## FAQs

# How to Get Started?

Last updated : 2023-09-11 16:32:20

To get started with Tencent Cloud Blockchain RPC, first create a project within the platform. In your project, you will find a unique blockchain URL specific to your needs. Utilize this URL to send requests to the underlying blockchain network, enabling seamless interaction and efficient integration of blockchain technology into your business operations.

# How Does Tencent Cloud Blockchain RPC Bill?

Last updated : 2023-09-11 16:32:48

Tencent Cloud Blockchain RPC billing operates on a unit-based system for the Premium plan. To send requests to the underlying blockchain node, you'll need to purchase units. Several package types are available, each containing varying numbers of units to suit your needs. Choose a package that best aligns with your usage requirements to ensure cost-effective and efficient utilization of the Tencent Cloud RPC services.

# What If I Run out of My Unit?

Last updated : 2023-09-11 16:32:57

If you run out of units in your Premium plan, your account will automatically switch to the Public plan, allowing you to continue using the service with the features and limitations of the Public plan. This ensures uninterrupted access to Tencent Cloud RPC services without any disruptions to your operations.

# What Are the Benefits of Upgrading My Plan?

Last updated : 2023-09-11 16:33:07

Upgrading to the Premium plan offers several benefits, including the ability to create more projects, maintain additional WebSocket (WSS) connections, and achieve a higher request rate of around 1500 queries per second (QPS) when interacting with the blockchain. Additionally, during periods of network congestion, requests from Premium plan users receive priority processing, ensuring faster and more efficient service.
