# Getting Started

Last updated : 2019-09-20 16:56:10

You can quickly learn about the tag service via the Tencent Cloud console, and query resources and create tags in the console.

## Register and Login

- [Sign up](#) for a Tencent Cloud account if you don't have one, and then complete identity verification according to [Identity Verification Guide](#).
- If you have a Tencent Cloud account and have already completed the identity verification, [log in to Tencent Cloud](#), and then click **Product** -> **Management Tools** -> **Tag** to go to the Tag page.

## Querying Resources

In the tag console, select **Resource Tag** to enter the Resource Tag page. Enter the region, type and tag of the resources you want to query, and then click **Query Resources**. The relevant found resources are displayed in a list.

### Editing resource tags

After the resources are found, you can edit their tag values as needed. Select the resource you want to edit and click **Edit Tag Value** to edit it.

### Editing and deleting tag values

In the Edit Existing Tag Value page, you can directly modify or delete existing tag values, or add new tag values.

You can edit the tag values of the resources found based on the same region, type and tag key-value pair at the same time.

## Creating a Tag

In the tag console, select **Tag List** to go to the Tag List page, and then create a tag.

In the Add Tag page, enter the tag key and value you want to create.

## Deleting a Tag

You can also delete an existing tag key and value. In the Tag List page, select **Delete** under the tag to delete, and then the tag key and value is deleted.
