## Selection

CSC is a one-stop cloud security management platform. It offers Premium, Enterprise, and Ultimate editions to meet the needs of different users. We recommend you choose the best edition for your needs considering the following four aspects: number of cloud assets, organization accounts, log audit, and security guarantee in critical periods.

Feature Category	Premium	Enterprise	Ultimate
Number of cloud assets, such as public IPs, domain names, CVMs, CLB, databases, COS, Elasticsearch Service, and other assets.	100	300	900 or more
Organization accounts: Whether the Tencent Cloud Organization solution is available.	No	No	Yes
Log audit: Whether to access security product logs for analysis and management.	No	Yes	Yes
Security guarantee in critical periods: Whether network attack and defense drills are required.	No	Yes	Yes

## Asset health checks

CSC supports health check of assets, covering ports, weak passwords, emergency vulnerabilities, deep vulnerabilities, risky service exposure, website content risks, and cloud resource configurations.

One scan of an asset (a public IP, domain name, CVM, CLB, database, COS, Elasticsearch Service, etc.) is counted as one asset check. The Premium, Enterprise, and Ultimate editions provide 400, 1,200, and 4,800 asset health checks, respectively. More paid checks are available.

We recommend you perform four auto checks and one comprehensive manual check every month to minimize your asset risks. Please determine the number of asset health checks to purchase based on your number of cloud resources.

# Purchase Methods

Last updated : 2023-09-21 17:42:30

1. Go to the [Cloud Security Center purchase page](#) and select an edition according to your needs. You can also customize billable items, and the system automatically calculates the fees of these items.
2. Click **Purchase now** and pay the fees.

# Renewal Policies

Last updated : 2023-09-21 17:42:53

CSC resources will be terminated 14 days after edition expiry (for details, see [CSC - Payment Overdue](#)). To ensure the stable running of CSC, please check your CSC edition for expiry and renew it before expiry. We recommend you enable auto-renewal for it. You can manually renew your resources on the [Cloud Security Center purchase page](#) or in the [Billing Center](#).

# Overdue Payment Policies

Last updated : 2023-09-21 17:43:27

## Note

For customers of Tencent Cloud partners, please refer to the overdue payment policies in your contract with the Tencent Cloud partner.

On the day of expiry, your CSC edition will be changed to the free edition.

The features and specifications will be adjusted accordingly. Paid features such as in-depth vulnerability scan, weak password scan, and check of cloud resource configurations will be unavailable.

All your CSC resources will be repossessed 14 days after edition expiry. Your configurations will be permanently deleted, and you have to re-purchase and configure CSC when you need to use the service again.

# Refund Policies

Last updated : 2023-09-21 17:43:56

You can refund a CSC edition within five days of purchase if it hasn't been used.

**Use of a CSC edition refers to the use of the features in the edition, including but not limited to asset health check. In all the following cases, the edition is used, and you cannot apply for a refund as stated above:**

You have performed asset health checks after the purchase of the CSC edition.

You have used breach and attack simulation (BAS) and other features after the purchase of the CSC edition.

You have downloaded health check reports after the purchase of the CSC edition.

## Refund channel

Cash vouchers and other vouchers (promo vouchers or discounts) are non-refundable. Non-voucher payments will be proportionally refunded to the payer's Tencent Cloud account using the original payment method (cash or free credit).

## Refund method

For orders that meet the 5-day unconditional return policy, [submit a ticket](#) for refund.
