Purchase Guide

Billing Overview

Last updated : 2021-12-16 10:30:06

You can estimate the cost of Tencent Managed Service for Prometheus (TMP) resources by referring to the billing documentation.

Billing Mode

TMP supports the pay-as-you-go billing mode:

Billing Mode	Payment Mode	Applicable Scenario	Billing Formula
Pay-as-you-go	Postpaid mode, that is, you can apply for resources as needed first, and fees will be charged based on the actual resource usage.	It is suitable for businesses that may fluctuate greatly and instantaneously. In this mode, instances can be released immediately after use so as to reduce the cost.	Total fees = instance specification fees + data storage fees + traffic fees (currently free of charge)

Pay-as-You-Go

Last updated : 2022-04-28 10:34:37

Tencent Managed Service for Prometheus (TMP) is available for purchase in many major regions, and the service price may change across regions depending on different promotional activities or pricing strategies.

Pricing

Calculation formula

Total fees = daily reported metric data volume (in million entries) x unit price + traffic fees (currently free of charge)

Billable items

Billable Item	Description
Average reported metric data volume	Tiered pricing based on the reported metric data volume
Traffic	Public network traffic, which is currently free of charge

Free metrics

Some metrics are free of charge in the pay-as-you-go mode. For details, see [Free Metrics in Pay-as-You-Go Mode](#).

Instance price

Unit price for 15-day data storage

Range of Average Reported Metric Data Volume (in million entries)	Unit Price (USD)
0-200	0.19
200-800	0.12
800-1,500	0.06
Above 1,500	0.05

Unit price for 30-day data storage

Range of Average Reported Metric Data Volume (in million entries)	Unit Price (USD)
---	------------------

Range of Average Reported Metric Data Volume (in million entries)	Unit Price (USD)
0-200	0.22
200-800	0.16
800-1,500	0.11
Above 1,500	0.08

Unit price for 45-day data storage

Range of Average Reported Metric Data Volume (in million entries)	Unit Price (USD)
0-200	0.25
200-800	0.2
800-1,500	0.12
Above 1,500	0.09

Billing Examples

Example 1 (less than 200 million reported metric data entries):

Suppose 60 million entries of metric data are reported a day, and the data retention period is specified as 15 days, then the daily fees = $60 \times 0.19 = 11.4$ USD.

Note: "60" in the above formula indicates 60 million metric data entries.

Example 2 (more than 200 million reported metric data entries):

Suppose 900 million entries of metric data are reported a day, and the data retention period is specified as 30 days, then the daily fees are calculated in a tiered manner as follows:

For the first 200 million metric data entries, the fees = $200 \times 0.25 = 50$ USD

For the 200-800 million metric data entries, the fees = $(800 - 200) \times 0.2 = 120$ USD

For the 800-900 million metric data entries, the fees = $(900 - 800) \times 0.12 = 12$ USD

Therefore, the total fees = $50 + 120 + 12 = 182$ USD

Note: "900" in the above formula indicates 900 million metric data entries.

Relevant Documentation

- You can purchase TMP instances through the console. For more information, please see [Purchase Methods](#).
- TMP sends alert messages to you before it expires and its resources are repossessed. For more information, please see [Payment Overdue](#).

Billing Rules for Free Metrics Exceeding Free Storage Period

Last updated : 2022-10-26 16:45:53

Tencent Managed Service for Prometheus (TMP) will change the free metric storage period of pay-as-you-go instances as described in [Free Metrics in Pay-as-You-Go Mode](#) to **15 days** on **November 30, 2022**. **For TMP instances with storage period over 15 days, their metrics will be charged for the extra storage days.**

Note :

To check the free metrics you have used or streamline monitoring metrics to avoid unnecessary expenses, see [Streamlining Monitoring Metrics](#).

Storage Pricing

Calculation formula

Storage fees = storage unit price * (data storage period - 15 days) * daily reported metric data volume in million entries

Settlement cycle

Fees are settled on a daily basis.

Storage unit price

Region	Unit Price (USD/million entries)
Non-finance zones in the Chinese mainland, such as Guangzhou, Shanghai, and Beijing	0.0015
Regions outside the Chinese mainland + finance zones in the Chinese mainland, such as Hong Kong (China), Singapore, and Shenzhen Finance	0.003

Note :

Data entry count less than one million will be calculated as one million.

Billing Example

Let's suppose a user has purchased a TMP instance in a non-finance zone in the Chinese mainland, the data storage period is 45 days, and the number of reported metric data entries is 10 million a day, then:

The storage fees for that day = $0.0015 * (45-15) * 10 = 0.45$ USD

Purchase Methods

Last updated : 2022-08-24 16:22:32

This document describes how to purchase a TMP instance.

Prerequisite

You have [signed up for a Tencent Cloud account](#) and completed [identity verification](#).

Pay-as-You-Go

1. Log in to the TMP purchase page and configure the following instance information.

Item	Description
Billing Mode	Select "pay-as-you-go".
Region	Select the region where your business needs to be deployed. <div style="border: 1px solid #add8e6; padding: 10px; margin-top: 10px;"><p>Note</p><p>Tencent Cloud services in different regions cannot communicate with each other over the private network; for example, a service in the Guangzhou region cannot report data to a TMP instance in the Shanghai region over the private network. Once an instance is purchased, the region cannot be changed. Therefore, you need to select the region with caution.</p></div>
Availability Zone	Select an AZ supported by the region.
Network	VPC is supported. We recommend you choose the same VPC in the same region as your monitoring target. For more information, see Network Environment .
Data Retention Period	Select the data retention period. In the pay-as-you-go billing mode, fees are charged based on the daily reported metric data volume and the data retention period. For more information, see Product Pricing/a> .
Instance Name	Enter an instance name.
Grafana	Enter the password of Grafana that comes with the instance. The account is `admin` by

Password/Confirm Password	default. <div style="border: 1px solid #add8e6; padding: 10px;"><p>Note</p><p>The password must begin with a letter or digit and contain at least one special symbol (@ \$! % * # ? &), and its length should be between 6 and 24.</p></div>
Tag	Enter a tag for the instance (optional).
Validity Period	Select the validity period of the instance.

2. Read and indicate your consent to related terms of agreement, and then click **Buy Now**.
3. On the payment page, select a payment method and pay.
4. You can enter the instance list page after the purchase. The instance will be in **Creating** status, and you can use it after around 3-5 minutes when its status changes to **Running**.

Subsequent Operations

[Quickly get started with TMP.](#)

Payment Overdue

Last updated : 2021-12-16 10:30:06

Alerting

- From seven days before your resource expires until the resource is released, the system will send an alert to your Tencent Cloud account creator, global resource collaborators, and financial collaborators via email, SMS, and other methods as configured in the message subscription in the [Message Center](#).
- During this period, the alert will be sent once every day.

Repossession

- You will receive renewal notifications from seven days before your TMP resource expires.
- The resource can be used within seven days after it expires, during which you will receive expiration alerts. Please renew it as soon as possible.
- From the eighth day after the resource expires, it will remain unavailable yet can be renewed, and instances will be suspended.
- If you do not renew the resource **seven days after it becomes suspended**, it will be repossessed, and related data will be cleared and cannot be recovered.
- In other words, the TMP resource will remain **available for seven days** after the expiration and become **unavailable for another seven days**. You can renew it within the 14 days. If your balance is sufficient and auto-renewal is enabled, the resource will be automatically renewed upon expiration.

Free Metrics in Pay-as-You-Go Mode

Last updated : 2021-12-16 10:30:06

Pay-as-You-Go — Unit Price for One-Year/Two-Year Data Storage

Last updated : 2022-10-19 17:48:51

Tencent Managed Service for Prometheus (TMP) instances are billed based on the period of data storage. The billing rules for one-year and two-year data storage only differ in the unit price, as described below. For more billing rules, see [Pay-as-You-Go](#).

Instance Price

Unit price for one-year data storage

Non-finance zones in the Chinese mainland, such as Guangzhou, Shanghai, and Beijing

Range of Average Reported Metric Data Volume (in million entries)	Unit Price (USD)
0-200	0.83
200-800	0.79
800-1,500	0.75
Above 1,500	0.74

Regions outside the Chinese mainland + finance zones in the Chinese mainland, such as Hong Kong (China), Singapore, and Shenzhen Finance

Range of Average Reported Metric Data Volume (in million entries)	Unit Price (USD)
0-200	1.65
200-800	1.57
800-1,500	1.49
Above 1,500	1.47

Unit price for two-year data storage

Non-finance zones in the Chinese mainland, such as Guangzhou, Shanghai, and Beijing

Range of Average Reported Metric Data Volume (in million entries)	Unit Price (USD)
0-200	1.81
200-800	1.76
800-1,500	1.71
Above 1,500	1.7

Regions outside the Chinese mainland + finance zones in the Chinese mainland, such as Hong Kong (China), Singapore, and Shenzhen Finance

Range of Average Reported Metric Data Volume (in million entries)	Unit Price (USD)
0-200	3.61
200-800	3.51
800-1,500	3.42
Above 1,500	3.4
