Updates and Announcements

Release Notes

Last updated : 2023-08-04 17:36:28

March 2023

| Update | Description | Release Date | Documentation |
|-------------------------------------|--|--------------|---|
| Launches Anti-DDoS Pro (Enterprise) | Anti-DDoS Pro (Enterprise) provides Tbps-level protection for applications deployed in and outside the Chinese mainland. It takes effect only after binding with an Anti DDoS EIP. It is applicable to enterprises with high demand on application security. | 3/6/2023 | Billing Overview (Enterprise) |

November 2022

| Update | Description | Release Date | Documentation |
|---|--|--------------|----------------------------------|
| Supported elastic application bandwidth | Anti-DDoS Pro supports elastic application bandwidth, and the excessive part will be charged at 14 USD/Mbps/month. | 12/16/2022 | Billing Overview |

October 2022

| Update | Description | Release Date | Documentation |
|-----------------------------|--|--------------|--|
| Optimized the instance list | The instance list in the console is optimized to support filtering instances by protection pack. | 10/26/2022 | Viewing Instance Information |

August 2022

| Update | Description | Release Date | Documentation |
|---|---|--------------|---|
| Supported observation mode for CC AI protection | Observation mode is supported for CC AI protection, and CC AI protection is fully launched. | 8/25/2022 | Intelligent CC Protection |

June 2022

| Update | Description | Release Date | Documentation |
|--|--|--------------|--|
| Auto-unbinding and terminating cloud products | Anti-DDoS Pro auto-detects the binding status of cloud products to determine whether to perform unbinding. | 6/13/2022 | Managing Protected Resources |
| Intelligent CC protection launched | AI-powered CC protection is delivered to implement precise protection rules and adjust the protection model dynamically. | 6/7/2022 | Intelligent CC Protection |
| Protected targets: Private network CLBs and EIPs | Anti-DDoS Pro supports binding and unbinding EIP-bound private network CLBs and EIPs. | 6/1/2022 | - |
| Improved display of attack traffic | One-hour granularity of attack traffic can be displayed. | 6/1/2022 | - |

April 2022

| Update | Description | Release Date | Documentation |
|------------------------------------|---|--------------|--|
| One-click upgrade of old instances | Anti-DDoS Pro (single/multi-IP) instances can be upgraded for free in the console. | 4/27/2022 | - |
| Pop-up box added | A pop-up box appears when you enable CC protection for a WAF IP, and you're asked to first enable CC protection in the WAF console. | 4/14/2022 | Protection Level and Cleansing Threshold |

| Update | Description | Release Date | Documentation |
|---------------------|--|--------------|-------------------------------------|
| Protection overview | The information about data sources is added. | 3/4/2022 | Protection Overview |

March 2022

| Update | Description | Release Date | Documentation |
|---|--|--------------|-------------------------------------|
| Optimized visual display of the console | <ul style="list-style-type: none"> An explicit display of policy configuration is provided. A description is added to the new action "Continue protection" for port filtering. | 3/4/2022 | - |
| Protection overview | The information about data sources is added. | 3/4/2022 | Protection Overview |

January 2022

| Update | Description | Release Date | Documentation |
|-----------------------------------|---|--------------|-------------------------------------|
| Protection overview | The display of protection overview is optimized. | 1/13/2022 | Protection Overview |
| Protection bandwidth of BGP lines | The protection bandwidth of Anti-DDoS Advanced BGP lines is increased to 1000 Gbps. | 1/10/2021 | Billing Overview |

December 2021

| Update | Description | Release Date | Documentation |
|---------------------|--|--------------|-------------------------------------|
| Protection overview | The protection overview page fully displays the security status of application IPs and Anti-DDoS Advanced instances. | 12/23/2021 | Protection Overview |

| Update | Description | Release Date | Documentation |
|---|---|--------------|--|
| CC protection and cleansing threshold | The feature "CC Protection and Cleansing Threshold" is optimized. | 12/23/2021 | Protection Level and Cleansing Threshold |
| Port filtering | Visual interaction is optimized and batch creation of multiple instances is supported. | 12/23/2021 | Port Filtering |
| CC frequency limit | The feature of CC frequency limit is optimized. | 12/23/2021 | CC Frequency Limit |
| IP allowlist/blocklist | The IP allowlist/blocklist configuration is added. | 12/23/2021 | IP Blocklist/Allowlist |
| Elastic application bandwidth (pay-per-use) | Elastic application bandwidth is provided when you need to increase application bandwidth or QPS. | 12/3/2021 | Billing Overview |
| Protection overview | The display of attacks on Anycast on the Anti-DDoS Advanced console is optimized. | 12/3/2021 | - |

November 2021

| Update | Description | Release Date | Documentation |
|-----------------------------|---|--------------|--|
| Keyword searching | Supported keywords for searching: real server port, forwarding port, protocol, real server, and associated Anti-DDoS Advanced instance, etc. | 11/10/2021 | Port Connection |
| Regional blocking | <ul style="list-style-type: none"> Access requests from source IP addresses in specific geographic locations can be blocked at cleansing nodes. Multi-regional blocking is supported. | 11/10/2021 | Regional Blocking |
| CC protection configuration | The "Allow" option for precise protection policy is added. | 11/10/2021 | Precise Protection |
| CC data display optimized | <ul style="list-style-type: none"> A new dimension, number of requests, is added. The display of request rate is optimized. | 11/10/2021 | Viewing Security Protection Overview |

October 2021

| Update | Description | Release Date | Documentation |
|------------------------|---|--------------|-------------------------------|
| Application connection | Anti-DDoS Advanced (Global Enterprise Edition) supports connecting multiple IPs in different regions. | 10/22/2021 | IP Connection |

September 2021

| Update | Description | Release Date | Documentation |
|--------------------|--|--------------|---------------|
| Console | The entry to view release notes is added to the console. | 9/9/2021 | - |
| Alert notification | The alert notification feature is improved. | 9/9/2021 | - |

August 2021

| Update | Description | Release Date | Documentation |
|------------------------|---|--------------|--|
| Domain name connection | The same domain name with two different protocols can be connected. | 8/26/2021 | Domain Name Connection |

July 2021

| Update | Description | Release Date | Documentation |
|---|---|--------------|--|
| CC frequency limit | Limiting CC frequency for subdomain names based on wildcard domain names is supported. | 7/29/2021 | CC Frequency Limit |
| CC protection level and cleansing threshold | Configurations of different domain names bound to the same Anti-DDoS Pro instance can be refined. | 7/29/2021 | Protection Level and Cleansing Threshold |

June 2021

| Update | Description | Release Date | Documentation |
|------------------------|--|--------------|--|
| Domain name connection | Anti-DDoS Advanced supports forwarding the same domain name through different ports. | 6/22/2021 | Domain Name Connection |

Announcements

Discontinuing of CC Protection of Anti-DDoS Pro

Last updated : 2023-06-25 14:46:21

CC protection of Anti-DDoS Pro is officially discontinued from **00:00 on May 15, 2023**. If you need relevant service, please purchase [Anti-DDoS Advanced](#). For details, please [contact us](#).
