TDMQ for RabbitMQ Beta Test Start

Release Notes and Announcements

New Features

Last updated : 2022-07-04 15:32:57

April 2022

Update	Description	Release Date	Documentation
Upgraded the monitoring feature	TDMQ for RabbitMQ's monitoring panel has been fully upgraded. The new panel supports monitoring metrics of clusters, vhosts, exchanges, and queues, with dozens of new monitoring metrics added for status diagnosis and problem locating, such as P95/P99/P999 production durations.	2022-04-28	Monitoring and Alarms

January 2022

Update	Description	Release Date	Documentation
Supported RabbitMQ migration to the cloud	TDMQ for RabbitMQ supports migrating RabbitMQ clusters to the cloud for a better service experience.	2022-01-14	Migrating RabbitMQ to Cloud

December 2021

Update	Description	Release Date	Documentation
Launched the message query feature	You can check the production records of a batch of messages in the specified time period or a specific message with the specified message ID. After finding the production records, you can	2021-12-28	Message Query

	further view the body content and parameters of the messages.		
Provided demos for multiple programming languages	-	2021-12-28	SDK for Java

October 2021

Update	Description	Release Date	Documentation
Supported the alternate exchange capability of open-source RabbitMQ	If the primary exchange cannot route a message, the message will be routed to the alternate exchange for message delivery. This feature can be used for message delivery monitoring.	2021-10-27	-
Supported declarations on the client	You can declare exchanges, queues, and bindings through code on the client, which greatly reduces the manual workload during migration.	2021-10-27	RabbitMQ Client API Description
Supported connection with RabbitMQ client in the open-source Spring framework	Thanks to the support for declarations on the client, you can seamlessly migrate to TDMQ for RabbitMQ if you originally use the message queue through Spring's built-in client.	2021-10-27	-
Supported exclusive consumption	You can declare the `exclusive` field in the consumption code, indicating that the queue can be consumed by only one consumer, and an error will be reported when a second consumer tries to connect to it.	2021-10-27	-

September 2021

Update	Description	Release Date	Documentation
Launched TDMQ	TDMQ for RabbitMQ is Tencent's proprietary	2021-09-25	Overview

for RabbitMQ	message queue service. It supports the AMQP 0-9-1 protocol and is fully compatible with all components and principles of Apache RabbitMQ. It also has the underlying benefits of computing-storage separation and flexible scaling.
