Environment Configuration Overview

iPaaS provides Trial edition and Enterprise edition environments. For more information on the environment configurations, see [Edition Details and Pricing](#).

- **Trial Edition:** Currently, iPaaS offers a 30-day free trial to new users, during which you can use all features and publish integration apps to the trial environment. After the **30-day period**, the trial environment will expire, integration apps running in the environment will stop automatically, and creation and running operations related to integration apps, API management, and security gateways will become limited. You cannot renew the trial environment. To continue using iPaaS after the trial period expires, you can purchase an Enterprise environment.
- **Enterprise Edition:** iPaaS offers four Enterprise edition environment configurations for integration scenarios of different scales. If none of the configurations meet your requirements, you can contact us on the purchase page to request a configuration.

Note :

Trial and Enterprise editions are both SaaS editions. iPaaS supports on-premises deployment and hybrid cloud deployment. If you have such needs, please [submit a ticket](#) for assistance.

Edition Details and Pricing

Comparison between Trial and Enterprise editions

For more information, see [Enterprise edition environments and pricing](#).

Edition	Enterprise Edition	Trial Edition
Features	All features	All features
Server (computing resources)	Exclusive environment	Shared environment

Edition	Enterprise Edition	Trial Edition
Max number of integration apps that can be created	80 or more	10
Max number of flows that can be run	160 or more	20
Max flow QPS	600/tenant	10/tenant
Max number of concurrent flows	60/tenant	10/tenant
Max log storage size	50 GB	10 GB
Max number of security gateways that can be created	8	1

Questions?

If you have any questions when purchasing iPaaS, you can try finding the answer in [FAQs - Purchase](#). If you still have questions, please [submit a ticket](#) for assistance.

Purchase Methods

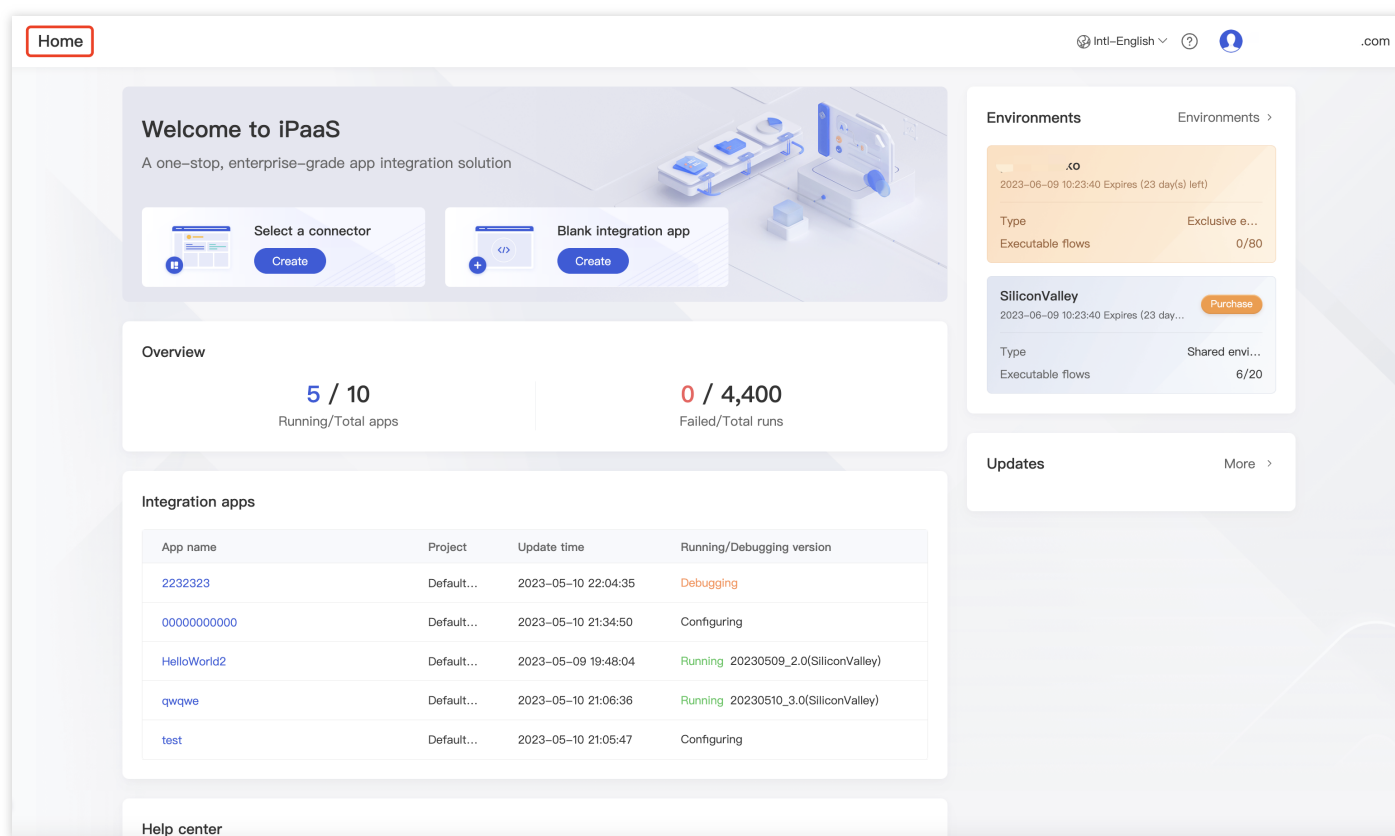

Last updated : 2023-08-04 09:48:17

Purchasing the Enterprise Edition

iPaaS offers a 30-day free trial. During or after the trial period, you can purchase the Enterprise edition in the [iPaaS console](#).

Purchasing on the Home page

1. Log in to the iPaaS console and go to the [Home](#) page.
2. In the **Environments** section of the home page, click **Buy now** to enter the Enterprise edition purchase page.

3. Select the environment configuration you want (refer to [Enterprise edition environments and pricing](#)), click **Buy now**, and make the payment.

Note :

After the purchase, you can further configure the relevant parameters as instructed on the **Environments** page.

Purchasing on the Environments page

1. Log in to the iPaaS console and go to the [Environments](#) page.

2. Click **Buy environment** to enter the purchase page.

The screenshot shows the 'Environments' page in the Tencent Cloud console. The page has a header with 'Environments' and navigation tabs for 'Application Integration' and 'APIs'. A 'Purchase' button is highlighted with a red box. Below the header, there are two environment cards. The first card is for 'private-deko' (Running) and the second is for 'SiliconValley' (Running). Each card displays configuration details and resource utilization metrics.

Environment Name	Status	Environment Plan	Expiration Time	Region - Environment Type	CPU	Memory	Network Bandwidth	CPU Utilization	Memory Utilization	Running Flows
private-deko	Running	Enterprise-Environment configuration A	2023-06-09 10:23:40 (23 day(s) left)	undefined-Exclusive environment	4-core	8.00G	200Mbs	3%	45%	0/80
SiliconValley	Running	Trial - trial environment	2023-06-09 10:23:40 (23 day(s) left)	undefined-Trial environment						6/20

3. Select the environment configuration you want (refer to [Enterprise edition environments and pricing](#)), click **Purchase now**, and make the payment.

Note :

After the purchase, you can further configure the relevant parameters as instructed on the **Environments** page.

Viewing the Environment Configuration

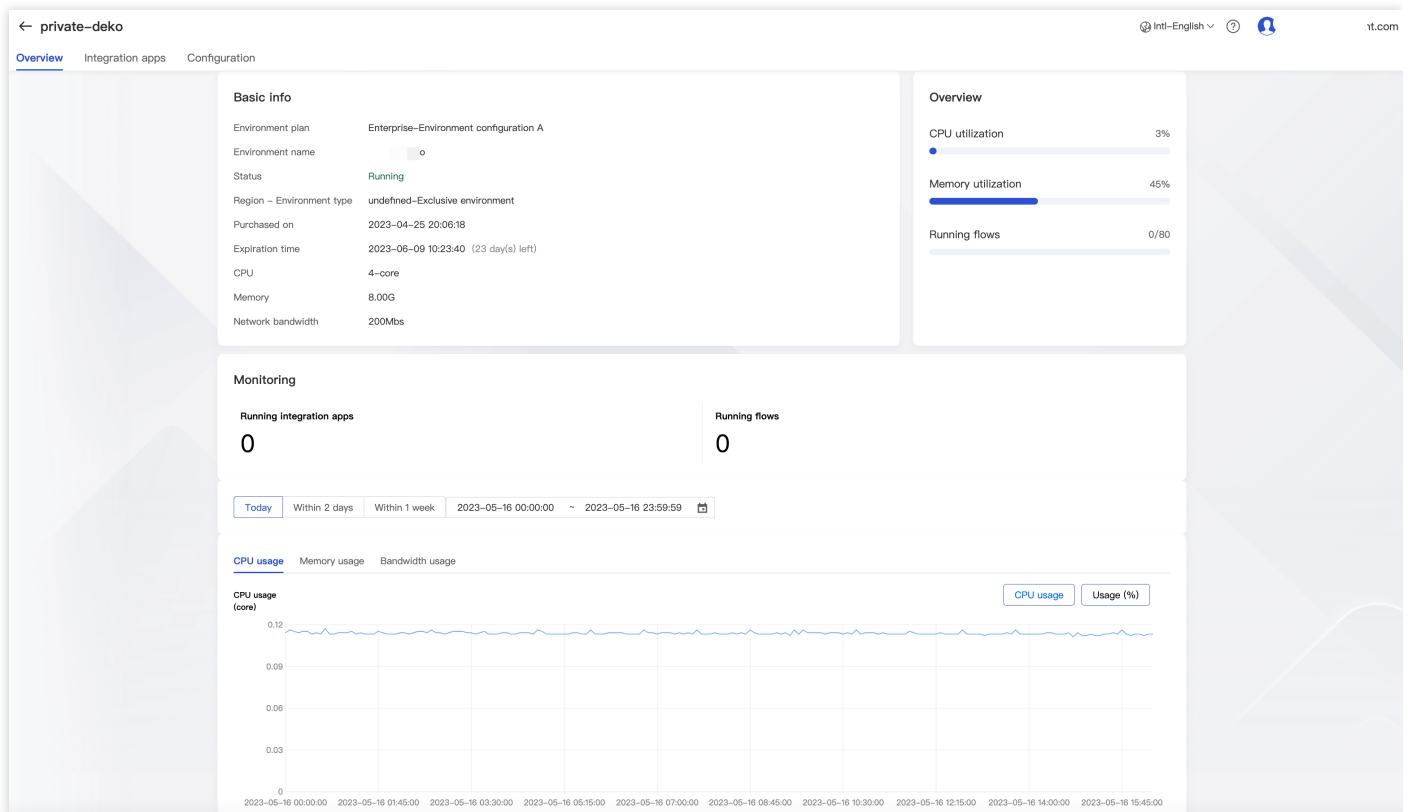

On the **Environments** page, you can view both trial environments and Enterprise edition environments as well as information such as the environment configuration, resource usage, and running integration apps in the environments.

1. Log in to the iPaaS console and go to the **Environments** page.

2. Click **Details** on the right of the target environment to view the environment details.

As shown below:

Renewal and Upgrade

1. Log in to the iPaaS console and go to the **Environments** page.
2. Click **Renew** and perform operations as prompted. Please contact online customer service staff to upgrade.

The screenshot displays the 'private-deko' environment page in the Tencent Cloud iPaaS console. The page is divided into two main sections: 'Basic info' and 'Overview'.

Basic info

Environment plan	Enterprise-Environment configuration A
Environment name	private-deko
Status	Running
Region - Environment type	undefined-Exclusive environment
Purchased on	2023-04-25 20:06:18
Expiration time	2023-06-09 10:23:40 (21 day(s) left)
CPU	4-core
Memory	8.00G
Network bandwidth	200Mbs

Overview

CPU utilization	3%
Memory utilization	43%
Running flows	0/80

The 'Expiration time' field in the 'Basic info' section is highlighted with a red box, indicating the date and time when the environment will reach its end of life, along with the remaining duration of 21 days.

Overdue Payments

Last updated : 2023-08-03 17:02:39

Once an Enterprise edition environment configuration expires, all integration apps published in the environment will stop automatically, and creation and running operations related to integration apps, API management, and security gateways will also be limited.

- Seven days before your environment configuration expires, the system will send you expiration alerts.
- If your account balance is sufficient and you enabled auto-renewal, the system will perform auto-renewal on the expiration date.
- If the service is not renewed before expiration, the system will stop all integration apps published in the environment.

Refunds

Last updated : 2023-08-03 17:02:39

Currently, iPaaS doesn't support configuration downgrade or self-service refunds, and service becomes unavailable upon expiration. To request a refund, please [submit a ticket](#).
