billed by hour) and the Internet access traffic.

- See **Billing Modes** below for gateway fees.
- For information on traffic fees, see bill-by-traffic in [Public Network Billing](#).

Billing Modes

NAT Gateway is priced as follows:

Configuration	Chinese mainland	Singapore, Silicon Valley, Virginia, Frankfurt, Hong Kong (China), Korea, Russia, and Japan	Mumbai	Toronto and Bangkok
Small	0.089	0.13	0.18	0.14
Medium	0.28	0.39	0.54	0.42
Large	0.89	1.3	1.8	1.4

Note :

- NAT Gateway only supports [Bandwidth Package](#). NAT Gateway EIPs needs to be added to the bandwidth package for billing. [Check your account type](#) and select the bandwidth package beforehand.
- We recommend you to limit the outbound bandwidth of NAT Gateway to avoid high costs.
- NAT Gateway's arrears policy follows that of pay-as-you-go CVM instances. For more information, see [Arrears](#).
- NAT Gateway features dual-server hot backup. The system sends a 5 KB detection packet to the primary and secondary NAT Gateway servers every 3 seconds, thereby generating 0.2747 GB of traffic each day. The prices of the traffic in the Chinese mainland, Hong Kong

(China), and North America are 0.032964 USD, 0.032964 USD and 0.0211519 USD respectively.

Purchase Method

Last updated : 2019-11-27 15:48:26

You can purchase NAT gateways on the [Tencent Cloud official website](#).

The following describes how to purchase NAT gateways on the official website.

1. Log in to the Tencent Cloud official website and go to the [NAT Gateway product page](#).
2. Click **Get Started** to go to the VPC console.
3. Click **NAT Gateway** in the left pane, and click **Create** on the NAT gateway page.
4. Fill in or confirm the following parameters in the pop-up window that appears: Gateway Name, Gateway Type, Network, and Elastic IPs. Then, click **Create**.

Create a NAT Gateway ✕

Gateway Name
60 more characters allowed

Region

Gateway Type

Outbound Bandwidth Cap ?
NAT gateway network fee is calculated according to the outbound bandwidth

Elastic IP

[+ Bind IP](#) Only bill-by-traffic ENI is supported now. Up to 10 IPs can be bound ?

Gateway Fee **0.09 CNY/hr**

Network Fee **0.12 CNY/GB**

After creation, you need to configure routing rules and point the subnet traffic to NAT gateway
To get notified about abnormal NAT gateway behaviors instantly, please [configure alarms](#).

For more information about NAT gateway-related operations, see [Getting Started](#).

Processing for Overdue Payment

Last updated : 2021-04-07 09:34:08

When your NAT Gateway expires, we will provide you with a grace period as follows:

- Within **2** hours from the moment your account balance becomes 0, you can continue to use your NAT Gateway, and will be billed for this usage.
- If your account remains negative for more than 2 hours, the NAT Gateway service will automatically shut down, and the billing will stop.
- Within 24 hours from the moment of automatic shutdown, the NAT Gateway remains unavailable. If you [top up](#) your account to a positive balance within this period, the NAT Gateway service resumes and the billing continues.
- If your account balance remains negative for more than 24 hours after automatic shutdown, the NAT Gateway will be repossessed immediately.
- When your NAT Gateway is repossessed, we will notify the Tencent Cloud account owner and all collaborators via email and SMS.
