Announcement on a Newly Added Independent IP Value-Added Service

Last updated : 2024-02-05 18:09:19

Simple Email Service(SES) of Tencent Cloud has added an independent IP value-added service, which will be officially launched on March 1, 2024.

Under normal circumstances, SES will use multiple shared IPs that have been registered and analyzed by default to send emails. If your business has just started, this sending method is very suitable. However, if you expect higher email sending volume and email arrival rate and the sending domain name is not affected by others, we recommend that you use an independent IP.

1. For the detailed price information of an independent IP, please refer to [Pricing](#).
2. For the detailed information about purchase, please [submit a ticket](#) to contact us.
