Console Guide

Activating Services

Last updated : 2022-09-07 15:05:50

This document describes how to create an application and activate the services.

Creating an Application

1. Log in to the [GME console](#) and click **Service Management** in the left sidebar to go to the “Service management” page.
2. On this page, click **Create application**.

Application Name	Application ID (AppID)	Creation Time	Application Status	Service Status	Operation
[Redacted]	[Redacted]	2022-06-30 17:22:07	Normal	[Lock] [Mail]	Set Usage Statistics
[Redacted]	[Redacted]	2022-06-30 17:01:37	Normal	[Lock] [Mail]	Set Usage Statistics

3. Complete the application information.

Application Info

Application Name

Project

Tag [+ Add](#)

You can classify and manage resources by setting tags, with up to 50 tags for each resource. [Tag Management](#)

- Application name: Enter the application name, which will be displayed in the application list.
 - Project: A default project is selected. You can also select a project that you created. For details, see [Project Management - Create project](#).
 - Tag: Click **+Add** to add tags. For more information, see [Tag Management](#).
4. Enable or disable desired services based on your needs.
 - Enable or disable **Voice Chat**.
Voice Chat is billed by voice duration. You can enable it as needed.

Real-time Voice ServiceService Enabled/Disabled Enable Disable

- Enable or disable **Voice Message Service**.

Voice Message Service is billed by DAUs. You can enable it as needed.

Speech-to-Text ServiceService Enabled/Disabled Enable DisableSupported Languages Standard mode Enhanced mode

The standard mode supports only Mandarin Chinese, Korean, and English, while the enhanced mode supports all languages. These two modes have different prices. For details, see [Billing Rules](#).

5. Tick “I have read and agree to GME [Service Level Agreement](#) and [SDK Privacy Agreement](#)”.

6. Click **OK**.

Setting an Application

After an application is created, it is displayed in the application list on the “Service management” page. Click **Set** to go to the application details page.

Modifying application information

1. Click **Modify** to modify the relevant information.

2. After completing the modification, click **Save**.

Application Info		Modify
Application Name		
Application Status	Normal	
Acceleration for Chinese mainland		
Project	DEFAULT PROJECT	
Tag		
Creation Time	2022-06-30 17:22:07	
Last Modified	2022-07-26 11:34:00	

Modifying service status

1. Click **Modify** to enable/disable the desired service.
2. After completing the modification, click **Save**.

Speech-to-Text Service	
Service Enabled/Disabled	<input type="radio"/> Enable <input checked="" type="radio"/> Disable
Save	Cancel

Key Parameters

In **Authentication info**, you can obtain the AppID and permission key required for the SDK voice services.

Authentication Info [Reset Key](#)

AppID

Permission key

Note :

- The permission key here will be used as a parameter when accessing the SDK.
- After you reset the key, it will take effect within 15 minutes to 1 hour. It is not recommended to change it frequently.
- The option of **Reset key** is only available for the account that creates the game, root account, and global collaborators.
- For more information about authentication, see [Authentication Key](#).

Tag Management

When you [create an application](#), you can click **+Add** to add an existing tag to the application. If no tags are created, you can create tags by following the steps below:

1. When creating an application, you can click **Tag management** in the **Application info** section to go to the tag list page.

Application Info

Application Name

Project

Tag [+ Add](#)

You can classify and manage resources by setting tags, with up to 50 tags for each resource. [Tag Management](#)

2. Click **Create tag**, and complete the tag information.

Create Tag

• Enter a new tag key and value, or select a tag key and add a new value to it.
• Each tag key can have a maximum of 1,000 values. You can add 10 values at a time.

Tag Key : **Tag Value**

Enter a tag value Delete

[Add Tag Key](#)

OK Cancel

3. Click **OK**.

Disabling Services

An existing application cannot be deleted. If you no longer want to use it, disable all services under it. After that, all requests for the application will be failed. To disable a service, please log in to the [GME console](#), and click **Set** for the desired application to go to the application details page.

Application Name	Application ID (AppID)	Creation Time	Application Status	Service Status	Operation
		2022-06-30 17:22:07	Normal		Set Usage Statistics
		2022-06-30 17:01:37	Normal		Set Usage Statistics

Click **Modify** > **Disable** > **Save** for the desired service.

Speech-to-Text Service

Service Enabled/Disabled Enable Disable

Save Cancel

Usage Querying

Last updated : 2022-09-07 15:04:00

Overview

This document describes how to query the application usage in the GME console. The statistics include usage of Voice Chat and Voice Message Service.

Preparations

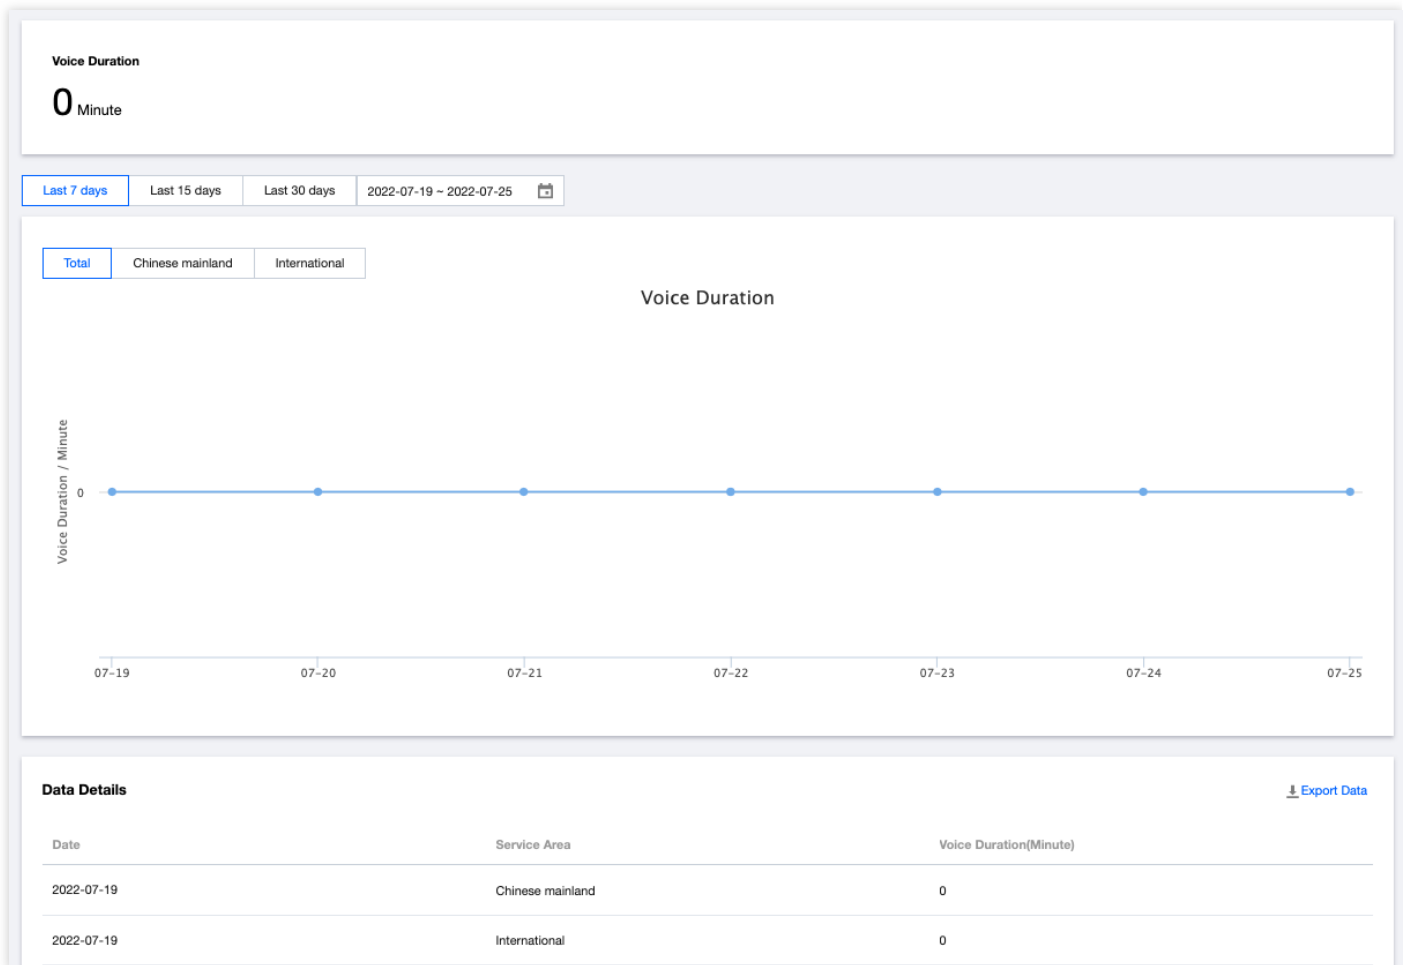

Log in to the [GME Console](#) and click **Usage statistics** for the application you want to query.

Application Name	Application ID (AppID)	Creation Time	Application Status	Service Status	Operation
		2022-06-30 17:22:07	Normal	 	Set Usage Statistics
		2022-06-30 17:01:37	Normal	 	Set Usage Statistics

Usage Statistics

Voice Chat

- The usage statistics are displayed based on the billing mode. For example, if the billing mode is usage duration, the statistics of voice duration are displayed.
- The **Voice duration** displays the minutes of voice duration for the application yesterday.
- The line chart displays the voice duration for the past 7 days by default. You can select other time ranges and regions to query the usage data.

Voice Message Service

- The statistics of voice message DAUs are displayed at the top.
- The **Voice Message DAU** displays total number of voice message DAUs of the application yesterday.
- The line chart displays the number of DAUs for the past 7 days by default. You can select other time ranges to query the data.

Voice Message DAUs

0 Users

Number of Conversions

0 Times

Last 7 days | Last 15 days | Last 30 days | 2022-07-19 ~ 2022-07-25

Voice Message DAUs | Number of Conversions

Voice Message DAUs
