Querying Resources by Tag

Last updated : 2019-11-12 11:14:55

Scenario

This document describes how to query resources sorted by tag key/tag value and export a list.

Directions

1. Log in to the [Tag Console](#).
2. Click **Resource Tags** in the left sidebar to go to the resource tags page.
3. On the resource tags page, select the following information to set the filtering criteria.
 - Resource type: this is the type of the resource to be queried. Only products that support tags are allowed. For details, see [Products that Support Tags](#).
 - Region: this is the region of the resource to be queried.
 - Tag key/value: this is the tag key/value of the resource to be queried. The tag value can be null. Selecting more than one is allowed.
4. Click **Query resource**, and the corresponding resources will be listed at the bottom of the page.
5. You can click  on the right side to download the corresponding table.

Managing Tags

Last updated : 2019-11-12 11:18:01

Scenario

This document describes how to edit and delete the tags of specific resources and manage resources by tag.

Directions

Editing a tag for specific resources

1. Refer to [Query Resources by Tag](#), and filter for the resources that need to have their tag settings changed.
2. In the filtering results list below resource tags, add a check to the left of the resources that need to have a tag added.
3. Click **Edit tag value** to go to the “Edit existing tag” window.
4. Click **Add** in the “Edit existing tag” window and enter the tag key and tag value information (tag value can be null).
5. Click **OK** to complete the operation of adding a tag for specific resources.

Deleting a tag for specific resources

1. Refer to [Query Resources by Tag](#), and filter for the resources that need to have their tag settings changed.
2. In the filtering results list below resource tags, add a check to the left of the resources that need to have a tag deleted.
3. Click **Edit tag value** to go to the “edit existing tag” window.
4. Click **Delete** in the “Edit existing tag” window for the tag that needs to be deleted.
5. Click **OK** to complete the operation of deleting a tag for specific resources.
