Getting Started

Last updated：2023-12-25 15:46:50

This document describes how to quickly get started with APM.

Step 1. Sign up

Log in at the Tencent Cloud official website. If you don't have an account yet, sign up as instructed in Signing Up.

Step 2. Create a business system

1. Go to the **Resource management** page in the APM console.
2. On the **Resource management** page, select the target region, click **Create**, enter the business name, and select the retention period (the longer the retention period, the higher the fees). Then, indicate your consent to the agreement and click **OK**.

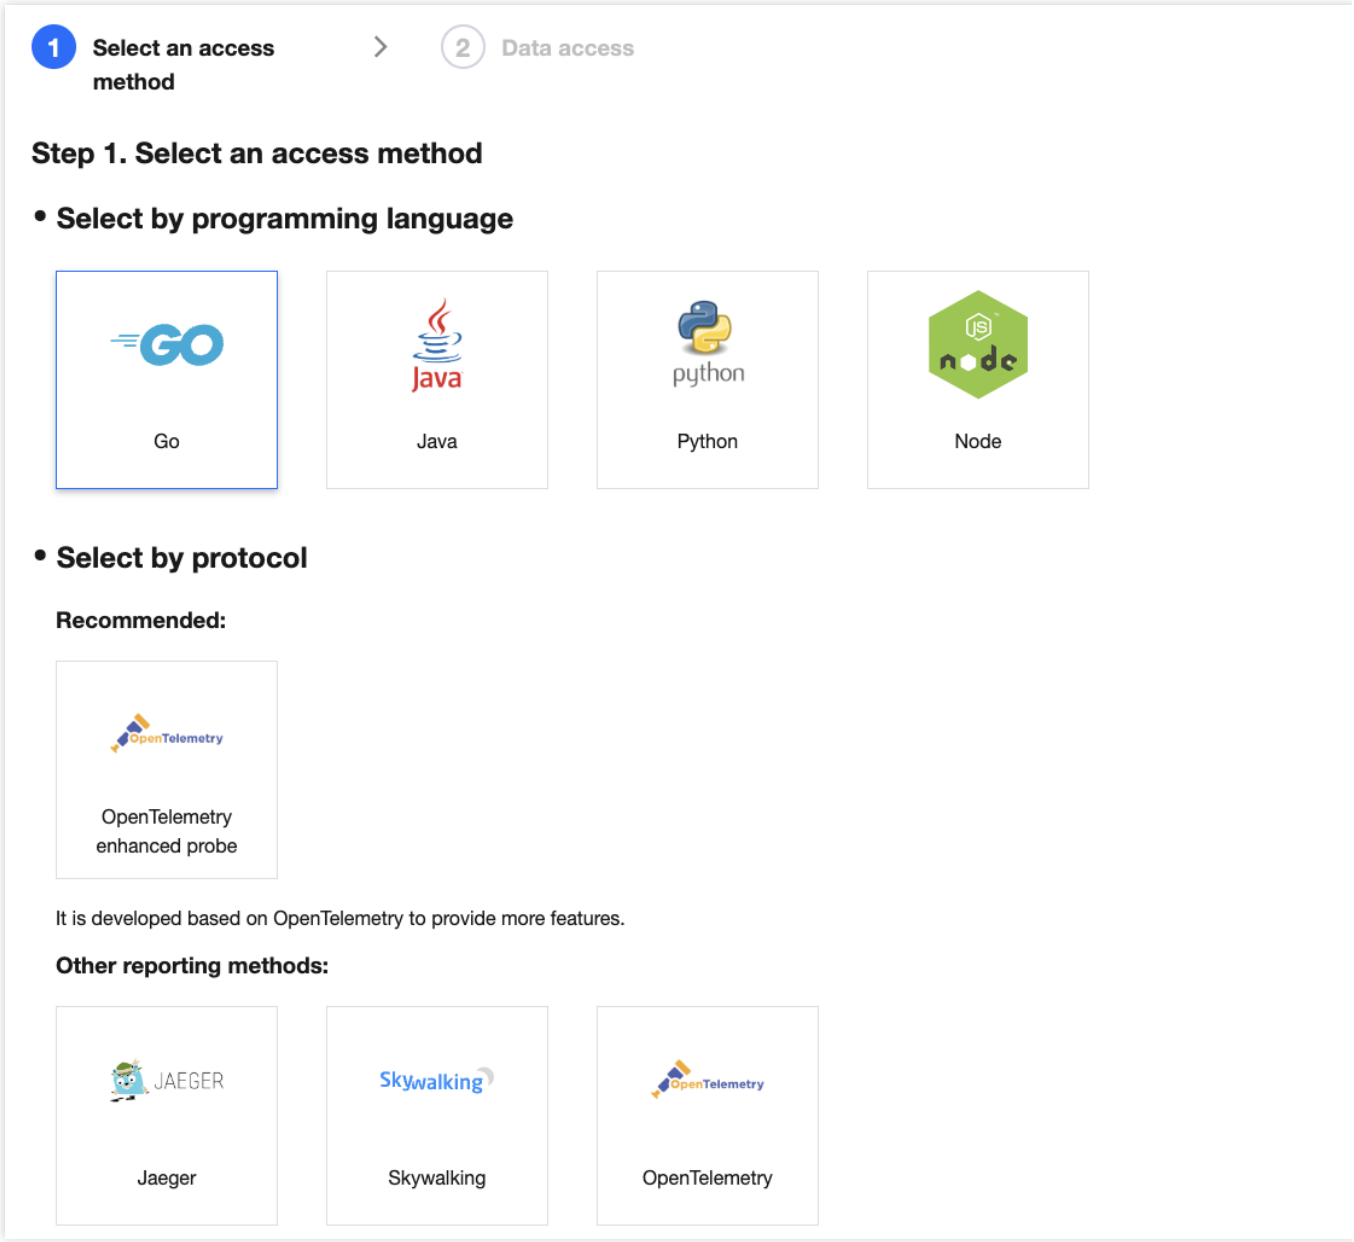
Step 3. Access an application

1. On the application list management page, click **Access application**.

2. On the access guide page, select the programming language, access method, and reporting method and click **Next**.

©2013-2022 Tencent Cloud. All rights reserved.



3. Complete the access as prompted and click **Complete**.

Note:

APM supports multiple programming languages with different access methods. For more information, see Access Guide.

Step 4. View the system performance monitoring data

In APM, you can view various monitoring data, such as the service overview, database calls, API calls, and call traces. For more information, see Application List.
