## Operation Guide

### Signing up for an account

After signing up for an account and completing identity verification, you can log in to the Tencent Cloud Console. If you do not have an account yet, please sign up as instructed in [Signing up for a Tencent Cloud Account](#).

### Activating the service

In the [Face Recognition Console](#), follow the prompts to agree to the Terms of Service and activate the service.

### Calling APIs

Face Recognition provides a full set of APIs. For more information, please see the [API documentation](#) of Face Recognition.

- We recommend using Tencent Cloud SDKs to call Face Recognition APIs. The SDKs are available in multiple programming languages, such as Python, Java, PHP, Go, Node.js, and .NET. You can download the corresponding SDK in the documentation of each service or get it from the [SDK Center](#).
- You can also use [API 3.0 Explorer](#), for online calls, signature verification, SDK code generation, quick API retrieval, etc.
- You can also call Tencent Cloud APIs through [TCCLI](#) to manage your resources, implement automation, and manage scripts. This helps simplify services with complex APIs.

---

## Viewing Calls

Log in to the [Face Recognition Console](#) to view the usage of each service provided by Face Recognition.
