Domain Transfer-Out Rules

Last updated：2024-04-24 10:34:09

In accordance with the regulations set forth by the ICNAA and CNNIC, if you want to transfer a domain name registered with Tencent Cloud to another registrar for hosting, the domain name must meet the following requirements before it can be transferred:

Note：

The domain must meet all of the following requirements before it can be transferred.

To ensure domain name security, quick transfer-out is not supported.

Requirement	Description
There must be at least 15 days of validity left on the domain name.(This requirement only applies to `.cn`, `.中国`, `*.cn`, `.wang`, and `.top`.)	If the validity left on the domain name is less than 15 days, renew it before transferring it out.
There is no overdue payment on the domain name.	Please pay off all fees before transferring the domain name out.
The domain name must have been registered for at least 60 days.	Please wait until the domain name meets this requirement before transferring it out.
There is no dispute about the domain name entity information.	-
The domain name is not in the judicial, arbitration, or dispute settlement process.	-
The domain name has been transferred to Tencent Cloud for at least 60 days.	Please wait until the domain name meets this requirement before transferring it out.
The domain name is not in the renewal grace period.	If the domain name is in the renewal grace period, renew it before transferring it out.
The domain name is not in the redemption period.	If the domain name is in the redemption period, redeem it before transferring it out.
The domain name is not in the **deletion or pending-deletion period**.	-
The domain name is not in the	-

serverTransferProhibited status.	
The domain name is not in the 60-day inter-registrar transfer lock period after its information is changed.	Please wait until the domain name meets this requirement before transferring it out.
It has been at least 45 days since the domain name was renewed/redeemed.	Please wait until the domain name meets this requirement before transferring it out. Otherwise, the domain name validity will not be normally extended by one year.
The transfer prohibition lock is not enabled for the domain name.	If the transfer prohibition lock is enabled, disable it before transferring the domain name out.
The update prohibition lock is not enabled for the domain name.	If the update prohibition lock is enabled, disable it before transferring the domain name out.
The domain name is not banned due to violations of regulations.	The domain is in a **Serverhold or Clienthold** status.
The domain name is not being transferred.	If the domain name is being transferred, wait for the transfer to finish first.

Domain Naming Rules

Last updated：2024-01-29 17:33:59

When applying for a domain name, you can first learn about the naming rules of domain prefixes. Different suffixes have different naming rules. In order to successfully register a domain name and pass the domain naming review, you must follow corresponding domain naming rules. You can apply to register an exclusive domain name for your business.

Naming Rules of Chinese Domain Prefixes

When you register a Chinese domain name, please follow the domain naming rules below:
A Chinese domain name must contain at least one Chinese character, and the rest can be English letters (a-z, case-insensitive), digits (0-9), and `-` .
In most domain registries, the Simplified Chinese version and Traditional Chinese version of a domain name are equivalent. Therefore, you only need to register one of them. For example, if you have registered a domain name in Simplified Chinese, you won't be able to register its Traditional Chinese version, and vice versa.
The domain name cannot start or end with invalid characters such as `-` , `+` , `@` , `&` , and space.
The domain name cannot contain only English letters or digits.
Hyphen `-` cannot appear consecutively, be registered independently, or be placed at the beginning or end.
The length of the domain name after converted to Punycode cannot exceed 63 characters.
Some domain suffixes such as `.com.cn` , `.net.cn` , and `.org.cn` do not support Chinese prefixes.

Naming Rule of English Domain Prefixes

When you register an English domain name, follow the domain naming rules below:
Use English letters (a-z, case-insensitive), digits (0-9), and hyphen `-` only.
Do not use spaces and special characters such as `!` , `$` , `&` , and `?` .
Hyphen `-` cannot appear consecutively, be registered independently, or be placed at the beginning or end.
The length of the domain cannot exceed 63 characters.
