API Documentation

Last updated : 2021-03-25 10:35:50

Anti-DDoS Advanced APIs has been upgraded to version 3.0. This updated version is more comprehensive with standardized parameters, common error codes and consistent SDK/CLI versions, making it easy to use. API 3.0 supports nearby access in all regions, giving you faster access to Tencent Cloud services.

Thank you for choosing Tencent Cloud Anti-DDoS Advanced.

Anti-DDoS Advanced is a paid protection service defending businesses such as games, internet services, and finance operations against Distributed Denial of Service (DDoS) attacks that may disable user access. It can direct attack traffic to Anti-DDoS Advanced IPs for cleansing, thus ensuring business stability and availability of the real servers.

The API 3.0 documentation and examples describes how to use Anti-DDoS Advanced via APIs. For example, you can configure layer-4 access, termination and CC protection policies, and obtain DDoS attack data. All existing anti-DDoS services, including Anti-DDoS Basic, Anti-DDoS Advanced and Anti-DDoS Pro, uses the same API 3.0 documentation, which can be found in the Anti-DDoS Pro documentation. To learn more about Anti-DDoS Advanced APIs, see [API Category](#).

Please ensure that you are familiar with the concept of [Anti-DDoS Advanced](#) before using these APIs.

Note :

- The API documentation is designed for all anti-DDoS services. The `Business` parameter is used to differentiate between the services. For example, `bgpip` refers to Anti-DDoS Advanced.
- **All Anti-DDoS Advanced APIs in the API documentation have been upgraded to API 3.0. Future Anti-DDoS Advanced features will also be added in [API Category](#). We recommend using API 3.0.**
