Overview

This document describes how to quickly use the CHDFS service in the CHDFS console with no need to write code or run programs.

Step 1. Register a Tencent Cloud account

To use CHDFS, you need to register a Tencent Cloud account as instructed in [Signing up for a Tencent Cloud Account](#). (If you have already registered, please skip this step.)

Step 2. Verify your identity

After successful registration, log in to the [Tencent Cloud console](#) and verify your identity as instructed in [Identity Verification Guide](#). (If you have already verified your identity, please skip this step.)

Step 3. Go to the CHDFS console

Log in to the [CHDFS console](#) to perform relevant operations, including creating CHDFS instances, creating permission groups and permission rules, and adding mount points. For more information, please see [Operation Guide](#).

Step 4. Deploy the CHDFS SDK

You can deploy the CHDFS SDK on relevant servers for mounting. For more information, please see [Operation Guide](#).
