Upgrading Existing LogListener Instances

Last updated : 2021-08-31 16:17:55

Dear Tencent Cloud user,

To improve the user experience and avoid the influence from issues in legacy versions, we recommend upgrading the LogListener instances to [v2.5.0 or above](#).

Log in to the [CLS console](#) to try out more CLS features.

New features supported on different LogListener versions are detailed as flows:

LogListener Version	Supported Feature	Feature Description	Documentation
v2.5.4	LogListener service logs	LogListener service logs are used to record the operation, collection, and monitoring activities of LogListener, and you can configure visualized graphs to display such log data.	LogListener Service Logs
v2.5.2	Uploading parsing-failure logs	Added the support for uploading parsing-failure logs, using <code>LogParseFailure</code> as the key name (<code>Key</code>) and the raw log content as the key value (<code>Value</code>).	-
v2.5.0	Support LogListener auto-upgrade function	Users can set a time period for Agent auto upgrade or select specific machines to upgrade manually.	LogListener Upgrade Guide
v2.4.5	Extracting multi-line logs with regex	Added the extraction mode of Multi-line - Full regular expression to LogListener collection configuration rules for log collection.	Full Regular Expression (Multi-Line)
v2.4.5	Millisecond-precision logging	LogListener supports millisecond-precision timestamps for log collection. After time-based log collection is enabled, LogListener uploads logs with millisecond-precision UNIX timestamps.	-

LogListener Version	Supported Feature	Feature Description	Documentation
v2.3.9	Configuring blocklist of the collection path	Added support for configuring blocklist of the collection path, allowing users to specify directories and files to be ignored during collection.	-
v2.3.5	Context search	Added the feature for locating the current log, allowing users to quickly locate a target log and scroll to view the log context. Added the feature to highlight a number of strings, quickly marking the keywords that users use to search. Added the filter condition feature, allowing users to quickly locate the log where a target character string resides.	Context Search and Analysis

Thank you for your support. We will continue to update features to provide you with better services. If you have any questions, please [submit a ticket](#).

Regards,

Tencent Cloud Team
