Domain Registration

Last updated：2024-01-29 17:33:59

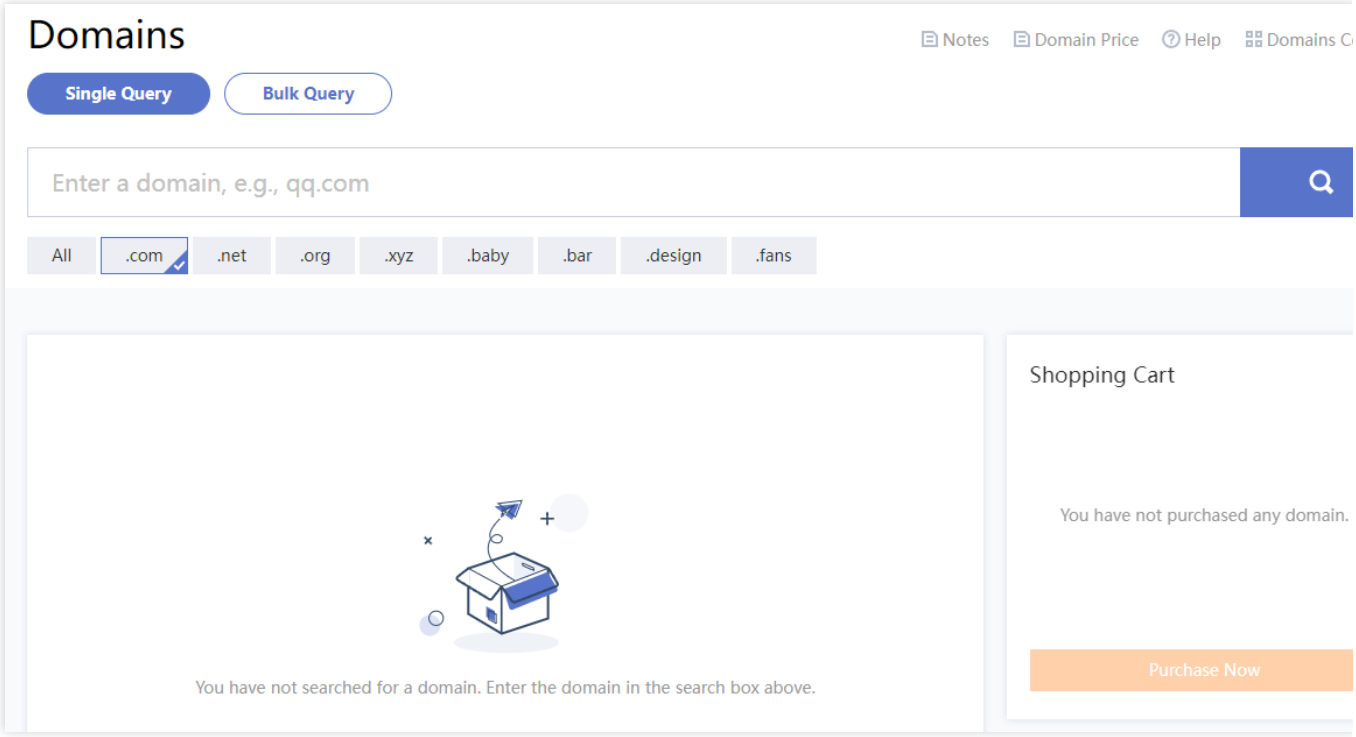
Domain registration is essentially to pay for the right to use a domain for one or multiple years. You can easily get your domain in several simple steps:

Step 1. Query the domain

Before registering a domain, you need to query whether the domain or its suffix has already been registered by somebody else, and if so, you need to choose an unregistered domain or suffix before proceeding to the next step.

1. Log in on the Domain Registration page.
2. On the **Domain Registration** page, enter the target domain and suffix and click to view its registration status as shown below:

For example, enter `example.com` .



If the returned query result shows **Registered**, the domain has already been registered, and you need to change the domain or suffix.

If the returned query result shows **Add to Cart**, the domain can be registered.

Step 2. Add to cart

1. Select the domain to be registered such as `example.com` and click **Add to Cart**.

Note:

You can also add multiple suffixes to protect your brand; for example, you can add `example.cn`, `example.net`, and `example.org` to the cart.

2. In the **cart** on the right, click **Purchase Now**.

Step 3. Enter the domain information

1. On the **Submit Order** page, confirm the domain purchase term, enter the domain information, and select **I have read and agree to Tencent Cloud Domain Registration Agreement and Tencent Cloud Privacy Policy**.

In the domain information, 1, 2, 3, 5, and 10 years are displayed as purchase term options by default. If you want to select another period such as 7 years, click **Other** and select 7 years.

You can enter the domain owner information in the following two ways:

If you have purchased a domain before, you can use the previously entered domain information.

If you want to use new domain information, we recommend you create a template as shown below:

Note:

You can also select **Create Template** and register the domain as prompted.

If you want to set auto-renewal upon domain expiration, select **Enable auto-renewal**.

2. Click **Submit Order**.

Step 4. Check the information

1. On the **Check Information** page, check whether your domain information, purchase term, and fees are correct.
2. Click **Confirm** to enter the payment page.

Step 5. Make the payment

On the **Payment** page, select a payment method as appropriate.

Note:

After making the payment, you can view/manage your domain in My Domains.

If you need an invoice, you can apply for it in **Cost > Cost Center > Invoice and Contract >** Invoice Management.
