What deployment modes does CIAM support?

It can be deployed in public, private, and hybrid clouds.

How do I set my own domain name?

CIAM allows you to configure your own or Tencent Cloud domain names in the following steps: deploy an SSL certificate, configure the DNS, and then make the domain name take effect. If you don't configure a custom domain name, the default one will be used.

Billing

Last updated : 2023-12-22 11:43:32

Do I need to pay extra for customization needs?

If you have customization needs, contact your Tencent Cloud rep.

Do I need to pay extra if I want to use Tencent's risk management features together with CIAM after connecting to it?

Tencent Cloud provides diverse risk management features such as registration protection, anti-cheating, and CAPTCHA, which need to be purchased separately. For more information, [contact us](#).
