## Feature Overview

Cloud Monitor (CM) provides a highly available managed Grafana service to reduce the costs of Grafana setup and OPS, which includes installation, upgrade, plugin installation, dashboard installation, and data source configuration features.

## Directions

### Step 1. Create Grafana

1. Log in to the [TCMG console](#).
2. Click **Create** and configure the items as prompted. For detailed directions, see [Creating Grafana Instance](#).
3. After completing the configuration, click **Buy Now**.

### Step 2. Configure Grafana

1. In the [TCMG service list](#), find the target instance and click **Manage** in the **Operation** column.
2. On the Grafana management page, click **Settings**.
3. Click **Edit** in the top-left corner of the **Settings** page and modify the configuration file as prompted.
4. After completing the modification, click **OK**.

### Step 3. Log in to Grafana to view the monitoring data

1. In the [TCMG service list](#), select the target instance and click the

icon on the right of its instance ID.

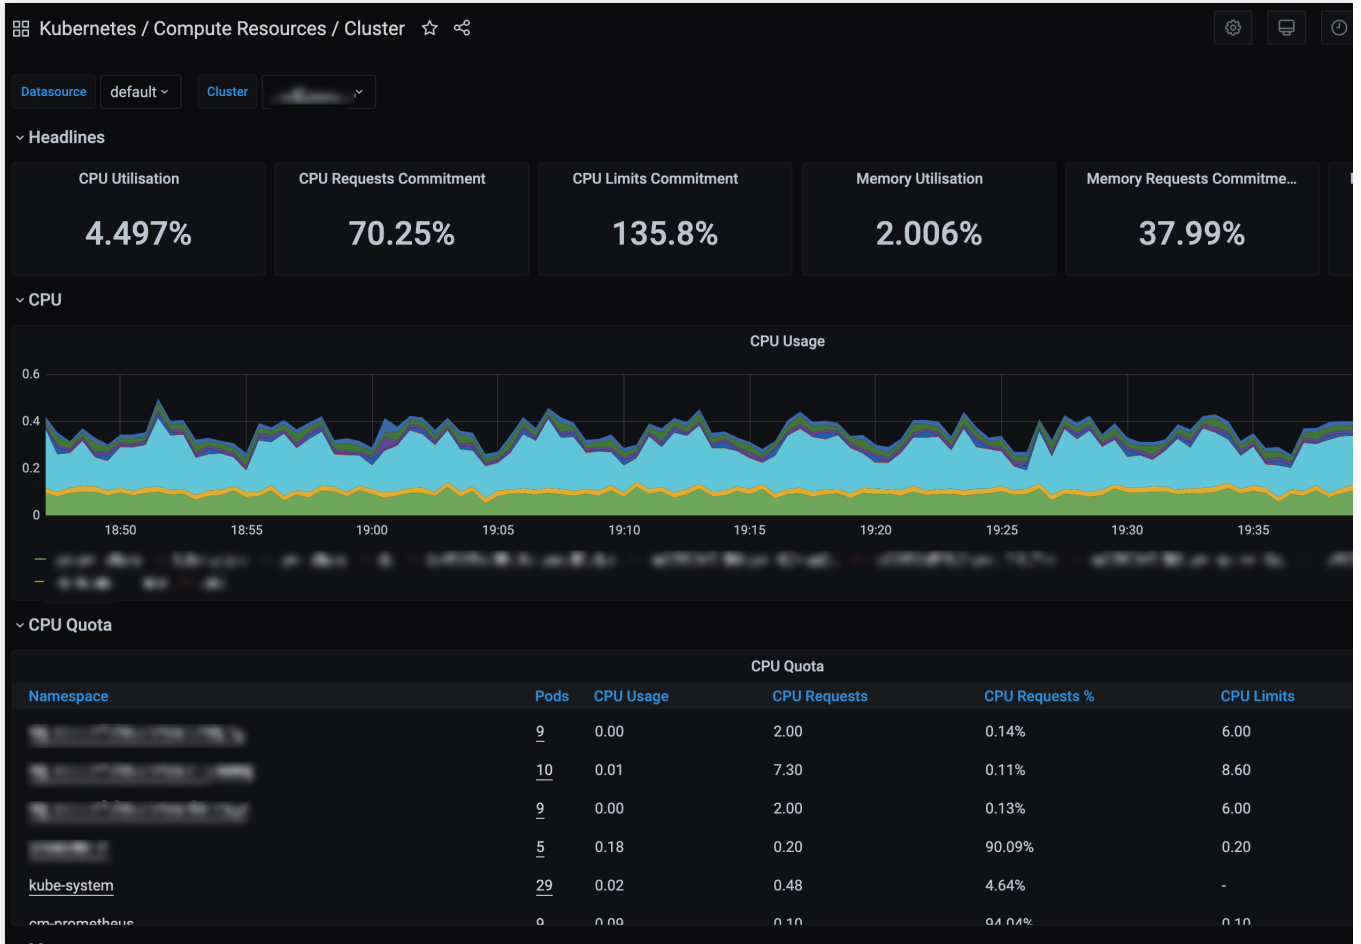

2. In Grafana, enter your Grafana login account and password to access the operation section of the visual dashboard.

3. Click

to enter the monitoring dashboard list page.

4. On the monitoring dashboard list page, click the name of the target monitoring chart to view the monitoring data.

**Note:**

For more information on how to use Grafana, see [Grafana documentation](#).
