Customer Security Assessment Policy and Guidelines

최종 업데이트 날짜: : 2021-08-20 17:59:25

Within the term of products and services purchased by you from Tencent Cloud, you may conduct a security assessment on the code, data, applications and components you deploy on Tencent Cloud. The security assessment includes, but is not limited to, vulnerability scans, penetration tests, stress tests and vulnerability mining (same for the full text). If you intend to proceed with the security assessment, your consent to and compliance with the following policy and guidelines (hereinafter referred to as these “Guidelines”) shall be required:

- 1.You shall not perform any security assessment on the infrastructure, platform, products or services of Tencent Cloud, including but not limited to servers, database systems and underlying applications, etc.
- 2.If you found any security vulnerability relating to the infrastructure, platform, products or services of Tencent Cloud in the course of your security assessment, please contact the Tencent Cloud security team (cloud_sec@tencent.com) immediately. You shall not disclose all or part of the information relating to such vulnerability to the public nor provide it to any third parties.
- 3.In conducting the security assessment, you shall not violate these Guidelines, nor perform the assessment beyond the scope of resources you purchase and create through your Tencent Cloud account.
- 4.If you want to carry out a stress test while conducting the security assessment, you shall be required to make an application for the test to the Tencent Cloud security team (cloud_sec@tencent.com). When making the application, a complete stress test proposal shall be submitted and such stress test shall be performed only after the application is approved. The stress test must be carried out in strict compliance with the stress test proposal during the test.
- 5.If a phishing test (i.e. sending phishing emails, phishing links and phishing documents, etc. to the users of your business) is to be included while conducting the security assessment, you shall conduct the phishing test in compliance with laws and regulations and publicly explain to such users about the act of performing the phishing test and the details of such test following the completion of the assessment so as to avoid any disputes arising from the phishing act. Please be aware that simulated phishing attacks can lead to adverse press and compromise user trust, therefore the group of persons selected for simulated phishing attacks must consent to participating in security and similar assessments. In the event of any complaints from users, disputes or other issues, you shall resolve them on your own and any consequences in connection therewith shall be solely borne by yourself.
- 6.If the procedures involving data, code and other information (including but not limited to the assessment of a disaster recovery emergency plan and destructive data or code test, etc.) are to be carried out while conducting the security assessment, you shall keep a backup of your data, code and other information properly by yourself and solely bear any consequences as a result therefrom.

7. Prior to the security assessment, you should be aware of any potential risk that may be caused by the security assessment and ensure that you have the lawful right to conduct the security assessment on the targets of such assessment. You shall solely assume all consequences and liabilities arising from the security assessment, and Tencent Cloud shall not be liable for any losses in connection with any loss of information (such as code and data) and any interruption, suspension of or impact on business operations caused by the security assessment.

8. Prior to the security assessment, you should make yourself fully familiar with and observe the provisions of applicable laws and regulations with respect to the relevant tasks, conduct the security assessment in compliance with laws and regulations and observe all requirements under these Guidelines. If you are in breach of any provisions of these Guidelines, laws and regulations and Tencent service agreements, etc., you shall solely take all responsibilities for such breach and be liable to indemnify any third parties such as Tencent Cloud or other Tencent Cloud users against any losses suffered by them arising therefrom. Further, you understand and agree that the consent given to you by Tencent Cloud with respect to the conducting of the stress test and any other security assessments does not indicate that you will be exempt from all liabilities in connection with the stress test and any other security assessments. If a security incident occurs due to your failure to perform the stress test pursuant to the stress test proposal during the test or the third parties such as Tencent Cloud and other Tencent Cloud users are affected by the securities assessments, you shall still be required to take all responsibilities in respect thereof and be liable to indemnify any third parties such as Tencent Cloud and other Tencent Cloud users against any losses suffered by them as a result thereof. Please be mindful that there are regulations in many jurisdictions that make it an offence to engage in certain computer or electronic activities that may compromise security or lead to unlawful access to information. This can include actions perceived to be pre-emptive of computer crimes, such as scanning third party systems. Therefore, you must ensure that any security assessments or penetration tests are conducted only where it is lawful and with any necessary consents from customers.

Notification Policy

최종 업데이트 날짜: : 2021-06-29 16:26:16

Tencent Cloud has adopted the following general policy toward copyright infringement in accordance with the Digital Millennium Copyright Act (<https://www.copyright.gov/legislation/dmca.pdf>) ("DMCA").

Procedure for Reporting Copyright Infringement

Tencent Cloud responds to copyright notifications submitted in accordance with the DMCA. Section 512 of the DMCA outlines the statutory requirements necessary for formally reporting copyright infringement, as well as providing instructions on how an affected party can appeal a removal by submitting a counter-notice.

If you believe that material or content residing on or accessible through Tencent Cloud infringes a copyright, please send a notice of copyright infringement containing the following information to the Designated Agent to Receive Notification of Claimed Infringement ("Designated Agent") at the address listed below:

1. A physical or electronic signature of a person authorized to act on behalf of the owner of the copyright that has been allegedly infringed.
2. Identification of works or materials being infringed; this includes, at a minimum and if applicable, the URL or IP address of the link shown on the site where such material may be found, as well as the reference or link to the material or activity that you claim to be infringing, that is to be removed or access to which is to be disabled, and information reasonably sufficient to permit us to locate that reference or link, including at a minimum, if applicable, the URL or IP address of the link shown on the site where such reference or link may be found.
3. Contact information about the notifier including address, telephone number and, if available, e-mail address.
4. A statement that the notifier has a good faith belief that the material is not authorized by the copyright owner, its agent, or the law; include this statement in the body of the notice:

“I hereby state that I have a good faith belief that the disputed use of the copyrighted material or reference or link to such material is not authorized by the copyright owner, its agent, or the law (e.g., as a fair use).”

5. A statement made under penalty of perjury that the information provided is accurate and the notifying party is authorized to make the complaint on behalf of the copyright owner; include this statement in the body of the notice:

“I hereby state that the information in this notice is accurate and, under penalty of perjury, that I am the owner, or authorized to act on behalf of the owner, of the copyright or of an exclusive right under the copyright that is allegedly infringed.”

Please contact the Designated Agent at cloud_complaint@tencent.com, with a copy to copyrightnotice@tencent.com, or at:

Tencent Cloud

Attention: Legal Department (Copyright Notification)

2747 Park Blvd.

Palo Alto, CA 94306

In addition to the requirements listed above, it may be helpful to include additional information to allow us to identify the work that you claim has been infringed (e.g., a screenshot or copy of the work or the allegedly infringing material). The more details you include in your notification, the easier it will be for Tencent Cloud to respond to your notice.

Consequences of Sending A DMCA Notice

Tencent Cloud will review your notice for accuracy, validity, and completeness. If we find that it satisfies these requirements, we may take appropriate measures consistent with the DMCA. This includes acting expeditiously to forward the notice to the user associated with the allegedly infringing material and removing or disabling access to the allegedly infringing material. If the person who posted the material believes that the notice is incorrect or that they have the right to use the material at issue, they may send a counter-notice under Section 512(g)(3) of the DMCA. If we receive a counter-notice, we will forward it to you and it is up to you to take further legal action. If you do not respond to a valid counter-notice within 10 business days, we may repost or reinstate access to the material.

Please carefully consider any submission of a notice, particularly if you are unsure whether you own (or are lawfully authorized to use) the relevant material. Under 17 U.S.C. § 512(f), you may be liable for any damages, including costs and attorneys' fees incurred by us or our users, if you knowingly materially misrepresent that material or activity is infringing. So before you send a DMCA notice, make sure that you are the actual copyright holder (or are authorized to act on behalf of the owner), that you have a good-faith belief that the material you are identifying is actually infringing (e.g., that it is not a fair use), and that you understand the repercussions of submitting a false claim.

Procedure for Submitting a Counter-Notice

If you are a user who posted allegedly infringing material and who received notification to that effect from Tencent Cloud, you may elect to send us a counter-notice if you dispute the claim of infringement. Your counter-notice must include the following information:

1. A physical or electronic signature from you or a person authorized to act on your behalf.
2. Identification of the disputed material and the location at which the disputed material appears or appeared before it was removed or access to it was disabled.
3. A statement under penalty of perjury that you have a good faith belief that the material was removed, disabled, or identified as infringing as a result of mistake or misidentification.

4. Your contact information, including your name, address, and telephone number, and a statement that you consent to the jurisdiction of Federal District Court for the judicial district in which the address is located, or if your address is outside of the United States, for any judicial district in which Tencent Cloud may be found, and that you will accept service of process from the person who provided the initial copyright notification or an agent of such person.

Such written notice should be sent to our Designated Agent at cloud_complaint@tencent.com, with a copy to copyrightnotice@tencent.com, or at:

Tencent Cloud

Attention: Legal Department (Copyright Notification)

Palo Alto, CA 94306

[Repeat Infringer Policy](#).

Consistent with the requirements of the DMCA and in appropriate circumstances, Tencent Cloud will promptly terminate the accounts of subscribers who repeatedly infringe the copyrights of others.

1.3 Tencent may amend the SLA in accordance with the Agreement.

1.4 If there are any discrepancies between this General Service Level Agreement and the relevant Service specific Service Level Agreement(s), the relevant Service specific Service Level Agreement(s) shall apply.

1.5 In this General Service Level Agreement:

Please carefully read and fully understand each and every provision hereof, and the provisions restricting or releasing certain liabilities, or otherwise related to your material rights and interests, are in bold font or underlined or otherwise brought to your special attention.

Please do not purchase the Service unless and until you have fully read, and completely understood and accepted all the terms hereof. By clicking “Agree”/ “Next”, or by purchasing or using the Service, or by otherwise accepting this Agreement, whether express or implied, you are deemed to have read, and agreed to be bound by, this Agreement. This Agreement shall then have legal effect on both you and Tencent Cloud, constituting a binding legal document on both parties.

1. Terms and Definitions

1.1 Cloud Virtual Machine (CVM)

CVM means computing capabilities that can be scaled up in the cloud provided to you by Tencent Cloud, which saves you from resource projection and upfront investment required in using traditional servers. For details, please refer to the Service you purchase, and the contents of the Service provided by Tencent Cloud.

1.2 Single Instance

Single Instance means one (1) CVM instance, i.e., the unit CVM.

1.3 Total Time of a Single Instance in a Service Month

Total Time of a Single Instance in a Service Month = the total number of days of the Service Month for such Single Instance × 24 (hours) × 60 (minutes).

1.4 Instance Unavailability

When a CVM instance with incoming and outgoing permission rules properly configured fails to communicate with an IP address, neither incoming nor outgoing, via TCP or UDP protocol, and such failure lasts for more than one (1) minute, it will be deemed that the CVM instance is unavailable within such one (1) minute.

1.5 Single Instance Service Downtime Calculated in Minutes

Single Instance Single Service Downtime Calculated in Minutes = the time Instance Unavailability is fixed – the time Instance Unavailability starts. The Single Instance Single Service Downtime is calculated in minutes. (If the operational failure is fixed within one (1) minute, i.e., the Instance Unavailability lasts for less than one (1) minute, such downtime will not be counted.) A period that is longer than one (1) minute but shorter than two (2) minutes will be counted as two (2) minutes. For example, if the Single Instance Single Service Downtime is one (1) minute and one (1) second, the Single Instance Single Service Downtime Calculated in Minutes would be two (2) minutes.

The Single Instance Service Downtime Calculated in Minutes is the total of Single Instance Single Service Downtime Calculated in Minutes of such instance in a Service Month.

1.6 Instance Unavailability Across Availability Zones in A Single Region

If the user deploys CVM instances in at least two (2) availability zones in the same region (referred to as “**Across Availability Zones in A Single Region**” herein), when all CVM instances in any availability zone in such region become unavailable and certain CVM instance(s) in other availability zone(s) in such region also becomes unavailable, such unavailability of CVM instance(s) in other availability zone(s) in such region will be deemed as Instance Unavailability Across Availability Zones in A Single Region. For example, if the user deploys CVM instances in both Availability Zone A and Availability Zone B in the same region, when certain CVM instance in Availability Zone A becomes unavailable and all CVM instances in Availability Zone B become unavailable, the unavailability of instance in Availability Zone A will be deemed as Instance Unavailability Across Availability Zones in A Single Region.

1.7 Service Downtime Across Availability Zones in A Single Region Calculated in Minutes

Single Service Downtime Across Availability Zones in A Single Region Calculated in Minutes = the time Instance Unavailability Across Availability Zones in A Single Region is fixed – the time Instance Unavailability Across Availability Zones in A Single Region starts. The Single Service Downtime Across Availability Zones in A Single Region is calculated in minutes. (If the operational failure is fixed within one (1) minute, i.e., the Instance Unavailability Across Availability Zones in A Single Region lasts for less than one (1) minute, such downtime will not be counted.) A period that is longer than one (1) minute but shorter than two (2) minutes will be counted as two (2) minutes. For example, if the Single Service Downtime Across Availability Zones in A Single Region is one (1) minute and one (1) second, the Single Service Downtime Across Availability Zones in A Single Region would be two (2) minutes.

The Service Downtime Across Availability Zones in A Single Region Calculated in Minutes is the total of Single Service Downtime Across Availability Zones in A Single Region Calculated in Minutes of such instance in a Service Month.

1.8 Service Month(s)

Service Month(s) means the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The availability of the Service will be calculated separately for each Service Month.

1.9 Monthly Service Fee

Monthly Service Fee means the aggregate service fees paid by you for a Single Instance in one (1) Service Month, excluding the portion paid yet to be consumed, and the portion deducted by a voucher or promotional coupon, due to discounted service fee or otherwise deducted.

2. Service Availability

2.1 Calculation of Service Availability

Tencent Cloud guarantees two levels of Service Availability for a CVM instance, the **Single Instance Service Availability** and the **Service Availability Across Availability Zones in A Single Region**. Both the Single Instance Service Availability and the Service Availability Across Availability Zones in A Single Region are calculated on the basis of a **single instance**.

(1) Single Instance Service Availability:

Single Instance Service Availability = (Total Minutes of a Single Instance in a Service Month - Single Instance Service Downtime Calculated in Minutes) / Total Minutes of a Single Instance in a Service Month × 100%

(2) Service Availability Across Availability Zones in A Single Region:

Service Availability Across Availability Zones in A Single Region = (Total Minutes of a Single Instance in a Service Month - Service Downtime Across Availability Zones in A Single Region Calculated in Minutes of the Single Instance) / Total Minutes of a Single Instance in a Service Month × 100%

2.2 Service Availability

(1) The Single Instance Service Availability of the Service provided by Tencent Cloud will be **no less than 99.975%**.

You are entitled to the compensation as set forth in Section 3 below if the Service Availability fails to meet the aforementioned standard, other than in any circumstance as provided for in the release of liabilities provisions below. Assuming that a Service Month has thirty (30) days, the total available time of a Single Instance in such month shall be 30 (days) × 24 (hours) × 60 (minutes) × 99.975% = 43189.2 minutes; that is, the Service Downtime of the instance in such month will be 43200 - 43189.2 = 10.8 minutes.

(2) The Service Availability Across Availability Zones in A Single Region of the Service provided by Tencent Cloud will be **no less than 99.995%**. You are entitled to the compensation as set forth in Section 3 below if the Service Availability fails to meet the aforementioned standard, other than in any circumstance as provided for in the release of liabilities provisions below. Assuming that a Service Month has thirty (30) days, the total available time of a Single

Instance in such month shall be $30 \text{ (days)} \times 24 \text{ (hours)} \times 60 \text{ (minutes)} \times 99.995\% = 43197.84$ minutes; that is, the Service Downtime Across Availability Zones in A Single Region in such month will be $43200 - 43197.84 = 2.16$ minutes.

3. Service Compensation

In respect of this Service, if the Service Availability fails to meet the abovementioned standard, you will be entitled to compensations in accordance with the following terms:

3.1 Standards of Compensation

(1) Compensations will be made **in the form of voucher** by Tencent Cloud, and you should follow the rules for using the voucher (including the valid term; for details, please refer to the rules of vouchers published on Tencent Cloud's official website). You cannot use the voucher to purchase other services of Tencent Cloud, nor should you give the voucher to a third party for consideration or for free.

(2) If the **Single Instance Service Availability** in a Service Month fails to meet the standard, the amount of compensation will be calculated for such month independently, and **the aggregate amount shall be no more than the applicable Monthly Service Fee paid by you for such month.**

Single Instance Service Availability in a Service Month	Value of Compensation Voucher
$\geq 99\%$ and $< 99.975\%$	10% of the Monthly Service Fee
$\geq 95\%$ and $< 99\%$	25% of the Monthly Service Fee
$< 95\%$	100% of the Monthly Service Fee

(3) If the **Service Availability Across Availability Zones in A Single Region** in a Service Month fails to meet the standard, the amount of compensation will be calculated for such month independently, and **the aggregate amount shall be no more than the applicable Monthly Service Fee paid by you for such month.**

Service Availability Across Availability Zones in A Single Region in a Service Month	Value of Compensation Voucher
$\geq 99\%$ and $< 99.995\%$	10% of the Monthly Service Fee
$\geq 95\%$ and $< 99\%$	25% of the Monthly Service Fee
$< 95\%$	100% of the Monthly Service Fee

(4) If a CVM instance is eligible to compensations according to standards set forth in both Articles 3.1(2) and 3.1(3), whichever is higher shall be applied.

3.2 Time Limit for Compensation Application

(1) If the Single Instance Service Availability or the Service Availability Across Availability Zones in A Single Region in a Service Month fails to meet the abovementioned Service Availability standard, you may apply for compensation **through (and only through) the support ticket system under your relevant account** after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, **both parties agree that the back-end record of Tencent Cloud will prevail.**

(2) **You should apply for such compensation no later than sixty (60) calendar days following the expiry of the applicable Service Month in which the Service Availability fails to meet the standard.** If you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

You are entitled to the compensation as set forth in Section 3 (Service Compensation) below if the Service Availability fails to meet the aforementioned standard, other than in any circumstance as provided for in the release of liabilities provisions below.

If a Service Month has thirty (30) days, the total available time of Service in such month would be 30 (days) × 24 (hours) × 60 (minutes) × 99.95% = 43178.4 minutes; that is, the Service downtime in such month will be 43200 -- 43178.4 = 21.6 minutes.

Service Availability (Av) for a Service Month	Value of Compensation Voucher
99.95% > Av ≥ 99%	10% of the Monthly Service Fee
99% > Av ≥ 95%	25% of the Monthly Service Fee
95% > Av	100% of the Monthly Service Fee

This Agreement contains, among others, the terms and definitions of the Service, Service availability and Service uptime metrics, compensation plan and release of liabilities. Please carefully read and fully understand each and every provision hereof, and the provisions restricting or releasing certain liabilities, or otherwise related to your material rights and interests, may be in bold font or underlined or otherwise brought to your special attention.

Please do not purchase or use the Service unless and until you have fully read, and completely understood and accepted all the terms hereof. By clicking "Agree"/ "Next", or by purchasing or using the Service, or by otherwise accepting this Agreement, whether express or implied, you are deemed to have read, and agreed to be bound by, this Agreement. This Agreement shall then have legal effect on both you and Tencent Cloud, constituting a binding legal document on both parties.

1. Terms and Definitions

1.1 Message Queue TDMQ: Message Queue TDMQ (Tencent Distributed Message Queue, TDMQ), based on the Apache Pulsar project, is a Tencent Cloud–developed highly reliable distributed cloud message queue. Due to the separated structure of computing and storage, Message Queue TDMQ has good flexibility and malfunction recovery ability, and its open protocol interface supports compatibility with many popular message queues except Pulsar in a plug-in manner.

1.2 Service Month(s): means the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The availability of the Service will be calculated independently for each Service Month.

1.3 Total Time within a Service Month in Minutes: equals to the total number of days of the Service Month × 24 (hours) × 60 (minutes).

1.4 Service Downtime in Minutes: Service Downtime Calculated in Minutes = the time when the Service Unavailability is fixed - the time when the Service Unavailability starts. Service downtime means the time commencing from the malfunction until the recovery of Service, including any unscheduled maintenance time. Service Unavailability that lasts for more than five (5) minute will be counted in the Service downtime. However, when the Service

Unavailability is fixed within five (5) minute, which means that the actual downtime of the Service is less than five (5) minute, such downtime will not be counted in the Service downtime defined herein.

1.5 Monthly Service Fee: means the aggregate service fees paid by you for a Message Queue TDMQ service under certain Tencent Cloud account within one (1) Service Month, excluding the portion paid yet to be consumed, and the portion deducted by a voucher or promotional voucher, due to discounted service fee or otherwise deducted.

2. Service Availability

2.1 Calculation of Service Availability

Service Availability = (Total Time within a Service Month in Minutes - Service Downtime within a Service Month in Minutes) / Total Time within a Service Month in Minutes × 100%

2.2 Service Availability

The Service Availability of the Service provided by Tencent Cloud will be no less than 99.95%. You are entitled to the compensation as set forth in Section 3 (Service Compensation) below if the Service Availability fails to meet the aforementioned standard, other than in any circumstance as provided for in the release of liabilities provisions below.

If a Service Month has thirty (30) days, the total available time of Service in such month would be 30 (days) × 24 (hours) × 60 (minutes) × 99.95% = 43178.4 minutes; that is, the Service downtime in such month will be 43200 -- 43178.4 = 21.6 minutes.

3. Service Compensation

In respect of this Service, if the Service Availability fails to meet the abovementioned standard, you will be entitled to compensations in accordance with the following terms:

3.1 Standards of Compensation

(1) Compensations will be made **in the form of voucher** by Tencent Cloud, and you should follow the rules for using the voucher (including the valid term; for details, please refer to the rules of vouchers published on Tencent Cloud's official website). You cannot use the voucher to purchase other services of Tencent Cloud, nor should you give the voucher to a third party for consideration or for free.

(2) If the Service Availability for a Service Month fails to meet the standard, the amount of compensation will be calculated for such month independently, and **the aggregate amount shall be no more than the applicable**

Monthly Service Fee paid by you for such month (the Monthly Service Fee referred to herein shall exclude the portion deducted by a voucher or promotional credit, due to discounted service fee or otherwise deducted).

Service Availability (Av) for a Service Month	Value of Compensation Voucher
99.95% > Av ≥ 99%	10% of the Monthly Service Fee
99% > Av ≥ 95%	25% of the Monthly Service Fee
95% > Av	100% of the Monthly Service Fee

3.2 Time Limit for Compensation Application

(1) If the Service Availability for a Service Month fails to meet the abovementioned Service Availability standard, you may apply for compensation **through (and only through) the support ticket system under your relevant account** after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, **both parties agree that the back-end record of Tencent Cloud will prevail.**

(2) **You should apply for such compensation no later than sixty (60) calendar days following the expiry of the applicable Service Month in which the Service Availability fails to meet the standard.** If you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

4. Release of Liabilities

If the Service is unavailable due to any of the following reasons, the corresponding Service downtime shall not be counted towards Service unavailability period, and is not eligible for compensation by Tencent Cloud, and Tencent Cloud will not be held liable to you:

4.1 any failure of the Service to meet the availability standard due to reaching or exceeding the limit of the scale of the single business instance purchased by you.

4.10 any circumstances in which Tencent Cloud will be exempted or released from its liabilities (for compensation or otherwise) according to relevant laws, regulations, agreements or rules, or any terms of service, rules or guidelines published by Tencent Cloud separately.

5. Miscellaneous

5.1 You understand that Tencent Cloud cannot warrant that the Service is error free; however Tencent Cloud will endeavor to continuously improve the quality and level of its services. As such, you hereby agree that Tencent will not be deemed to have breached this Agreement in case of any error of the Service, as long as such error is unavoidable in the context of the then existing technologies in the industry. You agree to cooperate with Tencent to resolve aforementioned error.

5.2 The parties hereto acknowledge and agree that, for any losses incurred by you during the course of using the Service due to any breach by Tencent Cloud, the aggregate compensation amount payable by Tencent Cloud shall under no circumstance exceed the total service fees you have paid for the relevant Service which is not performed.

This Agreement contains, *among others*, the terms and definitions of the Service, Service availability and Service uptime metrics, compensation plan and release of liabilities. Please carefully read and fully understand each and every provision hereof, and the provisions restricting or releasing certain liabilities, or otherwise related to your material rights and interests, may be in bold font or underlined or otherwise brought to your special attention.

Please do not purchase or use the Service unless and until you have fully read, and completely understood and accepted all the terms hereof. By clicking "Agree"/ "Next", or by purchasing or using the Service, or by otherwise accepting this Agreement, whether express or implied, you are deemed to have read, and agreed to be bound by, this Agreement. This Agreement shall then have legal effect on both you and Tencent Cloud, constituting a binding legal document on both parties.

1. Terms and Definitions

1.1 Cloud Kafka (CKafka): means a distributed, high-throughput, highly scalable messaging system that is compatible with open-source Apache Kafka API (version 0.9 and version 0.10). Based on the publish/subscribe model, CKafka enables async interaction between the message producer and consumer by decoupling the messages and thereby eliminating wait time. CKafka supports data compression and offline and real-time data processing, making it ideal for collection of compressed logs and aggregation of monitoring data.

1.2 Single Instance: means one (1) CKafka instance. The Service Availability will be calculated on a Single Instance basis.

1.3 Total Time of a Single Instance within a Service Month: equals to the total number of days of the Service Month × 24 (hours) × 60 (minutes).

1.4 Instance Unavailability: When a CKafka instance with incoming and outgoing permission rules properly configured fails to communicate with an IP address, neither incoming nor outgoing, and such failure lasts for more than five (5) minutes, it will be deemed that the CKafka instance is unavailable within such five (5) minutes.

1.5 Single Instance Service Downtime Calculated in Minutes: Single Instance Service Downtime Calculated in Minutes = the time when the Instance Unavailability is fixed -- the time when the Instance Unavailability starts. Service downtime means the time period starting from the malfunction to the recovery to normal use, including the time period for maintenance. It will not be counted in the Service downtime unless and until the malfunction of the Service lasts for at least five (5) minutes; when the Instance Unavailability is fixed within five (5) minutes, which means that the actual downtime of the Service is less than five (5) minutes, such downtime will not be counted in the Service downtime defined herein.

1.6 Service Month(s): means the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The availability of the Service will be calculated independently for each Service Month.

1.7 Monthly Service Fee: means the aggregate service fees paid by you in cash for a Single CKafka Instance within one (1) Service Month, excluding the portion paid yet to be consumed, and the portion deducted by a voucher or promotional credits, due to discounted service fee or otherwise deducted.

2. Service Availability

2.1 Calculation of Service Availability

Service Availability = (total time of a Single Instance within a Service Month calculated in minutes - Single Instance Service Downtime Calculated in Minutes) / total time of a Single Instance within a Service Month calculated in minutes × 100%

2.2 Service Availability Standard**

The Service Availability of the Service provided by Tencent Cloud will be no less than 99.95%. You are entitled to the compensation as set forth in Section 3 (*Service Compensation*) below if the Service Availability fails to meet the aforementioned standard, other than in any circumstance as provided for in the release of liabilities provisions below.

Assuming that the Total Time of a Single Instance within a Service Month is $30 \times 24 \times 60 \times 99.95\% = 43178.4$ minutes, the Service downtime of the instance in such month will be $43200 - 43178.4 = 21.6$ minutes.

Note:

The standard above applies only to the availability of the components of the Service per se; for the service availability of the other relevant Tencent Cloud services, such as COS, EMR and Oceanus, please refer to their respective service level agreement.

None of the additional functionality provided by the Service, including without limitation storing messages via COS, is covered by Service Availability guarantee herein.

The data in the Service is delivered asynchronously, which means, *among others*, that the Service cannot guarantee 100% storage of the data under the circumstance of multiple server malfunction, and therefore, in order to ensure the security of the data, you should make replicas of your instances and be responsible for backing up your data.

3. Service Compensation

In respect of this Service, if the Service Availability fails to meet the abovementioned standard, you will be entitled to compensations in accordance with the following terms:

3.1 Standards of Compensation

(1) Compensations will be made **in the form of voucher** by Tencent Cloud, and you should follow the rules for using the voucher (including the valid term; for details, please refer to the rules of vouchers published on Tencent Cloud's official website). You cannot redeem such voucher for cash or request to issue an invoice for such voucher. Such voucher can only be used to purchase the Service by using your Tencent Cloud account. You cannot use the voucher to purchase other services of Tencent Cloud, nor should you give the voucher to a third party for consideration or for free.

(2) If the Service Availability for a Service Month fails to meet the standard, the amount of compensation will be calculated for such month independently, and **the aggregate amount shall be no more than the applicable Monthly Service Fee paid by you for such month** (the Monthly Service Fee referred to herein shall exclude the portion deducted by a voucher or promotional credits, due to discounted service fee or otherwise deducted).

Service Availability (Av) for a Service Month	Value of Compensation Voucher
$99.95\% > Av \geq 99\%$	10% of the Monthly Service Fee
$99\% > Av \geq 95\%$	25% of the Monthly Service Fee

Service Availability (Av) for a Service Month	Value of Compensation Voucher
95% > Av	100% of the Monthly Service Fee

3.2 Time Limit for Compensation Application

(1) If the Service Availability for a Service Month fails to meet the abovementioned Service Availability standard, you may apply for compensation **through (and only through) the support ticket system under your relevant account** after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, **both parties agree that the back-end record of Tencent Cloud will prevail.**

(2) **You should apply for such compensation no later than sixty (60) calendar days following the expiry of the applicable Service Month in which the Service Availability fails to meet the standard.** If you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

4. Release of Liabilities

If the Service is unavailable due to any of the following reasons, the corresponding Service downtime shall not be counted towards Service unavailability period, and is not eligible for compensation by Tencent Cloud, and Tencent Cloud will not be held liable to you:

4.1 any failure of the Service to meet the availability standard due to reaching or exceeding the limit of the scale of the single business instance purchased by you.

4.2 any Service unavailability or failure of the Service to meet the availability standard due to any reason not attributable to Tencent Cloud.

4.3 any circumstances in which Tencent Cloud will be exempted or released from its liabilities (for compensation or otherwise) according to relevant laws, regulations, agreements or rules, or any terms of service, rules or guidelines published by Tencent Cloud separately.

4.4 any system maintenance with prior notice by Tencent Cloud to you, including system cutover, maintenance, upgrade and malfunction simulation test.

4.5 any defects of data flow or management flow resulting from open source community.

4.6 any attack on your application endpoint or data, or any other mal-operation.

4.7 any failure of you to abide by user guide or suggestions for using Tencent Cloud products.

5. Miscellaneous

5.1 You understand that Tencent Cloud cannot warrant that the Service is error free; however Tencent Cloud will endeavor to continuously improve the quality and level of its services. As such, you hereby agree that Tencent will not be deemed to have breached this Agreement in case of any error of the Service, as long as such error is unavoidable in the context of the then existing technologies in the industry. You agree to cooperate with Tencent to resolve aforementioned error.

5.2 The parties hereto acknowledge and agree that, for any losses incurred by you during the course of using the Service due to any breach by Tencent Cloud, the aggregate compensation amount payable by Tencent Cloud shall under no circumstance exceed the total service fees you have paid for the relevant Service which is not performed.

5.3 Tencent Cloud has the right to amend the terms of this Agreement as appropriate or necessary in light of changes in due course. You may review the most updated version of relevant Agreement terms on the official website of Tencent Cloud. If you disagree with such revisions made by Tencent Cloud to this Agreement, you have the right to cease using the Service; by continuing to use the Service, you shall be deemed to have accepted the Agreement as amended.

5.4 As an ancillary agreement to the Tencent Cloud Service Agreement, this Agreement is of the same legal effect as the Tencent Cloud Service Agreement. In respect of any matter not agreed herein, you shall comply with relevant terms under the Tencent Cloud Service Agreement. In case of any conflict or discrepancy between this Agreement and the Tencent Cloud Service Agreement, this Agreement prevails to the extent of such conflict or discrepancy. (End of Document)

1.5 Service Downtime Calculated in Minutes

Service Downtime Calculated in Minutes = the time the Service Unavailability is fixed – the time the Service Unavailability starts. Service Downtime refers to the time from the start of a service failure to the time the services are back to normal.

If the duration of a service failure exceeds 5 minutes, such duration would be counted as Service Downtime Calculated in Minutes. If the duration of a service failure is less than 5 minutes (i.e., the duration of the instance unavailability does not exceed 5 minutes), such duration wouldn't be counted as Service Downtime Calculated in Minutes.

1.6 Service Downtime Calculated in Minutes within Service Month(s)

Refers to the sum of Service Downtime Calculated in Minutes generated by the client in a Service Month for a certain Tencent Cloud account.

1.7 Monthly Service Fee

The Monthly Service Fee refers to the accumulated cash service fee you pay for the Service of a certain Tencent Cloud account within a Service Month, excluding the portion that has been purchased but not consumed yet, and the fees deducted with vouchers, coupons, service fee reductions, etc.

2. Service Availability

2.1 Calculation of Service Availability

Service Availability = (Total Number of Minutes within a Service Month - Service Downtime Calculated in Minutes within such Service Month) / Total Number of Minutes within such Service Month × 100%.

2.2 Service Availability Standard

The Service Availability for the Service **shall be no less than 99.95%** (“Service Availability Standard”). If the Service fails to meet the Service Availability Standard (except under circumstances as set forth in the Disclaimer of Liabilities), you may claim compensation in accordance with Article 3 of this Agreement (Compensation Plan).

Assuming that the Total Number of Minutes within a Service Month is 43,200 minutes ($=30 \times 24 \times 60$), the Service Downtime Calculated in Minutes within such Service Month will be less than 21.6 minutes ($=43,200 - 43,200 \times 99.95\%$).

3. Compensation Plan

In respect of the Service, if the Service fails to meet the Service Availability Standard, you will be entitled to compensations in accordance with the following terms:

3.1 Standards of Compensation

(1) Compensations will be made **in the form of voucher** by Tencent Cloud, and after receiving the voucher, you should use the voucher by abiding the voucher usage rules (including usage period, etc., subject to the voucher usage rules published on Tencent Cloud official website). Such voucher cannot be converted into cash, and no invoice will be issued with respect thereof. The voucher may only be used to purchase the Service by using your Tencent Cloud account, and you cannot use the voucher to purchase other services of Tencent Cloud, nor should you give the voucher to a third party for consideration or for free.

(2) If the Service Availability Standard is not met for any Service Month, **the amount of compensation will be calculated for each such Service Month independently, and the aggregate amount shall be no more than the Monthly Service Fee you pay for the Service in the Service Month in which the Service Availability fails to meet the Service Availability Standard** (the Monthly Service Fee referred to herein shall exclude the portion deducted by vouchers, coupons, service fee reduction or exemption, etc.).

Service Availability in a Service Month	Value of Compensational Voucher
Less than 99.95% but is or higher than 99%	10% of the Monthly Service Fee
Less than 99% but is or higher than 95%	25% of the Monthly Service Fee
Less than 95%	100% of the Monthly Service Fee

3.2 Time Limit for Compensation Application

(1) If the Service Availability in a Service Month fails to meet the Service Availability standard, you may **apply for compensation only through the Tencent Cloud ticket system under your relevant account** after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, **both parties agree that the back-end record of Tencent Cloud shall prevail.**

(2) **You shall apply for compensation no later than the sixtieth (60th) calendar day following the end of the applicable Service Month in which the Service Availability fails to meet the abovementioned standard. If**

you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

4. Disclaimer of Liabilities

If the Service is unavailable or fails to meet the Service Availability Standard due to any of the following reasons, Tencent Cloud will not be held liable to you:

4.10 Any other circumstances in which Tencent Cloud will be exempted or released from its liabilities for compensation or otherwise according to relevant laws, regulations, agreements or rules, or any relevant term of services, rules or guidelines published by Tencent Cloud separately.

5. Miscellaneous

5.1 The parties hereto acknowledge and agree that, for any losses incurred by you for the use of the Service due to any breach by Tencent Cloud, the aggregate liability of Tencent Cloud shall under no circumstance exceed the total service fees you have paid for the relevant Service which fails to meet the Service Availability Standard. If you have used the Service for more than 12 months, the total aggregate liability of Tencent Cloud shall not exceed the total service fees you have paid to Tencent Cloud for the Service which fails to meet the Service Availability Standard in the 12 months immediately preceding the date that event giving rise to the liability first occurred.

Essential Storage Service

COS Service Level Agreement

최종 업데이트 날짜: : 2019-12-06 14:19:20

In order to use the Tencent Cloud Object Storage (“COS”) service (the “Service”), you should read and observe this Cloud Object Storage Service Level Agreement (this “Agreement”, or this “SLA”) and the [Tencent Cloud Service Agreement](#). This Agreement contains, among others, the terms and definitions of the Service, level indicators of the Service availability and success rate, compensation plan and release of liabilities. Please carefully read and fully understand each and every provision hereof, and the provisions restricting or releasing certain liabilities, or otherwise related to your material rights and interests, are in bold font or underlined or otherwise brought to your special attention.

Please do not purchase the Service unless and until you have fully read, and completely understood and accepted all the terms hereof. By clicking “Agree”/ “Next”, or by purchasing or using the Service, or by otherwise accepting this Agreement, whether express or implied, you are deemed to have read, and agreed to be bound by, this Agreement. This Agreement shall then have legal effect on both you and Tencent Cloud, constituting a binding legal document on both parties.

1. Terms and Definitions

Cloud Object Storage (COS): Object storage means a storage service that enables a user to store massive amounts of data using a Web interface. A user may upload, download and manage data via the HTTP REST API of the COS. COS supports automatic expansion, and the payment for the Service may be made in advance or in arrears.

Service Month(s): Service Month(s) means the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The availability of the Service will be calculated independently for each Service Month.

Error Rate Per Five Minutes: Error Rate Per Five Minutes means the rate of the number of Failed Requests returned by COS within five (5) minutes to the total number of user requests within such five (5) minutes, calculated as follows:

$$\text{Error Rate Per Five Minutes} = \frac{\text{number of Failed Requests per five minutes}}{\text{total number of user requests per five minutes}} * 100\%$$

Failed Request: Failed Request means a request with a server internal error code (including “Internal Error” (500 error) and “Service Unavailable” (503 error)) returned by COS, excluding any traffic restriction request due to the triggering of frequency control and any Failed Request due to the upgrade, alteration or shutdown of COS. User request means a request sent by a user and received by a COS server, excluding that sent by a user whose identity has not been authenticated, whose authentication fails, or for whom the Service is suspended or terminated due to unpaid overdue payment. Any request received by a COS server in a hacker attack, or any request asynchronously executed on back end with the configuration of cross-regional replication or life cycle rules, will not be deemed an effective or a Failed Request.

COS Service Monthly Fee: COS Service Monthly Fee means the fee for storing capacity, flow, request, data retrieval and other storage management fee incurred under a certain Tencent Cloud account of a user within a calendar month for using the COS Service.

2. Service Availability

2.1 Calculation of Service Availability

The Service Availability of the COS is calculated by the category of storage as follows:

$$\text{Service Availability} = \left(1 - \frac{\text{the sum of all Error Rates Per Five Minutes within a Service Month}}{\text{the total number of unit time (i. e. five minutes) within a Service Month}} \right) * 100\%$$

2.2 Standards of Service Availability

You may upload, download and manage data via the API, SDK, control panel or user tools provided by the COS. In respect of different categories of storage, Tencent Cloud guarantees that **the Service Availability of the standard storage service will be no less than 99.95%**, and **the Service Availability of the low frequency storage will be no less than 99.9%**. If the Service Availability fails to meet aforementioned standard in a Service Month (other than circumstances set forth in the Release of Liabilities Section below), you may submit a support ticket to make an application to Tencent Cloud in accordance with Section 3 below.

3. Service Compensation

In respect of this Service, if the Service Availability of the standard storage service is lower than 99.95%, or the Service Availability of the low frequency storage is lower than 99.9%, compensations will be made as follows:

3.1 Standards of Compensation

1) Compensations will be made **in the form of coupon** by Tencent Cloud, and you should follow the rules for using the coupon (including the valid term; for details, please refer to the rules of coupons published on Tencent Cloud’s official website). You cannot redeem such coupon for cash or request to issue an invoice for such coupon. Such coupon can only be used to purchase the Service by using your Tencent Cloud account. You cannot use the coupon

to purchase other services of Tencent Cloud, nor should you give the coupon to a third party for consideration or for free.

2) If the Service Availability in a Service Month fails to meet the standard, the amount of compensation shall be calculated for such month independently, and **the aggregate amount will be no more than the applicable COS Service Monthly Fee paid by you for such month** (for the purpose of this provision, COS Service Monthly Fee shall exclude the portion deducted by a coupon or promotional voucher, due to discounted service fee or otherwise deducted).

Storage Category	Service Availability in a Service Month	Value of Compensation Coupon
Standard Storage	≥ 99% and < 99.95%	20% of the COS Service Monthly Fee
	< 99%	50% of the COS Service Monthly Fee
Low Frequency Storage	≥ 98% and < 99.9%	20% of the COS Service Monthly Fee
	< 98%	50% of the COS Service Monthly Fee

3.2 Time Limit for Compensation Application

1) If the Service Availability in a Service Month fails to meet the aforementioned Service Availability standard, you may apply for compensation **through (and only through) the support ticket system under your relevant account** after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, **both parties agree that the back-end record of Tencent Cloud will prevail.**

2) You should apply for such compensation no later than sixty (60) calendar days following the expiry of the Service Month in which the Service Availability fails to meet the standard. If you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

4. Release of Liabilities

If the Service is unavailable due to any of the following reasons, the corresponding Service unavailable time shall not be counted towards Service unavailability period, and is not eligible for compensation by Tencent Cloud, and Tencent Cloud will not be held liable to you:

4.1 any system maintenance or unavailability with at least seven (7) days prior notice from Tencent Cloud to users.

4.2 any failure due to any network, equipment or configuration that is not Tencent Cloud facility.

4.3 any failure of the application interface or data of a user due to attack or other misconducts.

4.4 any failure due to negligence in authorization or mal-operation by a user, or due to any equipment of user, or third-party software or device.

Tencent Cloud database system will automatically delete all your data fourteen (14) days following such expiry or termination.

With respect to database instances with payments to be settled on a post-pay basis (pay-per-use), Tencent Cloud will provide you with a 2-hour service period when any payment of your account is overdue and will then terminate the Service upon expiry of such 2-hour period. You should bear all cloud service fees (if any) incurred during such 2-hour period and should timely top up your account to ensure the balance remains more than RMB0. Tencent Cloud database system will automatically delete all your data when the balance of your account remains less than RMB0 for twenty-four (24) hours.

3. Service Compensation

3.1 Scope

If a user is not able to use Tencent Cloud database in a regular way or is completely unable to access the database due to any malfunction attributable to Tencent Cloud, the user has the right to require Tencent Cloud to compensate for such incident/malfunction. The application for such compensation must be submitted within three (3) months

following the month for which the availability of the underlying Tencent Cloud database instance fails to meet the relevant standard, and any application submitted thereafter will not be accepted by Tencent Cloud.

3.2 Standards for Compensation

Duration of malfunction = the time when the malfunction is fixed-- the time when the malfunction starts. The duration of malfunction will be calculated in minutes. Where the duration of malfunction, or an unrounded portion thereof, is less than 1 minute, it will be rounded up to 1 minute. For example, if the duration of malfunction is 1 minute and 1 second, it will be calculated as 2 minutes.

One hundred times compensation for Tencent Cloud database malfunction:

(1) Pre-pay: the compensation will be made by extending the use period of the failed database, extended time = duration of malfunction \times 100.

(2) Post-pay: the compensation will be made in the form of voucher, the amount of voucher = daily fee of the failed database / 24 / 60 \times duration of malfunction \times 100.

In order to use the Tencent Cloud Elastic Cache service (the "Service"), you should read and observe this Elastic Cache Service Level Agreement (this "Agreement", or this "SLA") and the [Tencent Cloud Service Agreement](#). This Agreement contains, *among others*, the terms and definitions of the Service, Service availability and Service uptime metrics, compensation plan and release of liabilities. Please carefully read and fully understand each and every provision hereof, and the provisions restricting or releasing certain liabilities, or otherwise related to your material rights and interests, may be in bold font or underlined or otherwise brought to your special attention.

Please do not purchase the Service unless and until you have fully read, and completely understood and accepted all the terms hereof. By clicking "Agree"/ "Next", or by purchasing or using the Service, or by otherwise accepting this Agreement, whether express or implied, you are deemed to have read, and agreed to be bound by, this Agreement. This Agreement shall then have legal effect on both you and Tencent Cloud, constituting a binding legal document on both parties.

1. Terms and Definitions

1.1 Tencent Cloud Elastic Cache Service

means the database service provided by Tencent Cloud used to satisfy your business needs in caching or other scenarios, which is compatible with the Redis protocols. For details, please refer to the Service you purchased, and the contents of the Service provided by Tencent Cloud.

1.2 Service Month(s)

means the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The availability of the Service will be calculated independently for each Service Month.

1.3 Service Unavailability

If all the attempted connections with a specific elastic cache instance fail, and such status lasts for more than one (1) minute, it will be deemed that this specific elastic cache instance is unavailable within such one (1) minute.

1.4 Single Instance Service Downtime Calculated in Minutes

Single Instance Service Downtime Calculated in Minutes = the time when the Service Unavailability of an instance is fixed - the time when the Service Unavailability of the instance starts. Such downtime will be

calculated in minutes, and when the downtime, or an unrounded portion thereof, is less than sixty (60) seconds, it will be rounded up to one (1) minute. For example, if the actual downtime of a single instance is one (1) minute and one (1) second, the Single Instance Service Downtime Calculated in Minutes would be two (2) minutes. However, when the Service Unavailability of an instance is fixed within one (1) minute, which means that the actual downtime of the instance is less than one (1) minute, such downtime will not be counted in the Service downtime defined herein.

1.5 Single Instance Service Downtime within a Service Month

means the sum of the Single Instance Service Downtime Calculated in Minutes within a Service Month.

1.6 Total Service Time within a Service Month

equals to the total number of days of the Service Month × 24 (hours) × 60 (minutes).

1.7 Monthly Service Fee

means the aggregate service fees paid by you for a single instance within one (1) Service Month, excluding the portion paid yet to be consumed, and the portion deducted by a voucher or promotional credits, due to discounted service fee or otherwise deducted.

2. Service Availability

2.1 Calculation of Service Availability

Service Availability is calculated on a single instance basis as follows:

Service Availability = (1 - Single Instance Service Downtime within a Service Month / Total Service Time within a Service Month of the single instance) × 100%

2.2 Service Availability Standard

The Service Availability of the Service provided by Tencent Cloud will be no less than 99.95%. You are entitled to the compensation as set forth in Section 3 below if the Service Availability fails to meet the aforementioned standard, other than in any circumstance as provided for in the release of liabilities provisions below.

3. Service Compensation

In respect of this Service, if the Service Availability fails to meet the abovementioned standard, you will be entitled to compensations in accordance with the following terms:

3.1 Standards of Compensation

(1) Compensations will be made **in the form of voucher** by Tencent Cloud, and you should follow the rules for using the voucher (including the valid term; for details, please refer to the rules of vouchers published on Tencent Cloud's

You cannot use the voucher to purchase other services of Tencent Cloud, nor should you give the voucher to a third party for consideration or for free.

(2) If the Service Availability for a Service Month fails to meet the standard, the amount of compensation will be calculated for such month independently, **and the aggregate amount shall be no more than the applicable Monthly Service Fee paid by you for such month** (the Monthly Service Fee referred to herein shall exclude the portion deducted by a voucher or promotional credits, due to discounted service fee or otherwise deducted).

Service Availability (Av) for a Service Month	Value of Compensation Voucher
$99.95\% > Av \geq 99\%$	10% of the Monthly Service Fee
$99\% > Av \geq 95\%$	30% of the Monthly Service Fee
$95\% > Av$	100% of the Monthly Service Fee

3.2 Time Limit for Compensation Application

(1) If the Service Availability for a Service Month fails to meet the abovementioned Service Availability standard, you may apply for compensation **through (and only through) the support ticket system under your relevant account** after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, **both parties agree that the back-end record of Tencent Cloud will prevail.**

(2) **You should apply for such compensation no later than sixty (60) calendar days following the expiry of the applicable Service Month in which the Service Availability fails to meet the standard.** If you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

2. Data Durability

Tencent Cloud guarantees that the monthly durability of data storage with respect to the instances applied for by a user within the service period (i.e., the service period of MongoDB purchased by the user) is 99.9996%. That is, for each 1,000,000 instances applied for by a user each month, only 4 instances are exposed to data loss.

3. Data Deletion

If a user voluntarily deletes the data or when the data needs to be deleted upon expiration of the service period for a user, Tencent Cloud will perform low level formatting of disks to completely and irrecoverably delete all data of the user prior to disposal or resale of the devices, and the disks will be demagnetized when they are discarded.

CLB Service Level Agreement

최종 업데이트 날짜: : 2019-10-10 17:59:54

In order to use the Tencent Cloud Load Balancer ("CLB") service (the "Service"), you should read and observe this Cloud Load Balancer Service Level Agreement (this "Agreement", or this "SLA") and the [Tencent Cloud Service Agreement](#). This Agreement contains, *among others*, the terms and definitions of the Service, Service availability and Service uptime metrics, compensation plan and release of liabilities. Please carefully read and fully understand each and every provision hereof, and the provisions restricting or releasing certain liabilities, or otherwise related to your material rights and interests, may be in bold font or underlined or otherwise brought to your special attention.

Please do not purchase the Service unless and until you have fully read, and completely understood and accepted all the terms hereof. By clicking "Agree"/ "Next", or by purchasing or using the Service, or by otherwise accepting this Agreement, whether express or implied, you are deemed to have read, and agreed to be bound by, this Agreement. This Agreement shall then have legal effect on both you and Tencent Cloud, constituting a binding legal document on both parties.

1. Terms and Definitions

1.1 Cloud Load Balancer (CLB): means a traffic distribution service provided by Tencent Cloud to expand the system's service capacity and to eliminate single node malfunction by load balancer. For details, please refer to the Service you purchase, and the contents of the Service provided by Tencent Cloud.

1.2 Single Instance: means one (1) CLB instance. The Service Availability will be calculated on a Single Instance basis.

1.3 Total Time of a Single Instance within a Service Month: equals to the total number of days of the Service Month × 24 (hours) × 60 (minutes).

1.4 Instance Unavailability: If all the attempted connection with a CLB instance with incoming and outgoing permission rules fails, and such status lasts for more than one (1) minute, it will be deemed that the CLB instance is unavailable within such one (1) minute.

1.5 Single Instance Service Downtime Calculated in Minutes: Single Instance Service Downtime Calculated in Minutes = the time when the Instance Unavailability is fixed -- the time when the Instance Unavailability starts. Such downtime will be calculated in minutes, and when the downtime, or a portion thereof, is less than sixty (60) seconds, it will be rounded up to one (1) minute. For example, if the actual downtime of a Single Instance is one (1) minute and one (1) second, the Single Instance Service Downtime Calculated in Minutes would be two (2) minutes. However,

when the Instance Unavailability is fixed within one (1) minute, which means that the actual downtime of the Service is less than one (1) minute, such downtime will not be counted in the Service downtime defined herein.

1.6 Single Instance Service Downtime within a Service Month: means the sum of the Single Instance Service Downtime Calculated in Minutes within a Service Month.

1.7 Service Month(s): means the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The availability of the Service will be calculated independently for each Service Month.

1.8. Monthly Service Fee: means the aggregate service fees paid by you for a Single CLB Instance within one (1) Service Month, excluding the portion paid yet to be consumed, and the portion deducted by a voucher or promotional voucher, due to discounted service fee or otherwise deducted.

2. Service Availability

2.1 Calculation of Service Availability

Service Availability = (total time of a Single Instance within a Service Month calculated in minutes - Single Instance Service Downtime within a Service Month) / total time of a Single Instance within a Service Month calculated in minutes × 100%

2.2 Service Availability

The Service Availability of the Service provided by Tencent Cloud will be no less than 99.95%. You are entitled to the compensation as set forth in Section 3 below if the Service Availability fails to meet the aforementioned standard, other than in any circumstance as provided for in the release of liabilities provisions below.

If a Service Month has thirty (30) days, the total available time of a Single Instance in such month would be 30 (days) × 24 (hours) × 60 (minutes) × 99.95% = 43178.4 minutes; that is, the Service downtime of the instance in such month will be 43200 -- 43178.4 = 21.6 minutes.

3. Service Compensation

In respect of this Service, if the Service Availability fails to meet the abovementioned standard, you will be entitled to compensations in accordance with the following terms:

3.1 Standards of Compensation

(1) Compensations will be made **in the form of voucher** by Tencent Cloud, and you should follow the rules for using the voucher (including the valid term; for details, please refer to the rules of vouchers published on Tencent Cloud's official website). You cannot redeem such voucher for cash or request to issue an invoice for such voucher. Such voucher can only be used to purchase the Service by using your Tencent Cloud account. You cannot use the voucher to purchase other services of Tencent Cloud, nor should you give the voucher to a third party for consideration or for free.

(2) If the Service Availability for a Service Month fails to meet the standard, the amount of compensation will be calculated for such month independently, and **the aggregate amount shall be no more than the applicable Monthly Service Fee paid by you for such month** (the Monthly Service Fee referred to herein shall exclude the portion deducted by a voucher or promotional credit, due to discounted service fee or otherwise deducted).

Service Availability (Av) for a Service Month	Value of Compensation Voucher
99.95% > Av ≥ 99%	10% of the Monthly Service Fee
99% > Av ≥ 95%	25% of the Monthly Service Fee
95% > Av	100% of the Monthly Service Fee

3.2 Time Limit for Compensation Application

(1) If the Service Availability for a Service Month fails to meet the abovementioned Service Availability standard, you may apply for compensation **through (and only through) the support ticket system under your relevant account** after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. This Agreement contains, *among others*, the terms and definitions of the Service, Service availability, compensation plan and release of liabilities. Please carefully read and fully understand each and every provision hereof, and the provisions restricting or releasing certain liabilities, or otherwise related to your material rights and interests, may be in bold font or underlined or otherwise brought to your special attention.

Please do not purchase or use the Service unless and until you have fully read, and completely understood and accepted all the terms hereof. By clicking "Agree"/ "Next", or by purchasing or using the Service, or by otherwise accepting this Agreement, whether express or implied, you are deemed to have read, and agreed to be bound by, this Agreement. This Agreement shall then have legal effect on both you and Tencent Cloud, constituting a binding legal document on both parties.

1. Terms and Definitions

1.1 Tencent Cloud NAT Gateway Service: is a network cloud service that supports IP address translation and enables high-performance Internet access for resources in Tencent Cloud. For details, please refer to the Service purchase by you and the contents of the Service provided by Tencent Cloud.

1.2 Total Time within a Service Month Calculated in Minutes: equals to the total number of days of the Service Month for NAT instances × 24 (hours) × 60 (minutes).

1.3 Service Unavailability: When all incoming and outgoing data packets of NAT Gateway instances within one minute have been discarded by the NAT Gateway (subject to the monitoring data of Tencent Cloud), it shall be deemed that the Service is unavailable for such NAT instance within such one minute.

1.4. Service Downtime Calculated in Minutes: With respect to a NAT Gateway instance, Service Downtime Calculated in Minutes = the time when the Service Unavailability is fixed -- the time when the Service Unavailability starts. Such downtime will be calculated in minutes, and when the downtime, or an unrounded portion thereof, is less than sixty (60) seconds, it will be rounded up to one (1) minute. For example, if the actual downtime of a NAT Gateway instance is one (1) minute and one (1) second, the Service Downtime Calculated in Minutes of such instance would be two (2) minutes. However, when the Service Unavailability is fixed within one (1) minute, which means that the actual downtime of the Service is less than one (1) minute, such downtime will not be counted in the Service downtime defined herein.

1.5 Service Month(s): means the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The availability of the Service will be calculated independently for each Service Month.

1.6 Monthly Service Fee: means the aggregate service fees paid by you for a single NAT Gateway instance within one (1) calendar month, excluding the portion deducted by a voucher or promotional credit, due to discounted service fee or otherwise deducted.

2. Service Availability

2.1 Calculation of Service Availability

Service Availability is calculated for each Service Month with respect to each instance as follows:

Service Availability = (Total Time within a Service Month Calculated in Minutes – Service Downtime Calculated in Minutes) / Total Time within a Service Month Calculated in Minutes * 100%

2.2 Standard of Service Availability

**The Service Availability of the Service will be no less than 99.99%. You are entitled to the compensation as set forth in Section 3 below if the Service Availability fails to meet the aforementioned standard, other than in any circumstance as provided for in the release of liabilities provisions below. **

3. Service Compensation

You cannot use the couponvoucher to purchase other services of Tencent Cloud, nor should you give the couponvoucher to a third party for consideration or for free.

(2) If the Service Availability for a Service Month fails to meet the standard, the amount of compensation will be calculated for such month independently, and the aggregate amount shall be no more than the applicable Monthly

Service Fee paid by you for such month (the Monthly Service Fee referred to herein shall exclude the portion deducted by a couponvoucher or promotional couponvoucher, due to discounted service fee or otherwise deducted).

Service Availability (Av) for a Service Month	Value of Compensation CouponVoucher
99.99% > Av ≥ 99.95%	10% of the Monthly Service Fee
99.95% > Av ≥ 99.50%	25% of the Monthly Service Fee
99.50% > Av	100% of the Monthly Service Fee

3.2 Time Limit for Compensation Application

(1) If the Service Availability for a Service Month fails to meet the abovementioned Service Availability standard, you may apply for compensation through (and only through) the support ticket system under your relevant account after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. **If there is any dispute over the calculation of the Service Availability for a Service Month, both parties agree that the back-end record of Tencent Cloud will prevail.**

(2) **You should apply for such compensation no later than sixty (60) calendar days following the expiry of the applicable Service Month in which the Service Availability fails to meet the standard.** If you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

Peer Connection SLA

최종 업데이트 날짜: : 2019-05-10 15:30:54

1. Tencent Cloud Peering Connection Service

Tencent Cloud Peering Connection is a cloud-resource interconnection service featuring large bandwidth and high quality, allowing you to connect resource communication links on Tencent Cloud, details of which shall be subject to the introduction on the official website of Tencent Cloud.

2. Guaranteed Indicators of Service

Tencent Cloud sets up the service level indicators for the service purchased by you, and has the right to adjust certain indicators in response to the change of situations in due course.

2.1 Service Availability

Service Availability of Peering Connection is calculated based on each Service Period from the perspective of a single instance as follows:

Service Availability = ((Total Time of a Service Period Calculated in Minutes – Service Downtime Calculated in Minutes) / Total Time of a Service Period Calculated in Minutes) * 100%

Peering Connection availability at the level of Platinum, Gold and Silver is set forth in the chart below. You are entitled to the compensation set forth in Section 3 hereunder if the guaranteed availability is not met.

QOS	Service Availability
Platinum	99.95% (0.36 h)
Gold	99.50% (3.6 h)
Silver	99.00% (7.2 h)

Relevant Explanations:

- Service Period: One calendar month will be counted as one service period.
- Total Time of a Service Period Calculated in Minutes: the number of days of the Service Period × 24 (hours) × 60 (minutes).

- **Service Downtime Calculated in Minutes:** When all the continuous attempted communication made by a client within one minute via designated Peering Connection fail, the Peering Connection instance service during such one minute shall be deemed unavailable. The sum of the unavailable minutes of the Peering Connection instance during a Service Period shall be the service downtime calculated in minutes for such Service Period. The guaranteed Service Availability indicator requires Peering Connection packet loss rate data, of which the original data shall be subject to Network Detection & Tencent Cloud backend monitoring data. Please enable the Network Detection service.
- **Monthly Service Fee:** the total service fee paid by a client in one calendar month for a single Peering Connection instance.
- The service downtime due to any of the following reasons is not eligible for compensation:
 - any system maintenance with prior notice by Tencent Cloud to a client, including system cutover, maintenance, upgrade and failure simulation test;
 - any failure or configuration adjustment of network or equipment that is not Tencent Cloud facility;
 - any hacker attack targeting the application or data information of a client;
 - any improper route configuration of a client;
 - any loss or leak of any data, pin or password due to improper maintenance or improper confidentiality measures of a client;
 - any upgrade of the operation system by a client on its own;
 - any application of a client or the installation;
 - any negligence of a client or any operation authorized by a client;
 - any force majeure event or accident;
 - any other reason not attributable to Tencent Cloud.

2.2 Privacy of Service

Clients may control and segregate external access by configuring access authentication settings in accordance with actual needs to ensure data privacy.

2.3 Review of Service

In accordance with the current laws and regulations, and provided that procedure and formality requirements are fully satisfied, Tencent Cloud may provide certain information (including operation log of key components, operation records of operation and maintenance personnel, operation records of the client, etc.) of the Peering Connection service, due to the need to cooperate with the supervision by the governmental supervisory authority or security evidence collection and investigation or otherwise.

3. Service Compensation

3.1 Scope of Compensation

Compensation is applicable when the guaranteed Service Availability of Peering Connection for a client is not met by the end of a month due to malfunction of Tencent Cloud.

3.2 Standards and Principles of Compensation

The compensation amount shall be calculated according to the standards set forth in the chart below based on monthly Service Availability of a single Peering Connection instance. The compensation will be made in the form of coupon only, and the total amount of the compensation shall not exceed the Monthly Service Fee (excluding the portion deductible by the coupon) paid by the client for such Peering Connection instance for such month of which the guaranteed Service Availability is not met.

QOS	Service Availability	Compensation Ratio
Platinum	99.95% > Av ≥ 99.00%	10%
	99.00% > Av ≥ 98.00%	25%
	98.00% > Av	100%
Gold	99.50% > Av ≥ 99.00%	10%
	99.00% > Av ≥ 95.00%	25%
	95.00% > Av	100%
Silver	99.00% > Av ≥ 98.00%	10%
	98.00% > Av ≥ 95.00%	25%
	95.00% > Av	100%

3.3 Application for Compensation

- If a client believes that Tencent Cloud fails to meet certain guaranteed service indicator set forth under the service level agreement (SLA), the client shall notify the customer manager in writing / by e-mail within twenty (20) business days following the occurrence of such failure.
- Upon verification and confirmation by Tencent Cloud of such failure to meet the indicator under the SLA, Tencent Cloud shall make corresponding compensation to the client according to the terms of the SLA.
- The coupon of an amount equivalent to the confirmed deductible fee will be accounted to the client during the following billing circle.

4. Miscellaneous

Tencent Cloud shall have the right to amend any provision of this SLA in response to the change of situations in due course, and such amendment will be concurrently published on the official website.

VPN Connection Service Level Agreement

In order to use the Tencent Cloud VPN Connection service (the "Service"), you should read and observe this VPN Connection Service Level Agreement (this "Agreement", or this "SLA") and the [Tencent Cloud Service Agreement](#). This Agreement contains, *among others*, the terms and definitions of the Service, Service availability, compensation plan and release of liabilities. Unless otherwise stipulated, this Agreement does not apply to instances and functions of closed beta testing of VPN gateway. Please carefully read and fully understand each and every provision hereof, and the provisions restricting or releasing certain liabilities, or otherwise related to your material rights and interests, may be in bold font or underlined or otherwise brought to your special attention.

Please do not purchase or use the Service unless and until you have fully read, and completely understood and accepted all the terms hereof. By clicking "Agree"/ "Next", or by purchasing or using the Service, or by otherwise accepting this Agreement, whether express or implied, you are deemed to have read, and agreed to be bound by, this Agreement. This Agreement shall then have legal effect on both you and Tencent Cloud, constituting a binding legal document on both parties.

1. Terms and Definitions

- 1. Tencent Cloud VPN Connection:** means a network-based tunneling technology provided by Tencent Cloud to you that enables data transfer between customer's local internet data centers and Tencent Cloud resources. For details, please refer to the Service you purchase, and the contents of the Service provided by Tencent Cloud.
- 2. Single VPN Gateway Instance:** means one (1) VPN gateway instance. The Service Availability will be calculated on a Single VPN Gateway Instance basis.
- 3. Service Month(s) of a Single VPN Gateway Instance:** means the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The availability of the Service will be calculated independently for each Service Month.
- 4. Total Time of a Single VPN Gateway Instance within a Service Month:** the total number of days of the Service Month × 24 (hours) × 60 (minutes).

5. **Single VPN Gateway Instance Service Downtime Calculated in Minutes:** If (and only if) all your continuous attempts to connect a specific Single VPN Gateway Instance fail within one (1) minute, it shall be deemed that the Service with respect to such instance is unavailable within such one (1) minute. If the continuous attempts that have failed last less than one (1) minute, such period will not be counted into the Service downtime. The accumulated Service downtime so calculated in minutes of a Single VPN Gateway Instance within a Service Month is the Single VPN Gateway Instance Service Downtime for such Service Month.
6. **Monthly Service Fee:** means the aggregate service fees paid by you for a Single VPN Gateway Instance within one (1) Service Month, excluding the portion paid yet to be consumed, and the portion deducted by a voucher or promotional coupon, due to discounted service fee or otherwise deducted.

2. Service Availability

2.1 Calculation of Service Availability

Service Availability = (Total Time of a Single VPN Gateway Instance within a Service Month - Single VPN Gateway Instance Service Downtime Calculated in Minutes) / Total Time of a Single VPN Gateway Instance within a Service Month × 100%

2.2 Service Availability Standard

The Service Availability of the Service will be no less than 99.95%. You are entitled to the compensation as set forth in Section 3 below if the Service Availability fails to meet the aforementioned standard, other than in any circumstance as provided for in the release of liabilities provisions below.

Assuming that a Service Month has thirty (30) days, the total available time of a Single VPN Gateway Instance in such month would be 30 (days) × 24 (hours) × 60 (minutes) × 99.95% = 43,178.4 minutes; that is, the Service downtime of the instance in such month will be 43,200 – 43,178.4 = 21.6 minutes.

3. Service Compensation

In respect of this Service, if the Service Availability fails to meet the abovementioned standard, you will be entitled to compensations in accordance with the following terms:

3.1 Standards of Compensation

(1) Compensations will be made **in the form of voucher** by Tencent Cloud, and you should follow the rules for using the voucher (including the valid term; for details, please refer to the rules of vouchers published on Tencent Cloud's official website). You cannot redeem such voucher for cash or request to issue an invoice for such voucher. Such voucher can only be used to purchase the Service by using your Tencent Cloud account. You cannot use the voucher to purchase other services of Tencent Cloud, nor should you give the voucher to a third party for consideration or for

free.

(2) If the Service Availability for a Service Month fails to meet the standard, the amount of compensation will be calculated for such month independently, and **the aggregate amount shall be no more than the applicable Monthly Service Fee paid by you for such month** (the Monthly Service Fee referred to herein shall exclude the portion deducted by a voucher or promotional coupon, due to discounted service fee or otherwise deducted).

Service Availability (Av) for a Service Month	Value of Compensation Voucher
99.95% > Av ≥ 99%	10% of the Monthly Service Fee
99% > Av ≥ 95%	25% of the Monthly Service Fee
95% > Av	100% of the Monthly Service Fee

3.2 Time Limit for Compensation Application

(1) If the Service Availability for a Service Month fails to meet the abovementioned Service Availability standard, you may apply for compensation **through (and only through) the support ticket system under your relevant account** after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, **both parties agree that the back-end record of Tencent Cloud will prevail.**

(2) **You should apply for such compensation no later than sixty (60) calendar days following the expiry of the applicable Service Month in which the Service Availability fails to meet the standard.** If you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

4. Release of Liabilities

If the Service is unavailable due to any of the following reasons, the corresponding Service downtime shall not be counted towards Service unavailability period, and is not eligible for compensation by Tencent Cloud, and Tencent Cloud will not be held liable to you:

- 4.1 any system maintenance with prior notice by Tencent Cloud to you, including system cutover, maintenance, upgrade and malfunction simulation test;
- 4.2 any malfunction or configuration adjustment of any network or equipment that is not Tencent Cloud facility;
- 4.3 any disconnection with the VPN tunnel due to any of your configuration errors;

1.2. **Service Unavailable:** When all attempted communications made by you within one minute via accelerated connection fail within the accelerated connection for reasons attributable to Tencent Cloud (i.e., the packet loss rate is 100% within such one minute for such accelerated connection, which data shall be subject to monitoring data of Tencent Cloud), the accelerated connection service during such one minute shall be deemed unavailable.

CDN Service Level Agreement(New Version)

최종 업데이트 날짜: : 2019-12-31 17:20:55

In order to use the Tencent Cloud Content Delivery Network ("CDN") service (the "Service"), you should read and observe this Content Delivery Network Service Level Agreement (this "Agreement", or this "SLA") and the [Tencent Cloud Service Agreement](#). This Agreement contains, among others, the terms and definitions of the Service, Service availability and Service uptime metrics, compensation plan and release of liabilities. Please carefully read and fully understand each and every provision hereof, and the provisions restricting or releasing certain liabilities, or otherwise related to your material rights and interests, may be in bold font or underlined or otherwise brought to your special attention.

Please do not purchase the Service unless and until you have fully read, and completely understood and accepted all the terms hereof. By clicking "Agree"/ "Next", or by purchasing or using the Service, or by otherwise accepting this Agreement, whether express or implied, you are deemed to have read, and agreed to be bound by, this Agreement. This Agreement shall then have legal effect on both you and Tencent Cloud, constituting a binding legal document on both parties.

1. Terms and Definitions

Content Delivery Network (CDN): means the network architecture provided by Tencent Cloud that delivers contents on clients' websites to a huge number of cache nodes worldwide, which enables end users to get access to contents from the closest node, thus improving user experience.

Service Month(s): means the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, the first Service Month will be from March 17 to March 31, and each calendar month thereafter (e.g., from April 1 to April 30) will be a Service Month. The availability of the Service will be calculated independently for each Service Month. **Regional Monthly Service Fee for a Single Accelerated Domain:** will be calculated for each Service Month by allocating the regional monthly service fee pro rata to the actual consumption of the single accelerated domain, which actual consumption shall be calculated based on the regions activated by you.

Aggregate Monthly Service Fee for a Single Accelerated Domain: means the sum of the monthly service fee of such accelerated domain in all Service regions within a Service Month.

Unit Time: For measuring the Service, each 5 minutes will be deemed as one measurement unit, resulting in 288 measurement points each day. The measurement point of 00:00:00 represents the time slot from 00:00:00 to 00:04:59, and the rest can be deduced by analogy.

Error Rate within Unit Time: means the percentage of the number of failed requests returned within one Unit Time in relation to a single accelerated domain due to any reason attributable to Tencent Cloud out of the total number of

requests within such Unit Time, in which failed requests refer to requests with return status code 5xx or connection timeout. Error Rate within Unit Time = the number of failed requests within one Unit Time / the total number of requests within such Unit Time. The Error Rate within Unit Time will be calculated independently based on the number of accelerated domains metrics involved in the Service purchased by you.

Service Downtime within a Service Month Calculated in Minutes: When the Error Rate within Unit Time of a single accelerated domain is over 0.05%, it will be deemed that anomaly occurs within such Unit Time; when such anomaly occurs twice in a row, such two Unit Time (i.e. ten minutes) will be counted into Service downtime. Unless such anomaly occurs at least twice in a row, no single Unit Time with anomaly occurring will be counted into Service downtime. Service Downtime within a Service Month Calculated in Minutes will be the sum of such Unit Time counted into Service downtime within the Service Month.

Total Time of a Service Month Calculated in Minutes: the number of days of such Service Month × 24 (hour) × 60 (minute).

2. Service Availability / Service Uptime Metrics

2.1 Calculation of Service Availability / Service Metrics

Service Availability = $1 - (\text{Service Downtime within a Service Month Calculated in Minutes} / \text{Total Time of the Service within a Service Month Calculated in Minutes}) \times 100\%$

The Service Availability will be calculated independently for each accelerated domain involved in the Service you use.

2.2 Standard of Service Availability / Service Metrics

The Service Availability for each accelerated domain involved in the Service will be no less than 99.9%.

You are entitled to the compensation as set forth in Section 3 below if the Service Availability fails to meet the aforementioned standard, other than in any circumstance as provided for in the release of liabilities provisions below.

3. Service Compensation

3.1 Standards of Compensation

(1) Compensations will be made **in the form of voucher** by Tencent Cloud, and you should follow the rules for using the voucher (including the valid term; for details, please refer to the rules of vouchers published on Tencent Cloud's official website). You cannot redeem such voucher for cash or request to issue an invoice for such voucher. Such voucher can only be used to purchase the Service by using your Tencent Cloud account. You cannot use the voucher

to purchase other services of Tencent Cloud, nor should you give the voucher to a third party for consideration or for free.

(2) CDN provides services to multiple domains simultaneously, and compensations will be made only to the domains of which the global Service Availability fails to meet the standard within a Service Month. The amount of compensation will be calculated for each such month independently, and **the aggregate amount shall be no more than the aggregate monthly service fee for domains of which the Service Availability fails to meet the standard** (such monthly service fee shall exclude the portion deducted by a voucher or promotional credit or due to discounted service fee or otherwise deducted).

Service Availability (Av) for a Service Month	Value of Compensation Voucher
99.9% > Av ≥ 99.0%	10% of the aggregate monthly service fee for domains of which the Service Availability fails to meet the standard
99.0% > Av ≥ 95.0%	25% of the aggregate monthly service fee for domains of which the Service Availability fails to meet the standard
95.0% > Av	50% of the aggregate monthly service fee for domains of which the Service Availability fails to meet the standard

3.2 Time Limit for Compensation Application

(1) If the Service Availability for a Service Month fails to meet the abovementioned Service Availability standard, you may apply for compensation **through (and only through) the support ticket system under your relevant account** after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, **both parties agree that the back-end record of Tencent Cloud will prevail.**

(2) **You should apply for such compensation no later than sixty (60) calendar days following the expiry of the applicable Service Month in which the Service Availability fails to meet the standard.** If you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

5. Miscellaneous

- 5.1 The parties hereto acknowledge and agree that, for any losses incurred by you during the course of using the Service due to any breach by Tencent Cloud, the aggregate compensation amount payable by Tencent Cloud shall under no circumstance exceed the total service fees you have paid for the relevant Service which is not performed.
- 5.2 Tencent Cloud has the right to amend the terms of this Agreement as appropriate or necessary in light of changes in due course. This Agreement contains, among others, the terms and definitions of the Service, indicators of the Service availability, compensation plan and release of liabilities. Please carefully read and fully understand each and every provision hereof, and the provisions restricting or releasing certain liabilities, or otherwise related to your material rights and interests, may be in bold font or underlined or otherwise brought to your special attention.

Please do not purchase the Service unless and until you have fully read, and completely understood and accepted all the terms hereof. By clicking "Agree"/ "Next", or by purchasing or using the Service, or by otherwise accepting this Agreement, whether express or implied, you are deemed to have read, and agreed to be bound by, this Agreement. This Agreement shall then have legal effect on both you and Tencent Cloud, constituting a binding legal document on both parties.

1. Terms and Definitions

1.1 Real-Time Communication (TRTC) Service: the comprehensive real-time audio and video solutions, including without limitation audio communication, video communication, video retouching, relayed live streaming, video recording, and mixing and transcoding, which provide a complete set of functions such as WebRTC support, terminal SDK integration and back-end interface. For details, please refer to the Service purchased by you and the content of the Service provided by Tencent Cloud.

1.2 Service Month: the respective calendar month(s) within the service period for the Service you purchased. For example, if you purchase the Service for a three-month period and the Service is activated on March 17, there are four Service Months (i.e., the first Service Month is from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The availability of the Service will be calculated independently for each Service Month.

1.3 Monthly Service Fee: the aggregate service fees for the Service actually you consumed within one Service Month. If you make a one-time purchase of multiple pre-paid service packages, the Monthly Service Fee will be

subject to the actual consumption during the then current Service Month, and the portion yet to be consumed will be excluded.

1.4 Communication Success Rate: Your request for entering a room is deemed as a request for initiating communication, and once you make such a request, it will be counted as one request. Once you enter a room, it will be deemed that the communication is successful.

Communication Success Rate = (number of successful communications / total number of communication requests) × 100%

1.5 Service Downtime Calculated in Minutes: If the Communication Success Rate is lower than 99% within one unit time (each 5 minutes as one calculation time unit) due to any reason attributable to Tencent Cloud, it shall be deemed that the Service is unavailable within such unit time; when such situation lasts for five (5) minutes or more, such time shall be counted into the service downtime, while any such situation that lasts less than five (5) minutes will not be counted into the service downtime.

Note :

5 minutes will be deemed as one measurement unit, resulting in 288 measurement points each day. The measurement point of 00:00:00 represents the time slot from 00:00:00 to 00:04:59, and the rest can be deduced by analogy.

1.6 Total Time within a Service Month Calculated in Minutes: the total number of days within such Service Month × 24 (hours) × 60 (minutes).

2. Service Availability

2.1 Calculation of Service Availability

Service Availability = (1 -- Service Downtime within a Service Period Calculated in Minutes / Total Time within a Service Period Calculated in Minutes) × 100%

For example, assuming that the Communication Success Rate from 10:00 a.m. to 10:30 a.m. on a certain day in March 2019 is 98% (i.e., the Communication Success Rate is lower than 99% and the situation lasts for more than five (5) minutes), the Service Downtime Calculated in Minutes would be 30 minutes, and the Service Availability of March 2019 is 99.93% (i.e., $1 - (30 / 31 \times 24 \times 60) \times 100\%$).

2.2 Service Standard Indicator

The Service Availability of the Service provided by Tencent Cloud will be no less than 99.9%. You are entitled to the compensation as set forth in Section 3 below if the Service Availability fails to meet the aforementioned standard,

other than in any circumstance as provided for in the release of liabilities provisions below.

3. Service Compensation

In respect of this Service, if the Service Availability fails to meet the abovementioned standard, you will be entitled to compensations in accordance with the following terms:

You cannot use the voucher to purchase other services of Tencent Cloud, nor should you give the voucher to a third party for consideration or for free.

(2) If the Service Availability of a Service Month fails to meet the standard, the amount of compensation will be calculated for such month independently, and the aggregate amount shall be no more than the applicable Monthly Service Fee paid by you for such month (the Monthly Service Fee referred to herein shall exclude the portion deducted by a voucher or promotional credit, due to discounted service fee or otherwise deducted).

Service Availability	Value of Voucher
≥ 99.5% and < 99.9%	10% of the Monthly Service Fee
≥99% and < 99.5%	20% of the Monthly Service Fee
< 99%	50% of the Monthly Service Fee

3.2 Time Limit for Compensation Application

(1) If the Service Availability of a Service Month fails to meet the abovementioned Service Availability standard, you may apply for compensation through (and only through) the support ticket system under your relevant account after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, both parties agree that the back-end record of Tencent Cloud will prevail.

(2) You should apply for such compensation no later than sixty (60) calendar days following the expiry of the applicable Service Month in which the Service Availability fails to meet the standard. If you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

The parties hereto acknowledge and agree that, for any losses incurred by you during the course of using the Service due to any breach by Tencent Cloud, the aggregate compensation amount payable by Tencent Cloud shall under no circumstance exceed the total service fees you have paid for the relevant Service which is not performed.**

1.5 Service Downtime within a Service Period Calculated in Minutes: If the Failure Rate of Video Playing within each Unit of Time of the Cloud Streaming Services service is more than 0.4%, it shall be deemed that the Service is unavailable within such Unit of Time. If such situation lasts for ten (10) minutes or more, such time period shall be counted into the Service downtime. 1.3 Service Unavailability: If the Error Rate of the Service is higher than 0.5% (exclusive) within one unit time (each five (5) minutes as one calculation time unit), it shall be deemed that the Service is unavailable within such unit time; when such situation lasts for ten (10) minutes or more, such time shall be counted into the Service Downtime, while any such situation that lasts less than ten (10) minutes will not be counted into the Service Downtime. The Service Downtime is calculated based on the Error Rate on the server end.

For example, assuming that the number of total requests for MPS made by user A within five (5) minutes is 10,000, during which period there's no Service malfunction and the number of "5xx" errors returned is 100, then the Error Rate would be calculated as follows: $(100 + 0)/10000 = 1\%$, *i.e.*, higher than 0.5%, and such five (5) minutes will be counted towards the Service Downtime.

1.4 Service Downtime: means the aggregate time of Service Unavailability calculated in minutes within a Service Month.

1.5 Service Month(s): means the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The availability of the Service will be calculated independently for each Service Month.

1.6 Significant Impromptu Increase of Business Scale: The Service is not subject to any transcoding limitation, and is scalable on a dynamic basis to meet your actual business needs; *provided, however*, that you should notify Tencent Cloud at least three (3) business days in advance in writing in case of any significant impromptu increase of business scale, otherwise the availability of the Service may be affected. Tencent Cloud does not make any guarantee to the availability of the Service in case of any significant impromptu increase of business scale that you fail to so notify Tencent Cloud, nor will Tencent Cloud be liable for any impact on the availability of the Service thereof.

Impromptu Increase Metrics:

- transcoding: the output of transcoding expected to increase by more than 100,000 minutes/day.
- video moderation: the volume of video moderation expected to increase by more than 40,000 minutes/day.
- content identification: the volume of content identification expected to increase by more than 40,000 minutes/day.

2. Service Availability/ Service Uptime Metrics

2.1 Calculation of Service Availability

Service Availability = $(1 - \text{Service Downtime} / \text{total time within a Service Month}) \times 100\%$

2.2 Standard of Service Availability/ Service Metrics

The Service Availability of the Service provided by Tencent Cloud will be no less than 99.70%. You are entitled to the compensation as set forth in Section 3 below if the Service Availability fails to meet the aforementioned standard, other than in any circumstance as provided for in the release of liabilities provisions below.

3. Service Compensation

In respect of this Service, if the Service Availability fails to meet the abovementioned standard, you will be entitled to compensations in accordance with the following terms:

3.1 Standards of Compensation

(1) Compensations will be made **in the form of voucher** by Tencent Cloud, and you should follow the rules for using the voucher (including the valid term; for details, please refer to the rules of vouchers published on Tencent Cloud's official website). You cannot redeem such voucher for cash or request to issue an invoice for such voucher. Such voucher can only be used to purchase the Service (Tencent Cloud Media Processing Service) by using your Tencent Cloud account. You cannot use the voucher to purchase other services of Tencent Cloud, nor should you give the voucher to a third party for consideration or for free.

(2) If the Service Availability for a Service Month fails to meet the standard, the amount of compensation will be calculated for such month independently, and **the aggregate amount shall be no more than the applicable monthly service fee paid by you for such month** (the monthly Service fee referred to herein shall exclude the fee deducted by a voucher or promotional coupon, Service fee discounted or waived, or fees otherwise deductible).

Service Availability (Av) for a Service Month	Value of Compensation Voucher
99.70% > Av ≥ 99%	10% of the monthly service fee for the applicable month
99% > Av ≥ 95%	25% of the monthly service fee for the applicable month
95% > Av	50% of the monthly service fee for the applicable month

3.2 Time Limit for Compensation Application

(1) If the Service Availability for a Service Month fails to meet the abovementioned Service Availability standard, you may apply for compensation **through (and only through) the support ticket system under your relevant account** after the third (3rd) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, **both parties agree that the back-end record of Tencent Cloud will prevail.**

(2) **You should apply for such compensation no later than sixty (60) calendar days following the expiry of the applicable Service Month in which the Service Availability fails to meet the standard.** If you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

3.3 Application Materials for Compensation

If you believe that the Service fails to meet the Service Availability standards specified hereunder, you may submit the compensation application within the period set forth under this SLA. Your compensation application shall be submitted along with at least the following documents:

- (1) the appid of the account for which the Service is unavailable.
- (2) the duration of the Service Unavailability and other relevant evidence thereof.

4. Release of Liabilities

If the Service is unavailable due to any of the following reasons, the corresponding Service downtime shall not be counted towards Service Unavailability period, and is not eligible for compensation by Tencent Cloud, and Tencent Cloud will not be held liable to you:

- 4.1 any system maintenance with prior notice by Tencent Cloud to you, including system cutover, maintenance, upgrade and malfunction simulation test;
- 4.2 any malfunction or configuration adjustment of any network or equipment that is not Tencent Cloud facility;
- 4.3 any attack on any of your application endpoints or data, or any other mal-operation;

- 4.10 any other circumstances in which Tencent Cloud will be exempted or released from its liabilities (for compensation or otherwise) according to relevant laws, regulations, agreements or rules, or any rules or guidelines published by Tencent Cloud separately;
- 4.11 Tencent Cloud provides you with the Service only, and shall under no circumstance be liable for any violation of any law, regulation or government policy, or any infringement upon any right or interest of any third party, by any video provided by you.

5. Miscellaneous

5.1 The parties hereto acknowledge and agree that, for any losses incurred by you during the course of using the Service due to any breach by Tencent Cloud, the aggregate compensation amount payable by Tencent Cloud shall under no circumstance exceed the total service fees you have paid for the relevant Service which is not performed.

5.2 Tencent Cloud has the right to amend the terms of this Agreement as appropriate or necessary in light of changes in due course, and will announce such amendment via a notice on its website, an email notice or a text message notice. You may review the most updated version of relevant Agreement terms on the official website of Tencent Cloud. If you disagree with such revisions made by Tencent Cloud to this Agreement, you have the right to cease using the Service; by continuing to use the Service, you shall be deemed to have accepted the Agreement as amended, and no additional consent is required from you therefor.

CAR Service Level Agreement

최종 업데이트 날짜: : 2022-09-16 16:01:27

In order to use the Tencent Cloud Cloud Application Rendering Service (the “Service”), you shall read and comply with this Tencent Cloud Cloud Application Rendering Service Level Agreement (this “Agreement”, or this “SLA”) and the Tencent Cloud Service Agreement. This Agreement contains, among others, the terms and definitions of the Service, Service Availability and Service Uptime Metrics, compensation plan and disclaimer of liabilities. Please carefully read and fully understand each and every provision hereof, and the provisions restricting or disclaiming certain liabilities, or otherwise related to your material rights and interests, are in bold font or underlined or otherwise brought to your special attention.

Please do not purchase the Service unless and until you have fully read, and completely understood and accepted all the terms hereof. By clicking “Agree”/ “Next”, or by purchasing or using the Service, or by otherwise accepting this Agreement, whether express or implied, you are deemed to have read, and agreed to be bound by, this Agreement. This Agreement shall then have legal effect on both you and Tencent Cloud, constituting a binding legal document on both parties. For the purposes of these Terms of Service, “Tencent Cloud” refers to the applicable Tencent entity as set forth in the Tencent Cloud Service Agreement.

1. Terms and Definitions

1.1 Cloud Application Rendering, CAR

Refers to the real-time rendering of your application, software, platform and any related contents deployed on the Cloud Application Rendering concurrency, where “concurrency” means a collection of a series of virtual computing resources, including CPU, bandwidth, disk, GPU, etc. The real-time rendering operation is completed on the server-side of Cloud Application Rendering concurrency, and Tencent Cloud will encode the rendered results into audio and video streams for transmission to the user's device through the network, and the device transmits the user's operation information to the cloud server and the application for real-time interaction.

1.2 CAR Concurrent Packet(s)

If you purchase n CAR Concurrent Packets, it means the Service will contain n cloud application rendering concurrency. The Service Availability (as defined below) is calculated by CAR Concurrent Packets.

1.3 Total Number of Minutes within Service Month(s)

Total Number of Minutes within Service Month(s) = the total number of days of the Service Month(s) × 24 (hours) × 60 (minutes).

1.4 Service Unavailability

When the Service is in a non-maintenance state, but the access to the Service with any IP address in both directions (outgoing/incoming) by UDP protocol fails, and such downtime lasts for more than one minute, the Service is deemed as unavailable (“Service Unavailability”) within such minute.

1.5 Service Downtime Calculated in Minutes

Service Downtime Calculated in Minutes = the time the Service Unavailability is fixed – the time the Service Unavailability starts.

The service downtime is calculated in minutes. If the service failure is back to normal within one minute, i.e., if the duration of Service Unavailability of the CAR Concurrent Packet does not exceed one minute, such duration is not counted as Service Downtime Calculated in Minutes. If the duration of Service Unavailability is longer than one minute but less than two minutes, Service Downtime Calculated in Minutes in such duration would be one minute. For example, if the service downtime lasts for one minute and one second, the Service Downtime Calculated in Minutes would be one minute.

1.6 Service Month(s)

Service Month(s) refers to the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The Service Availability will be calculated separately for each Service Month.

1.7 Monthly Service Fee

The Monthly Service Fee refers to the accumulated service fee you pay for the Service within a Service Month, excluding the portion that has been purchased but not consumed yet, and the fees deducted with vouchers, coupons, service fee reductions, etc.

2. Service Availability

2.1 Calculation of Service Availability

Service Availability = (Total Number of Minutes within a Service Month - Service Downtime Calculated in Minutes) / Total Number of Minutes within a Service Month × 100%.

2.2 Service Availability Standard

The Service Availability for the Service shall be no less than 99% (“Service Availability Standard”). If the Service fails to meet the Service Availability Standard (except under circumstances as set forth in the Disclaimer of Liabilities), you may claim compensation in accordance with Section 3 of this Agreement.

Assuming that a month contains 30 days, the Total Number of Minutes within such Service Month is 43,200 minutes (=30 days × 24 hours × 60 minutes), the available time shall be no less than 42,768 minutes (=30 days × 24 hours × 60 minutes × 99%), which means the Service Downtime Calculated in Minutes shall be less than 432 minutes (=43,200 – 42,768).

3. Compensation Plan

In respect of the Service, if the Service fails to meet the Service Availability Standard, you will be entitled to compensations in accordance with the following terms:

3.1 Standards of Compensation

(1) Compensations will be made in the form of voucher by Tencent Cloud, and you should use the voucher by abiding the voucher usage rules (including usage period, etc., subject to the voucher usage rules published on Tencent Cloud official website). Such voucher cannot be converted into cash, and no invoice will be issued with respect thereof. The voucher may only be used to purchase the Service by using your Tencent Cloud account, and you cannot use the voucher to purchase other services of Tencent Cloud, nor should you give the voucher to a third party for consideration or for free.

(2) If the Service Availability Standard is not met for any Service Month, the amount of compensation will be calculated for each such Service Month independently, and the aggregate amount shall be no more than the Monthly Service Fee you pay for the Service in the Service Month in which the Service Availability fails to meet the Service Availability Standard (the Monthly Service Fee referred to herein shall exclude the portion deducted by vouchers, coupons, service fee reduction or exemption, etc.).

Service Availability in a Service Month Value of Compensational Voucher

Less than 99% but is or higher than 97% 5% of the Monthly Service Fee

Less than 97% but is or higher than 95% 10% of the Monthly Service Fee

Less than 95% 20% of the Monthly Service Fee

3.2 Time Limit for Compensation Application

(1) If the Service Availability in a Service Month fails to meet the Service Availability standard, you may apply for compensation only through the Tencent Cloud ticket system under your relevant account after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, both parties agree that the back-end record of Tencent Cloud shall prevail.

(2) You shall apply for compensation no later than the sixtieth (60th) calendar day following the end of the applicable Service Month in which the Service Availability fails to meet the abovementioned standard. If you fail to make any application within such period, or make the application after such period, or make the application by any means other

than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

4. Disclaimer of Liabilities

If the Service is unavailable due to any of the following reasons, the corresponding Service Downtime shall not be counted towards Service Unavailability period, and is not eligible for compensation by Tencent Cloud, and Tencent Cloud will not be held liable to you:

4.1 Any attack on your application program by hackers.

4.2 Any loss or leak of data, passcode or password due to your improper maintenance and improper confidentiality measures.

4.3 Any negligence of you or any operation authorized by you.

4.4 Any network instability of your devices, including but not limited to network jitter, network disconnection, insufficient network signal.

4.5 Any compatibility issues of the applications deployed by you, including but not limited to hardware incompatibility, peripheral incompatibility, operating system incompatibility, GPU incompatibility.

4.6 Any Service Unavailability due to your own operation or maintenance of the applications deployed by you, including but not limited to application updates, maintenance.

4.7 Any Service Unavailability due to your failure to follow the Tencent Cloud product documentation or usage recommendations, including but not limited to the Service Unavailability caused by your refund/destruction operation of the Service in the console and by the usage operation of SDK and API interfaces.

4.8 Any error of the Service due to the applications or software installed by you, or other third-party software or configuration that are not directly operated by Tencent Cloud.

4.9 Any request to stop the service due to your or your applications' violation of laws, regulations, policies and norms, including but not limited to the use of pirated, non-copyrighted, Trojan horse viruses, pornography and other acts.

4.10 Any Service Unavailability due to force majeure including but not limited to natural disasters such as earthquakes, floods, plague epidemics, etc., as well as social events such as war, unrest, government actions, telecommunications backbone line disruptions, hackers, network congestion, technical adjustments in telecommunications departments and government controls.

4.11 Any suspension or termination due to your violation of Tencent Cloud Service Agreement, including the suspension or termination of the Service due to the unpaid or overdue service fees, etc.

4.13 Any Service Unavailability due to any reason not attributable to Tencent Cloud.

4.14 Any other circumstances in which Tencent Cloud will be exempted or released from its liabilities for compensation or otherwise according to relevant laws, regulations, agreements or rules, or any relevant rules or guidelines published by Tencent Cloud separately.

5. Miscellaneous

5.1 The parties hereto acknowledge and agree that, for any losses incurred by you for the use of the Service due to any breach by Tencent Cloud, the aggregate liability of Tencent Cloud shall under no circumstance exceed the total service fees you have paid for the relevant Service which fails to meet the Service Availability Standard. Low-Code Development LCIC Service Level Agreement

최종 업데이트 날짜: : 2023-03-20 17:39:17

In order to use the Tencent Cloud Low-code Interactive Classroom Service (the “Service” or “Lcic”), you shall read and comply with this Tencent Cloud Low-code Interactive Classroom Service Level Agreement (this “Agreement”) and the [Tencent Cloud Service Agreement](#). This Agreement contains, among others, the terms and definitions of the Service, Service Availability and Service Availability Standard, Compensation Plan and Disclaimer of Liabilities. Please carefully read and fully understand each and every provision hereof, and the provisions restricting or disclaiming certain liabilities, or otherwise related to your material rights and interests, are in bold font or underlined or otherwise brought to your special attention.

Please do not purchase the Service unless and until you have fully read, and completely understood and accepted all the terms hereof. By clicking “Agree”/ “Next”, or by purchasing or using the Service, or by otherwise accepting this Agreement, whether express or implied, you are deemed to have read, and agreed to be bound by, this Agreement. This Agreement shall then have legal effect on both you and Tencent Cloud, constituting a binding legal document on both parties. For the purposes of these Terms of Service, “Tencent Cloud” refers to the applicable Tencent entity as set forth in the [Tencent Cloud Service Agreement](#).

The specific content of the Service is subject to the services actually purchased by you and provided by Tencent Cloud.

1.2 Service Month(s)

Service Month(s) refers to the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months until June 16 (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The Service Availability will be calculated separately for each Service Month.

1.3 Monthly Service Fee

1.4 Classroom Entry Success Rate

Once you make a request for entering a classroom, it will be counted as one request. Once you enter a classroom, it will be deemed that the classroom entry is successful.

Classroom Entry Success Rate = (number of successful classroom entries / total number of classroom entry requests) × 100%

1.5 Service Downtime Calculated in Minutes

If the Classroom Entry Success Rate is lower than 99% within one unit time (each 5 minutes as one calculation time unit) due to any reason attributable to Tencent Cloud, it shall be deemed that the Service is unavailable within such unit time; when such situation lasts for five (5) minutes or more, such time shall be counted into the service downtime, while any such situation that lasts less than five (5) minutes will not be counted into the service downtime.

Note:

5 minutes will be deemed as one measurement unit, resulting in 288 measurement points each day. The measurement point of 00:00:00 represents the time slot from 00:00:00 to 00:04:59, and the rest can be deduced by analogy.

1.6 Total Number of Minutes within Service Month(s)

Total Number of Minutes within Service Month(s) = the total number of days in such Service Month(s) × 24 (hours) × 60 (minutes).

2. Service Availability

2.1 Calculation of Service Availability

Service Availability = (1 - Service Downtime Calculated in Minutes within a Service Month / Total Number of Minutes within such Service Month) × 100%

For example, assuming that the Classroom Entry Success Rate from 10:00 a.m. to 10:30 a.m. on a certain day in March 2019 is 98% (i.e., the Classroom Entry Success Rate is lower than 99% and the situation lasts for more than five (5) minutes), the Service Downtime Calculated in Minutes would be 30 minutes, and the Service Availability of March 2019 is 99.93% (i.e., $1 - (30 / 31 \times 24 \times 60) \times 100\%$).

2.2 Service Availability Standard

The Service Availability of the Service provided by Tencent Cloud will be no less than 99.9%. You are entitled to the compensation as set forth in Section 3 below if the Service Availability fails to meet the aforementioned standard, other than in any circumstance as provided for in the Disclaimer of Liabilities provisions below.

Service Availability in a Service Month	Value of Compensational Voucher
Less than 99.9% but is or higher than 99.5%	10% of the Monthly Service Fee
Less than 99.5% but is or higher than 99%	20% of the Monthly Service Fee
Less than 99%	50% of the Monthly Service Fee

3.2 Time Limit for Compensation Application

4.7 Any use of products, functions and access for trial operation which are not launched on the official website of Tencent Cloud.

4.8 Any use by Customer in connection with any illegal content, including but without limitation to pornography, gambling, illegal drugs, fraud, etc.

1.3 Service Downtime Calculated in Minutes: Service Downtime Calculated in Minutes = the time when the Service Unavailability of the Service is fixed – the time when the Service Unavailability of the Service starts. Such downtime will be calculated in minutes, and when the downtime, or an unrounded portion thereof, is less than sixty (60) seconds, it will be rounded up to one (1) minute. For example, if the actual downtime is one (1) minute and one (1) second, the Service Downtime Calculated in Minutes is two (2) minutes. If the Service Unavailability of the Service

is fixed within one (1) minute, which means that the actual downtime of the Service is less than one (1) minute, such downtime will not be counted towards the Service Downtime.

1.4 Service Month(s): means the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The availability of the Service will be calculated independently for each Service Month.

2. Service Availability

2.1 Calculation of Service Availability

Service Availability = ((total time of a Service Month calculated in minutes - Service Downtime Calculated in Minutes within a Service Month) / total time of a Service Month calculated in minutes) × 100%.

2.2 Service Availability Standard

The Service Availability of the Service provided by Tencent Cloud will be no less than 99%. You are entitled to the compensation as set forth in Section 3 below if the Service Availability fails to meet the aforementioned standard, other than in any circumstance as provided for in the release of liabilities provisions below.

3. Service Compensation

In respect of this Service, if the Service Availability fails to meet the abovementioned standard, you will be entitled to compensations in accordance with the following terms:

3.1 Standards of Compensation

(1) Compensations will be made **in the form of voucher** by Tencent Cloud, and you should follow the rules for using the voucher (including the valid term; for details, please refer to the rules of vouchers published on Tencent Cloud's official website). You cannot redeem such voucher for cash or request to issue an invoice for such voucher. Such voucher can only be used to purchase the Service by using your Tencent Cloud account. You cannot use the voucher to purchase other services of Tencent Cloud, nor should you give the voucher to a third party for consideration or for free.

(2) If the Service Availability for a Service Month fails to meet the standard, the amount of compensation will be calculated for such month independently, and **the aggregate amount shall be no more than the applicable monthly Service fee paid by you for such month** (the monthly Service fee referred to herein shall exclude the fee deducted by a voucher or promotional coupon, Service fee discounted or waived, or fees otherwise deductible). **This section only applies to users of the professional edition of Cloud Workload Protection Platform. Users of**

the free basic edition are not entitled to the compensation specified herein, and the calculation of compensation therefor is based on the number of affected devices.

Service Availability (Av) for a Service Month	Value of Compensation Voucher
99% > Av ≥ 90%	10% of the monthly Service fee
90% > Av ≥ 80%	25% of the monthly Service fee
80% > Av	100% of the monthly Service fee

3.2 Time Limit for Compensation Application

(1) If the Service Availability for a Service Month fails to meet the abovementioned Service Availability standard, you may apply for compensation **through (and only through) the support ticket system under your relevant account** after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, **both parties agree that the back-end record of Tencent Cloud will prevail.**

(2) **You should apply for such compensation no later than sixty (60) calendar days following the expiry of the applicable Service Month in which the Service Availability fails to meet the standard.** If you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

3.3 Application Materials for Compensation

If you believe that the Service fails to meet the Service Availability standards specified herein, you may submit the compensation application within the period set forth in this SLA. Your compensation application shall be submitted along with at least the following documents:

- (1) a detailed incident description report, including the specific date, time, duration and other details relating to Service unavailability;
- (2) other information reasonably requested by Tencent Cloud.

4. Release of Liabilities

If the Service is unavailable due to any of the following reasons, the corresponding Service Downtime shall not be counted towards Service Unavailability period, and is not eligible for compensation by

Tencent Cloud, and Tencent Cloud will not be held liable to you:

4.1 the Service is unavailable or fail to meet the Service Availability standard due to the act of You or your end users, which poses a security threat to the Service provided by Tencent Cloud, or is fraudulent or illegal;

4.9 the Service is unavailable or fail to meet the Service Availability standard due to any event of force majeure;

4.10 the Service is unavailable or fail to meet the Service Availability standard due to your or your end users' failure to handle the security alerts in a timely manner;

4.11 the Service is unavailable or fail to meet the Service Availability standard due to any reason not attributable to Tencent Cloud;

4.12 the Service is unavailable or fail to meet the Service Availability standard due to compatibility issues caused by your or your end users' installation of Cloud Workload Protection Platform agent in a non-Tencent Cloud Standard System;

4.13 any other circumstances in which Tencent Cloud will be exempted or released from its liabilities (for compensation or otherwise) according to relevant laws, regulations, agreements or rules, or any rules or guidelines published by Tencent Cloud separately.

5. Miscellaneous

5.1 The parties hereto acknowledge and agree that, for any losses incurred by you during the course of using the Service due to any breach by Tencent Cloud, the aggregate compensation amount payable by Tencent Cloud shall under no circumstance exceed the total Service fees you have paid for the relevant Service which is not performed.

By clicking “Agree”/ “Next”, or by purchasing or using the Service, or by otherwise accepting this Agreement, whether express or implied, you are deemed to have read, and agreed to be bound by, this Agreement. This Agreement shall then have legal effect on both you and Tencent Cloud, constituting a binding legal document on both parties. For the purposes of these Terms of Service, “Tencent Cloud” refers to the applicable Tencent entity as set forth in the [Tencent Cloud Service Agreement](#).

1. Terms and Definitions

1.1 Tencent Cloud Web Application Firewall, WAF

Tencent Cloud Web Application Firewall refers to the web security protection provided by Tencent Cloud to you (“Customer”) through the Web Application Firewall, including website or App service security visualization analysis, OWASP TOP 10 protection, business BOT protection and website compliance protection, etc. The specific services are subject to the services you have purchased and the services provided by Tencent Cloud.

1.2 Service Month(s)

Service Month(s) refers to the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The Service Availability will be calculated separately for each Service Month.

1.3 Service Unavailability

The Service is deemed as unavailable (“**Service Unavailability**”) if the following conditions exist within a continuous period of 1 minute or more:

- (1) The service request cannot reach the service server due to WAF’s own reasons; or
- (2) The service server returns 4xx and 5xx status codes due to WAF’s own reasons.

If the Service is unavailable for less than 1 minute (i.e., the duration of service unavailability for a single instance does not exceed 1 minutes), such circumstance shall not be deemed as Service Unavailability. For example, if the Service is continuously unavailable for 59 seconds, such circumstance shall not be deemed as Service Unavailability.

1.4 Service Downtime

Service Downtime = the time Service Unavailability is fixed - the time Service Unavailability starts. The Service Downtime is calculated by minutes, and any time less than 60 seconds is calculated by 1 minute. For example, the Service Unavailability start moment is 14:01:01 on 10 January, the Service Unavailability fixed moment is 15:01:29 on 10 January, the Service Unavailability time is 60 minutes and 28 seconds. 28 seconds is less than 1 minute, and it needs to be calculated by 1 minute, so this Service Downtime is 61 minutes.

1.5 Service Downtime Calculated in Minutes within Service Month(s)

The sum of Service Downtime calculated in minutes in a Service Month is Service Downtime Calculated in Minutes within such Service Month. For example, if the Service is unavailable 3 times in a Service Month and such Service Downtimes last for 10 minutes, 20 minutes and 30 minutes respectively, the Service Downtime Calculated in Minutes within such Service Month would be 60 minutes.

1.6 Total Number of Minutes within Service Month(s)

Total Number of Minutes within Service Month(s) = the total number of days in Service Month(s) × 24 (hours) × 60 (minutes).

2. Service Availability

2.1 Calculation of Service Availability

Service Availability = (1 - Service Downtime Calculated in Minutes within Service Month(s) / Total Number of Minutes within Service Month(s)) × 100%

2.2 Service Availability Standard

The Service Availability of the Service **shall be no less than 99.95%** (“**Service Availability Standard**”). If the Service fails to meet the Service Availability Standard (except under circumstances as set forth in the Disclaimer of

Liabilities), you may claim compensation in accordance with Section 3 of this Agreement.

3. Compensation Plan

In respect of the Service, if the Service Availability fails to meet the Service Availability Standard, you will be entitled to compensations in accordance with the following terms:

3.1 Standards of Compensation

(1) Compensations will be made **in the form of voucher** by Tencent Cloud, and you should use the voucher by abiding the voucher usage rules (including usage period, etc., subject to the voucher usage rules published on the official website of Tencent Cloud). Such voucher cannot be converted into cash, and no invoice will be issued in respect thereof. The voucher may only be used to purchase the Service via your Tencent Cloud account, and you cannot use the voucher to purchase other services of Tencent Cloud, nor should you give the voucher to a third party for consideration or for free.

(2) If the Service fails to meet the Service Availability Standard in a Service Month, the amount of compensation shall be calculated for such Service Month in which the Service fails to meet the Service Availability Standard separately, and **the aggregate amount shall be no more than the applicable Monthly Service Fee paid by you for the Service in such Service Month** (the Monthly Service Fee refers to the actual amount you pay in cash, excluding the portion deducted by vouchers, coupons, service fee reduction or exemption, etc.).

Service Availability in a Service Month	Value of Compensational Voucher
Less than 99.95% but is or higher than 99%	10% of the Monthly Service Fee
Less than 99% but is or higher than 95%	25% of the Monthly Service Fee
Less than 95%	100% of the Monthly Service Fee

3.2 Time Limit for Compensation Application

(1) If the Service Availability in a Service Month fails to meet the Service Availability Standard, you may **apply for compensation only through the Tencent Cloud ticket system under your relevant account** after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, **both parties agree that the back-end record of Tencent Cloud shall prevail.**

(2) **You shall apply for compensation no later than the sixtieth (60th) calendar day following the end of the Service Month in which the Service fails to meet the Service Availability Standard.** If you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation

and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

4. Disclaimer of Liabilities

If the Service is unavailable due to any of the following reasons, the corresponding Service Downtime shall not be counted towards Service Unavailability period and is not eligible for compensation by Tencent Cloud. Tencent Cloud will not be held liable to you for the corresponding Service Unavailability and the unavailability of your business (if any, including but not limited to the interruption and inaccessibility of your business):

4.1 The Service is unavailable or fails to meet the Service Availability Standard due to the illegal or fraudulent act of you or your end users or any other act that poses a security threat to the Service provided by Tencent Cloud.

4.2 The Service is unavailable due to the device, software or technology of you or any third party (not directly controlled by Tencent Cloud).

4.3 The Service is unavailable due to your failure to use the products in accordance with the configuration or service rules (including but not limited to [the product documentation on Tencent Cloud's official website](#), etc.) required by Tencent Cloud.

4.4 The Service is unavailable as the instance goes into the sandbox due to the peak value of your instance requests exceeding the quantity ordered by you (e.g., your business or attack traffic increase causes the instance requests peak value to exceed the quantity ordered).

4.5 The Service is unavailable, or your business is unavailable when the VIP address of the WAF changes because you have bound your business to the VIP address of the WAF instance.

4.6 In the circumstance where you authorize Tencent Cloud to create security group policies for the assets of your business source station on Tencent Cloud, the Service is unavailable, or your business is unavailable due to the failure of the distribution of the security group policy created by Tencent Cloud for reasons not attributable to the Tencent Cloud Web Application Firewall (e.g., your security group or source station instance restricts the issuance of policies for the Service, you change the security group policy by yourself, you cancel or skip the service role authorization to Tencent Cloud Web Application Firewall, etc.).

4.7 The Service is unavailable due to your non-payment or delay in payment.

4.8 The Service is unavailable due to serious failure of network operator.

4.9 The Service is unavailable due to various source station issues at your business side (e.g., source station bandwidth running full, source station IP exposure, source station server room failure, source station link network jitter, etc.).

4.10 Any temporary service interruption arising from routine maintenance and upgrade to the Service by Tencent Cloud as described in the [Tencent Cloud Service Agreement](#).

4.11 The Service is unavailable due to any event of force majeure.

4.12 The Service is unavailable due to any reason not attributable to Tencent Cloud.

4.13 Any other circumstances in which Tencent Cloud will be exempted or released from its liabilities for compensation or otherwise according to applicable laws, regulations, agreements or rules, or rules or guidelines published by Tencent Cloud separately.

5. Special Covenants

5.1 For SaaS-type Web Application Firewall, you should avoid binding your business to the VIP address of the WAF instance as the VIP address of the WAF may change. Otherwise, when the VIP address of the WAF changes, the Service will be unavailable, and your business connected to the WAF cannot be accessed normally.

5.2 For SaaS-type Web Application Firewall, as the back-to-origin EIP address of the WAF may change, you should adjust the security group policy configuration and release the changed back-to-origin EIP address segment of the WAF in time. Otherwise, when the back-to-origin EIP address of the WAF changes, the Service will be unavailable, and your business connected to the WAF cannot be accessed normally.

5.3 Tencent Cloud provides the Customers of SaaS-based Web Application Firewall with the function of automatically releasing the back-to-origin address of the WAF. You may authorize Tencent Cloud to release the back-to-origin EIP address segment of the WAF for the assets of your business source station on Tencent Cloud when the back-to-origin EIP address of the WAF changes, and Tencent Cloud will create a security group policy for the assets of your business source station on Tencent Cloud according to your authorization by calling the authorized interface. However, please note that the security group policies issued by Tencent Cloud are only limited to the back-to-origin EIP address segment after the change of the WAF, and other security group policies still need to be configured and adjusted by you, and you need to ensure that your security group and instance have no restriction on the security group policies issued by Tencent Cloud, otherwise the issuance of the related security group policies may fail.

6. Miscellaneous

6.1 The parties hereto acknowledge and agree that, for any losses incurred by you for the use of the Service due to any breach by Tencent Cloud, the aggregate liability of Tencent Cloud shall under no circumstance exceed the total service fees you have paid for the relevant Service which fails to meet the Service Availability Standard. If you have used the Service for more than 12 months, the total aggregate liability of Tencent Cloud shall not exceed the total service fees you have paid to Tencent Cloud for the

Service which fails to meet the Service Availability Standard in the 12 months immediately preceding the date that event giving rise to the liability first occurred.

You may review the most updated version of relevant Agreement terms on the Tencent Cloud official website. If you disagree with such revisions made by Tencent Cloud to this Agreement, you have the right to cease using the Service; by continuing to use the Service, you shall be deemed to have accepted this Agreement as amended.

6.3 As an ancillary agreement to the [Tencent Cloud Service Agreement](#), this Agreement is of the same legal effect as the [Tencent Cloud Service Agreement](#). In respect of any matter not agreed herein, you shall comply with relevant terms under the [Tencent Cloud Service Agreement](#). In case of any conflict or discrepancy between this Agreement and the [Tencent Cloud Service Agreement](#), this Agreement prevails to the extent of such conflict or discrepancy. (End)

DSC Service Level Agreement

최종 업데이트 날짜: : 2022-02-25 15:11:16

In order to use the Tencent Cloud Data Security Center Service (the “Service”), you shall read and comply with this Tencent Cloud Data Security Center Service Level Agreement (this “Agreement”, or this “SLA”) and the [Tencent Cloud Service Agreement](#). This Agreement contains, among others, the terms and definitions of the Service, Service Availability, compensation plan and disclaimer of liabilities. Please carefully read and fully understand each and every provision hereof, and the provisions restricting or releasing certain liabilities, or otherwise related to your material rights and interests, are in bold font or underlined or otherwise brought to your special attention.

Please do not purchase the Service unless and until you have fully read, and completely understood and accepted all the terms hereof. By clicking “Agree”/ “Next”, or by purchasing or using the Service, or by otherwise accepting this Agreement, whether express or implied, you are deemed to have read, and agreed to be bound by, this Agreement. This Agreement shall then have legal effect on both you and Tencent Cloud, constituting a binding legal document on both parties.

1. Terms and Definitions

1.1 Tencent Cloud Data Security Center Service

Refers to sensitive data identification, classification and hierarchization, risk detection and other services provided by Tencent Cloud by connecting to your (the “Client”) data assets. The specific content of the services shall be subject to the Service you purchase, and the contents actually provided by Tencent Cloud.

1.2 Service Month(s)

Service Month(s) refers to the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The Service Availability will be calculated separately for each Service Month.

1.3 Total Number of Minutes within Service Month

Total Number of Minutes within Service Month(s) = the total number of days of the Service Month(s) × 24 (hours) × 60 (minutes).

1.4 Service Unavailability

Service Unavailability refers to the unavailability of the Service, which includes the following two types:

(1) Unavailability of management function: means that you cannot operate the relevant functional configuration items in the interface by the steps described in the operation guide, despite normal login of the service console within the scope of authorization.

(2) Unavailability of classification and hierarchization function: means that you cannot perform the operations such as data identification, classification and hierarchization to process the supportable data assets as committed in the operation guide through the Service, even though you make correct configuration in full compliance with the operation guide.

1.5 Service Downtime

Service Downtime = the time when the Service Unavailability is fixed – the time when the Service Unavailability starts. Such downtime will be calculated in minutes, and when the downtime, or an unrounded portion thereof, is less than sixty (60) seconds, it will be rounded up to one (1) minute. For example, if the time when the Service Unavailability starts is January 10 at 14:01:01, and the time when the Service Unavailability is fixed is January 10 at 15:01:29, the Service Downtime will be sixty (60) minutes and twenty-eight (28) seconds. Since twenty-eight (28) seconds is less than one (1) minute, it will be rounded up to one (1) minute, so the Service Downtime will be sixty-one (61) minutes.

1.6 Service Downtime within Service Month(s) Calculated in Minutes

Service Downtime within Service Month(s) Calculated in Minutes refers to the total number of minutes of the Service Downtime within Service Month(s). For example, if the Service Unavailability takes places three times within Service Month(s), and the Service Downtime is 10 minutes, 20 minutes, and 30 minutes respectively, the Service Downtime within Service Month(s) Calculated in Minutes will be sixty (60) minutes.

2. Service Availability

2.1 Calculation of the Service Availability

Service Availability = $\{(\text{Total number of minutes within Service Month(s)} - \text{Service Downtime within Service Month(s) Calculated in Minutes}) / \text{Total number of minutes within Service Month(s)}\} \times 100\%$.

2.2 Service Availability Standard

The Service Availability of the Service provided by Tencent Cloud should not be less than **99.9%**. If the Service fails to meet the Standard (except under circumstances for disclaimer of liabilities), you may claim compensation in accordance with Article 3 of this Agreement.

3. Compensation Plan

In respect of the Service, if the Service Availability fails to meet the Standard, you will be entitled to compensations in accordance with the following terms:

3.1 Standards of Compensation

(1) Compensations will be made ****in the form of voucher (not cash) ****by Tencent Cloud, and you should use the voucher by abiding the voucher usage rules (including usage period, etc., subject to the voucher usage rules published on Tencent Cloud official website). Such voucher cannot be converted into cash, and no invoice will be issued with respect thereof. The voucher may only be used to purchase the Service by using your Tencent Cloud account, and you cannot use the voucher to purchase other services of Tencent Cloud, nor should you give the voucher to a third party for consideration or for free.

(2) If the Service Availability in a Service Month fails to meet the abovementioned standard, the amount of compensation shall be calculated for such Service Month separately, and **the aggregate amount shall be no more than the applicable Monthly Service Fee paid by you for such Service Month** (the Monthly Service Fee referred to herein shall be the cash you have actually paid, excluding the portion deducted by vouchers, coupons, service fee reduction or exemption, etc.).

Service Availability in a Service Month	Value of Compensational Voucher
Less than 99.9% but is or higher than 99.0%	10% of the Monthly Service Fee
Less than 99.0% but is or higher than 98.0%	20% of the Monthly Service Fee
Less than 98.0%	50% of the Monthly Service Fee

3.2 Time Limit for Compensation Application

(1) If the Service Availability in a Service Month fails to meet the Service Availability standard, you may **apply for compensation only through the support ticket system under your relevant account** after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, **both parties agree that the back-end record of Tencent Cloud shall prevail.**

(2) **You shall apply for compensation no later than the sixtieth (60th) calendar day following the end of the applicable Service Month in which the Service Availability fails to meet the abovementioned standard.** If you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, **it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.**

3.3 Application Materials for Compensation

If you believe that the Service fails to meet the Service Availability Standard, you may apply for compensation within the period of time as stipulated under this SLA, and you should at least provide the following information together with your compensation application:

- 4.10 the Service is unavailable due to the number of databases exceeding the service specification of the Data Security Center product you purchase;**

A request received by the server end of the Secrets Manager is deemed as a Valid Request (excluding circumstances covered by provisions of release of liabilities).

1.3 Error Rate Per 5 Minutes

(1) Presume that the user accesses the Service and sends a total number of 1,000,000 requests in a 5-minute period, during which there is no node failure, and there are 1,000 responses with an “InternalError” error code, then the Error Rate = (1,000 + 0) / 1,000,000 = 0.1%.

(2) Total Number of 5-Minute Periods in A Service Period = 12 × 24 × 30 = 8640 (periods).

1.3 Service Region(s)

The Service Region(s) in which the Tencent Cloud EdgeOne Service is available shall be subject to the information on the Tencent Cloud official website.

1.4 Monthly Service Fee

The Monthly Service Fee refers to the accumulated service fee for the services you use within a Service Month.

1.5 Time Unit

The usage statistics of the Service takes 5 minutes as a time unit, resulting in 288 measurement points each day. The measurement point of 00:00:00 represents the time slot from 00:00:00 to 00:04:59, and the rest can be deduced by analogy.

1.6 Service Downtime within Service Month(s) Calculated in Minutes

Any Time Unit of the Service shall be considered as abnormal if the error rate within such Time Unit in the following situations (error rate within one Time Unit = the number of failed requests within such Time Unit / the total number of requests within such Time Unit) is more than 0.1%:

- (1) The business request of a zone proxy fails to reach the business server due to reasons solely attributable to the Tencent Cloud EdgeOne;
- (2) The business server of a zone proxy returns 4xx and 5xx status codes due to reasons solely attributable to the Tencent Cloud EdgeOne;
- (3) The packet loss rate by the Layer 4 proxy is higher than 20% or the success rate of TCP connections is lower than 30% due to reasons solely attributable to the Tencent Cloud EdgeOne.

The Service Availability is only applicable to the Tencent Cloud EdgeOne Service and does not apply to abnormalities caused by related services other than the Service (including, without limitation, full bandwidth or server room failure of the Customer's source station). If two consecutive Time Units are deemed to be abnormal, the 10 minutes is counted as unavailable unit time; and the abnormal time less than two consecutive Time Units is not counted as Service Downtime. The unavailable unit time in each Service Month is added up to get the Service Downtime within Service Month(s) Calculated in Minutes.

1.7 Total Number of Minutes within Service Month(s)

Total Number of Minutes within Service Month(s) = the total number of days of the Service Month(s) × 24 (hours) × 60 (minutes).

2. Service Availability

2.1 Calculation of Service Availability

Service Availability = ((Total Time of the Service within a Service Month Calculated in Minutes - Service Downtime within a Service Month Calculated in Minutes) / Total Time of the Service within a Service Month Calculated in Minutes) × 100%. The Service Availability will be calculated separately for each security and acceleration zone (instances) involved in the Service you use.

2.2 Service Availability Standard

The Service Availability for the Service shall be no less than 99.9% ("Service Availability Standard"). If the Service fails to meet the Service Availability Standard (except under circumstances as set forth in the Disclaimer of Liabilities), you may claim compensation in accordance with Article 3 of this Agreement.

3. Compensation Plan

In respect of the Service, if the Service Availability for a single instance of the Service fails to meet the Service Availability Standard, you will be entitled to compensations in accordance with the following terms:

3.1 Standards of Compensation

(1) Compensations will be made **in the form of voucher** by Tencent Cloud, and you should use the voucher by abiding the voucher usage rules (including usage period, etc., subject to the voucher usage rules published on Tencent Cloud official website). The voucher may only be used to purchase the Service by using your Tencent Cloud account, and you cannot use the voucher to purchase other services of Tencent Cloud, nor should you give the voucher to a third party for consideration or for free.

(2) If the Service Availability Standard is not met for any Service Month, the amount of compensation will be calculated for each such Service Month independently, and **the aggregate amount shall be no more than the aggregate Monthly Service Fee for the Service Month in which the Service Availability fails to meet the Service Availability Standard** (the Monthly Service Fee referred to herein shall be the cash amount you have actually paid, excluding the portion deducted by vouchers, coupons, service fee reduction or exemption, etc.). Standards of Compensation are as follows.

Service Availability in a Service Month	Value of Compensational Voucher

Less than 99.0% but is or higher than 95.0%	25% of the Monthly Service Fee
Less than 95.0%	50% of the Monthly Service Fee

3.2 Time Limit for Compensation Application

In order to use the Tencent Cloud Private DNS service (the “Service”), you should read and observe this Private DNS Service Level Agreement (this “Agreement”, or this “SLA”) and the Tencent Cloud Service Agreement. This Agreement contains, among others, the terms and definitions of the Service, level indicators of the Service availability and success rate, compensation plan and release of liabilities. Please carefully read and fully understand each and every provision hereof, and the provisions restricting or releasing certain liabilities, or otherwise related to your material rights and interests, are in bold font or underlined or otherwise brought to your special attention.

Please do not purchase the Service unless and until you have fully read, and completely understood and accepted all the terms hereof. By clicking “Agree”/ “Next”, or by purchasing or using the Service, or by otherwise accepting this Agreement, whether express or implied, you are deemed to have read, and agreed to be bound by, this Agreement. This Agreement shall then have legal effect on both you and Tencent Cloud, constituting a binding legal document on both parties.

1. Terms and Definitions

Tencent Cloud Private DNS: Private DNS means a private DNS management service based on Tencent Cloud Virtual Private Cloud (VPC) provided by Tencent Cloud.

Service Month(s): Service Month(s) means the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The availability of the Service will be calculated independently for each Service Month.

2. Service Availability

2.1 Calculation of Service Availability

Unavailability means malfunction of the Services due to causes other than system maintenance.

Service Availability = (1 - Service Downtime within the Service period of Private DNS service / total time within the Service period of Private DNS service) × 100%

If we guarantee a Service Availability of 99.99%. Then, for example, the Service available period of Private DNS service is 43,195.68 minutes (= 30 (day) × 24 (hour) × 60 (minute) × 99.99%). That is, the Service Downtime is 4.32 minutes (= 43,200 minutes – 43,195.68 minutes).

Explanations:

(1) Duration of Malfunction = the time when the malfunction is resolved – the time when the malfunction starts. The duration of malfunction will be calculated in minutes. Where the duration of malfunction, or an unrounded portion thereof, is less than 1 minute, it will be rounded up to 1 minute. For example, if the duration of malfunction is 11 minutes and 1 second, it will be calculated as 12 minutes.

(2) Only the users who have purchased Private DNS service and have incurred fees are eligible to compensations.

2.2 Standards of Service Availability

The Service Availability of the Service provided by Tencent Cloud will be no less than 99.99%. If the Service Availability fails to meet the aforementioned standard (other than circumstances set forth in the Release of Liabilities Section below), you are entitled to the compensation as set forth in Section 3 below.

3. Service Compensation

In respect of this Service, if the Service Availability is lower than the aforementioned standard, compensations will be made as follows:

3.1 Standards of Compensation

(1) Compensations will be made **in the form of coupon** by Tencent Cloud, and you should follow the rules for using the coupon (including the valid term; for details, please refer to the rules of coupons published on Tencent Cloud's official website). You cannot redeem such coupon for cash or request to issue an invoice for such coupon. Such coupon can only be used to purchase the Service by using your Tencent Cloud account. You cannot use the coupon to purchase other services of Tencent Cloud, nor should you give the coupon to a third party for consideration or for free.

(2) If the Service Availability for a Service Month fails to meet the standard, the amount of compensation will be calculated for such month independently, and **the aggregate amount shall be no more than the applicable monthly Service fee paid by you for such month** (the monthly Service fee referred to herein shall exclude the portion deducted by a voucher or promotional coupon, due to discounted service fee or otherwise deducted).

Service Availability (Av) for a Service Month	Value of Compensation Voucher
99.99% > Av ≥ 99.00%	10% of the monthly Service fee
99% > Av ≥ 95%	25% of the monthly Service fee
95% > Av	100% of the monthly Service fee

3.2 Time Limit for Compensation Application

1) If the Service Availability in a Service Month fails to meet the aforementioned Service Availability standard, you may apply for compensation **through (and only through) the support ticket system under your relevant account** after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, **both parties agree that the back-end record of Tencent Cloud will prevail.**

2) **You should apply for such compensation no later than sixty (60) calendar days following the expiry of the Service Month in which the Service Availability fails to meet the standard.** If you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

4. Release of Liabilities

If the Service is unavailable due to any of the following reasons, the corresponding Service unavailable time shall not be counted towards Service unavailability period, and is not eligible for compensation by Tencent Cloud, and Tencent Cloud will not be held liable to you:

4.1 any system maintenance or update with prior notice by Tencent Cloud to users.

4.2 any failure of a user to follow the relevant guidelines in using the Service.

4.3 any malfunction of a user's network or application.

4.4 any Service unavailability or failure of the Service to meet the availability standard due to any reason not attributable to Tencent Cloud.

4.5 any other circumstances in which Tencent Cloud will be exempted or released from its liabilities (for compensation or otherwise) according to relevant laws, regulations, agreements or rules, or any rules or guidelines published by Tencent Cloud separately.

5. Miscellaneous

5.1 The parties hereto acknowledge and agree that, for any losses incurred by you during the course of using the Service due to any breach by Tencent Cloud, the aggregate compensation amount payable by Tencent Cloud shall under no circumstance exceed the total service fees you have paid for the relevant Service which is not performed.

1. Terms and Definitions

Game Multimedia Engine (GME) Service provided by Tencent Cloud means the voice platform service provided by Tencent Cloud to you (“Client”), including without limitation real-time voice chat, voice messaging, audio-text conversion, audio filtering and other categories of audio services provided by Tencent Cloud Game Multimedia Engine. For details, please refer to the Service purchased by you and the content of Service provided by Tencent Cloud. You may achieve various voice features in an application through integrating SDKs provided by the Service.

Service Month(s): Service Month(s) means the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The availability of the Service will be calculated independently for each Service Month.

Service Unavailable: For each one minute, if the number of users which are not able to use voice functions in the application within which you uses GME to achieve various voice functions exceeds 5% of the number of total users, the Service within such one minute shall be deemed unavailable.

Service Downtime: The aggregated minutes during which the Service is unavailable within a Service Month. Each minute is considered as one measurement point for GME service. The sum of the measurement points of which the Service is unavailable during a Service Month shall be the Service Downtime calculated in minutes for such Service Month.

2. Service Availability/ Service Success Rate

2.1. Calculation of Service Availability

Service Availability = (1 - Service Downtime calculated in minutes within a Service Month / total time of a Service Month calculated in minutes) × 100%

2.2. Service Availability/ Standard Indicator

The Service Availability of the Service provided by Tencent Cloud will be no less than 99.95%. You are entitled to the compensation as set forth in Section 3 below if the Service Availability fails to meet the aforementioned standard, other than in any circumstance as provided for in the release of liabilities provisions below.

If it takes less than 5 minutes for the Service to recover from malfunction, such period shall not be counted into Service Downtime. Service Downtime means the time period starting from the malfunction to the recovery back to normal use, which shall include the time period for maintenance.

3. Service Compensation

In respect of this Service, if the Service Availability fails to meet the aforementioned standard, you will be entitled to compensations in accordance with the following terms:

You cannot use the voucher to purchase other services of Tencent Cloud, nor should you give the voucher to a third party for consideration or for free.

3.1.2. If the Service Availability for a Service Month fails to meet the standard, the amount of compensation will be calculated for such month independently, and the aggregate amount shall be no more than the applicable monthly service fee paid by you for such month (the monthly service fee referred herein shall exclude the portion deducted by a voucher or promotional credits, due to discounted service fee or otherwise deducted).

Service Availability for a Service Month	Value of Compensation Voucher
≥ 99% and < 99.95%	10% of the monthly service fee
≥ 95% and < 99%	25% of the monthly service fee
≥ 90% and < 95%	30% of the monthly service fee
< 90%	50% of the monthly service fee

3.2 Time Limit for Compensation Application

3.2.1. If the Service Availability for a Service Month fails to meet the aforementioned Service Availability standard, you may apply for compensation through (and only through) the support ticket system under your relevant account after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, both parties agree that the back-end record of Tencent Cloud will prevail.

3.2.2. You should apply for such compensation no later than sixty (60) calendar days following the expiration of the applicable Service Month in which the Service Availability fails to meet the standard. If you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

4. Release of Liabilities

If the Service is unavailable due to any of the following reasons, the corresponding Service Downtime shall not be counted towards Service unavailability period, and is not eligible for compensation by Tencent Cloud, and Tencent Cloud will not be held liable to you:

Please do not purchase or use the Service unless and until you have fully read, and completely understood and accepted all the terms hereof. By clicking “Agree”/ “Next”, or by purchasing or using the Service, or by otherwise accepting this Agreement, whether express or implied, you are deemed to have read, and agreed to be bound by, this Agreement. This Agreement shall then have legal effect on both you and Tencent Cloud, constituting a binding legal document on both parties.

1. Terms and Definitions

1.1 Tencent Cloud Managed Service for Prometheus:

Managed Service for Prometheus means a lightweight, secure and high-performance management service for Prometheus. In addition to maintaining the monitoring function of the open source Prometheus, Managed Service for Prometheus provides high-performance Prometheus management service, self-serving data source configuration, open source Grafana and cloud monitoring alert ability, which will save your user development and maintenance costs.

1.2 Single Instance:

means one (1) Prometheus instance. The Service Availability will be calculated on a Single Instance basis.

1.3 Total Time of a Single Instance within a Service Month:

equals to the total number of days of the Service Month × 24 (hours) × 60 (minutes).

1.4 Instance Unavailability:

If Prometheus fails to collect or query data due to the causes of the platform, it will be deemed that the instance is unavailable.

1.5 Single Instance Service Downtime Calculated in Minutes:

Single Instance Service Downtime Calculated in Minutes = the time when the Instance Unavailability is fixed -- the time when the Instance Unavailability starts. Service downtime means the time commencing from the malfunction until the recovery of Service, including any unscheduled maintenance time. Instance Unavailability that lasts for more than five (5) minute will be counted in the Service downtime. However, when the Instance Unavailability is fixed within five (5) minute, which means that the actual downtime of the Service is less than five (5) minute, such downtime will not be counted in the Service downtime defined herein.

1.6 Service Month(s):

Service Month(s) means the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The availability of the Service will be calculated independently for each Service Month.

1.7 Monthly Service Fee:

means the aggregate service fees in cash paid by you for a Single Prometheus Instance within one (1) Service Month, excluding the portion paid yet to be consumed, and the portion deducted by a voucher or promotional voucher, due to discounted service fee or otherwise deducted.

2. Service Availability

2.1 Calculation of Service Availability

Service Availability = (total time of a Single Instance within a Service Month calculated in minutes - Single Instance Service Downtime) / total time of a Single Instance within a Service Month calculated in minutes × 100%

2.2 Service Availability

The Service Availability of the Service provided by Tencent Cloud will be no less than 99.95%. You are entitled to the compensation as set forth in Section 3 (Service Compensation) below if the Service Availability fails to meet the aforementioned standard, other than in any circumstance as provided for in the release of liabilities provisions below.

If the total available time of a Single Instance in a Service Month is 30 (days) × 24 (hours) × 60 (minutes) × 99.95% = 43178.4 minutes; that is, the Service downtime of the instance in such month would be 43200 -- 43178.4 = 21.6 minutes.

3. Service Compensation

In respect of this Service, if the Service Availability is lower than the aforementioned standard, compensations will be made as follows:

3.1 Standards of Compensation

(1) Compensations will be made **in the form of coupon** by Tencent Cloud, and you should follow the rules for using the coupon (including the valid term; for details, please refer to the rules of coupons published on Tencent Cloud's official website). You cannot redeem such coupon for cash or request to issue an invoice for such coupon. Such coupon can only be used to purchase the Service by using your Tencent Cloud account. You cannot use the coupon to purchase other services of Tencent Cloud, nor should you give the coupon to a third party for consideration or for free.

(2) If the Service Availability for a Service Month fails to meet the standard, the amount of compensation will be calculated for such month independently, and **the aggregate amount shall be no more than the applicable monthly Service fee paid by you for such month** (the monthly Service fee referred to herein shall exclude the portion deducted by a voucher or promotional coupon, due to discounted service fee or otherwise deducted).

Service Availability (Av) for a Service Month	Value of Compensation Voucher
$99.95\% > Av \geq 99\%$	10% of the monthly Service fee
$99\% > Av \geq 95\%$	25% of the monthly Service fee
$\leq 95\%$	100% of the monthly Service fee

3.2 Time Limit for Compensation Application

(1) If the Service Availability for a Service Month fails to meet the abovementioned Service Availability standard, you may apply for compensation **through (and only through) the support ticket system under your relevant account** after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, **both parties agree that the back-end record of Tencent Cloud will prevail.**

(2) **You should apply for such compensation no later than sixty (60) calendar days following the expiry of the applicable Service Month in which the Service Availability fails to meet the standard.** If you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

4. Release of Liabilities

If the Service is unavailable due to any of the following reasons, the corresponding Service downtime shall not be counted towards Service unavailability period, and is not eligible for compensation by Tencent Cloud, and Tencent Cloud will not be held liable to you:

4.1 any scheduled downtime due to any system maintenance with prior notice by Tencent Cloud, including system cutover, upgrade and malfunction simulation test.

4.2 any malfunction or configuration adjustment of any network or equipment that is not Tencent Cloud facility.

4.3 any Service unavailability attributable to any person other than Tencent Cloud, such as hacker attack or negligence of your third-party supplier.

4.4 any loss or leak of data, passcode or password due to your improper maintenance or improper confidentiality measures.

4.5 any mal-operation due to your negligence, or any operation authorized by you, such as active reconstruction by the user.

4.6 any failure by you to abide by user guide or suggestions for using Tencent Cloud products.

4.7 any Service unavailability or failure of the Service to meet the availability standard due to any reason not attributable to Tencent Cloud.

4.8 any other circumstances in which Tencent Cloud will be exempted or released from its liabilities (for compensation or otherwise) according to relevant laws, regulations, agreements or rules, or any rules or guidelines published by Tencent Cloud separately.

4.9 any event of force majeure.

5. Miscellaneous

5.1 You understand that Tencent Cloud cannot warrant that the Service is error free; however Tencent Cloud will endeavor to continuously improve the quality and level of its services. As such, you hereby agree that Tencent will not be deemed to have breached this Agreement in case of any error of the Service, as long as such error is unavoidable in the context of the then existing technologies in the industry. You agree to cooperate with Tencent to resolve aforementioned error.

5.2 The parties hereto acknowledge and agree that, for any losses incurred by you during the course of using the Service due to any breach by Tencent Cloud, the aggregate compensation amount payable by Tencent Cloud shall under no circumstance exceed the total service fees you have paid for the relevant Service which is not performed.

5.3 Tencent Cloud has the right to amend the terms of this Agreement as appropriate or necessary in light of changes in due course. You may review the most updated version of relevant Agreement terms on the official website of Tencent Cloud. If you disagree with such revisions made by Tencent Cloud to this Agreement, you have the right to cease using the Service; by continuing to use the Service, you shall be deemed to have accepted the Agreement as

amended.

5.4 As an ancillary agreement to the Tencent Cloud Service Agreement, this Agreement is of the same legal effect as the Tencent Cloud Service Agreement. In respect of any matter not agreed herein, you shall comply with relevant terms under the Tencent Cloud Service Agreement. In case of any conflict or discrepancy between this Agreement and the Tencent Cloud Service Agreement, this Agreement prevails to the extent of such conflict or discrepancy. (End of Document)

This Agreement contains, among others, the terms and definitions of the Service, Service Availability and Service Availability Standard, Compensation Plan and Disclaimer of Liabilities. Please carefully read and fully understand each and every provision hereof, and the provisions restricting or disclaiming certain liabilities, or otherwise related to your material rights and interests, are in bold font or underlined or otherwise brought to your special attention.

Please do not purchase or use the Service unless and until you have fully read, and completely understood and accepted all the terms hereof. By clicking “Agree”/ “Next”, or by purchasing or using the Service, or by otherwise accepting this Agreement, whether express or implied, you are deemed to have read, and agreed to be bound by, this Agreement. This Agreement shall then have legal effect on both you and Tencent Cloud, constituting a binding legal document on both parties. For the purposes of these Terms of Service, “Tencent Cloud” refers to the applicable Tencent entity as set forth in the [Tencent Cloud Service Agreement](#).

1. Terms and Definitions

1.1 Tencent Cloud Managed Service for Grafana (TCMG)

Refers to a managed service developed by Tencent Cloud in collaboration with Grafana Lab, based on a popular open-source visualization project, Grafana. TCMG provides secure, operation-and-maintenance-free Grafana capabilities and built-in Tencent Cloud plug-ins for various data sources, such as Managed Service for Prometheus, Container Service, Logging Service, Graphite and InfluxDB, to achieve unified visualization of data. The specific services are subject to the services you have purchased and the service content provided by Tencent Cloud.

1.2 A Single Instance

Refers to a Grafana instance whose unit number is 1. The Service Availability (as defined below) shall be calculated based on a Single Instance.

1.3 Total Number of Minutes within Service Month(s) for a Single Instance

Total Number of Minutes within Service Month(s) for a Single Instance = the total number of days in Service Month(s) for a Single Instance × 24 (hours) × 60 (minutes).

1.4 Service Unavailability for a Single Instance

Grafana's failure to display visualized data properly for reasons attributable to Tencent Cloud shall be deemed as Service Unavailability for a Single Instance.

1.5 Service Downtime Calculated in Minutes for a Single Instance

Service Downtime Calculated in Minutes for a Single Instance = the time when Service Unavailability for a Single Instance is fixed - the time when Service Unavailability for a Single Instance starts.

Service Downtime refers to the time period from the start of a service failure to the time the services are back to normal, including system maintenance time without prior notice. If the duration of a service failure lasts for more than 5 minutes, such duration would be counted as Service Downtime Calculated in Minutes. If the duration of a service failure lasts for less than 5 minutes (i.e., the duration of Service Unavailability for a Single Instance does not exceed 5 minutes), such duration wouldn't be counted as Service Downtime Calculated in Minutes.

1.6 Service Month(s)

Service Month(s) refers to the calendar month(s) within the term of the Service purchased by you. For example, if you purchase the Service for a term of three months starting from March 17, there will be four (4) Service Months (the first Service Month from March 17 to March 31, the second from April 1 to April 30, the third from May 1 to May 31, and the fourth from June 1 to June 16). The Service Availability will be calculated separately for each Service Month.

1.7 Monthly Service Fee

The Monthly Service Fee refers to the accumulated cash service fee you pay for a Single Instance within a Service Month, excluding the portion that has been purchased but not consumed yet, and the fees deducted by vouchers, coupons, service fee reduction or exemption, etc.

2. Service Availability

2.1 Calculation of Service Availability

Service Availability = (Total Number of Minutes within a Service Month for a Single Instance - Service Downtime Calculated in Minutes for a Single Instance) / Total Number of Minutes within a Service Month for a Single Instance × 100%.

2.2 Service Availability Standard

The Service Availability for the Service **shall be no less than 99.95%** ("Service Availability Standard"). If the Service fails to meet the Service Availability Standard (except under circumstances as set forth in the Article 4 (Disclaimer of Liabilities)), you may claim compensation in accordance with Article 3 of this Agreement (Compensation Plan).

Assuming that Total Number of Minutes within a Service Month for a Single Instance is 43,200 minutes (=30 × 24 × 60), Service Downtime Calculated in Minutes for a Single Instance shall be less than 21.6 minutes (=43,200 - 43,200 × 99.95%).

3. Compensation Plan

In respect of the Service, if the Service fails to meet the Service Availability Standard, you will be entitled to compensations in accordance with the following terms:

3.1 Standards of Compensation

(1) Compensations will be made **in the form of voucher** by Tencent Cloud, and after receiving the voucher, you should use the voucher by abiding the voucher usage rules (including usage period, etc., subject to the voucher usage rules published on Tencent Cloud official website). Such voucher cannot be converted into cash, and no invoice will be issued with respect thereof. The voucher may only be used to purchase the Service by using your Tencent Cloud account, and you cannot use the voucher to purchase other services of Tencent Cloud, nor should you give the voucher to a third party for consideration or for free.

(2) If the Service fails to meet the Service Availability Standard in any Service Month, the amount of compensation shall be calculated for such Service Month independently, and **the aggregate amount shall be no more than the Monthly Service Fee you pay for the Service in the Service Month in which the Service fails to meet the Service Availability Standard** (the Monthly Service Fee refers to the actual amount you pay in cash, excluding the portion deducted by vouchers, coupons, service fee reduction or exemption, etc.).

Less than 99.95% but is or higher than 99%	10% of the Monthly Service Fee
Less than 99% but is or higher than 95%	25% of the Monthly Service Fee
Less than 95%	100% of the Monthly Service Fee

3.2 Time Limit for Compensation Application

(1) If the Service Availability in a Service Month fails to meet the Service Availability Standard, you may **apply for compensation only through the Tencent Cloud ticket system under your relevant account** after the fifth (5th) business day of the month immediately following such Service Month. Tencent Cloud will verify and ascertain your application upon receipt of such application. If there is any dispute over the calculation of the Service Availability for a Service Month, **both parties agree that the back-end record of Tencent Cloud shall prevail.**

(2) **You shall apply for compensation no later than the sixtieth (60th) calendar day following the end of the Service Month in which the Service fails to meet the Service Availability Standard.** If you fail to make any application within such period, or make the application after such period, or make the application by any means other than that agreed herein, it shall be deemed that you have voluntarily waived your right to apply for such compensation and any other rights you may have against Tencent Cloud, in which case Tencent Cloud has the right to reject your application for compensation and not to make any compensation to you.

- 4.9 Any event of force majeure or accidents.

5. Miscellaneous

5.1 The parties hereto acknowledge and agree that, for any losses incurred by you for the use of the Service due to any breach by Tencent Cloud, the aggregate liability of Tencent Cloud shall under no circumstance exceed the total service fees you have paid for the relevant Service which fails to meet the Service Availability Standard. If you have used the Service for more than 12 months, the total aggregate liability of Tencent Cloud shall not exceed the total service fees you have paid to Tencent Cloud for the Service which fails to meet the Service Availability Standard in the 12 months immediately preceding the date that event giving rise to the liability first occurred.

Law Enforcement Data Request Guidelines

North-America

최종 업데이트 날짜: : 2021-07-30 15:11:57

INTRODUCTION

These guidelines are for any law enforcement or other federal, state or local government authority (the “**Requesting Authority**”) making a request to Tencent Cloud LLC or any other Tencent group company (“**we**”, “**our**”, “**us**” or “**Tencent Cloud NA**”) that operates cloud services in North America (“**Tencent Cloud Services - NA**”), for disclosure of data about our users of Tencent Cloud Services - NA (a “**Request**”).

We respond to Requests made by a Requesting Authority in accordance with these guidelines, subject always to applicable laws and regulations and our internal guidelines. Applicable laws include, but are not limited to, the Electronic Communications Privacy Act, Title 18 U.S. Code, § 2510, *et seq.* (“**ECPA**”), the Stored Communications Act, Title 18 U.S. Code, § 2701 *et seq.* (“**SCA**”), and the California Electronic Communications Privacy Act, Cal. Penal Code §§ 1546 – 1546.4 (“**CalECPA**”).

Except in emergency circumstances as described in these Guidelines, Tencent Cloud NA will not release customer information without valid legal process properly served on us. Depending on the customer information being requested, the required legal process may include a court order, subpoena, or search warrant, as described in these Guidelines.

We may amend these guidelines at any time without notice. We encourage you to check back regularly on this page for updates. These guidelines are applicable to Requests from Requesting Authorities only. Nothing in these guidelines shall be used to create any legal obligations or any enforceable rights against Tencent Cloud LLC or any other member of the Tencent group.

Disclaimer on Requests for data not held by Tencent Cloud LLC: From time to time, we receive Requests for disclosure of data which do not belong to and/or are not held by Tencent Cloud LLC but a separate entity. The responsibility is on the Requesting Authority to make the appropriate request(s) to such other entities and/or affiliates as necessary.

WHAT KINDS OF REQUESTS DO WE RESPOND TO?

We respond to the following types of Requests:

Preservation Requests

We accept Requests issued in accordance with SCA § 2703(f) from Requesting Authorities to preserve specified records or data, pending the issuance of valid legal process. Please complete this [form](#) to make a Preservation

Request. In compliance with SCA § 2703(f), we will preserve requested information for up to 90 days, and upon receipt of a preservation extension request, one additional 90 day period. If we do not receive formal legal request for the preserved information before the end of the initial or extended preservation period, the preserved information may be deleted when the preservation period expires. In addition to the information described below (in “Form of Request”), Preservation Requests must be sent on law enforcement letterhead and signed by a representative of the Requesting Authority.

Legal Process Requests

Depending on the type of information sought, we may provide user information in response to a subpoena, administrative summons, court order or search warrant issued by a U.S. governmental entity or court of competent jurisdiction as those terms are defined in the SCA.

Tencent Cloud NA requires a judicially issued search warrant for all Requests for user content. Content includes the substantive content of data stored in a user’s account, which may include documents, media files or other data that the user stores or processes on Tencent Cloud NA.

Tencent Cloud NA requires a subpoena to produce user information in response to a Request for basic subscriber information, such as the customer’s name, contact information, billing information, types of services used or purchased and dates of account creation and termination. Tencent Cloud NA may also provide this information in response to a court order or search warrant.

For Requests submitted by a California state Requesting Authority (e.g., a county sheriff’s department, city or state police or district attorney’s office) Tencent Cloud NA requires a search warrant to produce all information about a user.

Emergency Disclosure Requests

We may provide information in response to an urgent law enforcement request without receipt of formal legal process where information provided by the Requesting Authority gives us a good faith belief that an emergency involving danger of death or serious physical injury to a person requires disclosure without delay. Please note that we evaluate Emergency Requests on a case-by-case basis and in our sole discretion. Please complete this [form](#) to make an Emergency Request.

INFORMATION TO BE INCLUDED IN REQUESTS

In order to process any Request, we require that each Request clearly specify the following in writing:

- purpose of which each type of data is to be used in relation to the Request;
- why is the request type of data considered necessary for the purpose; and
- the basis of the Request and, where applicable and/or necessary, details of the nature of the investigation, procedure and/or process being carried out by the Requesting Authority.

NOTIFICATION OF OUR USERS

We respect our users' rights and privacy. We may therefore notify the relevant user about any Requests for their data prior to disclosure, unless we are prohibited from doing so under applicable laws or regulations, by the terms of any legal process (such as a court issued confidentiality order), or where we reasonably believe that such disclosure may create imminent danger or risk for us or any third party.

A Requesting Authority that believes that notification would jeopardize a law enforcement investigation should obtain an appropriate legal process that specifically prohibits member notification. If your Request draws attention to an ongoing violation of our Terms and Policies, we will – to the extent permitted by applicable laws and regulations – take action to prevent further abuse, including actions that may notify the user that we are aware of their misconduct.

INTERNATIONAL REQUESTS

We respond to requests of an international nature made pursuant to a Mutual Legal Assistance Treaty ("**MLAT**") or an Executive Agreement entered between the United States and a foreign government pursuant to the CLOUD Act and other applicable conventions, treaties, protocols or documents of a similar nature. 2. our relationship with other third parties

2.1 From time to time, we receive requests for disclosure of data which do not belong to and/or are not held by us. To clarify: We cannot assist on requests relating to any platform or service other than Tencent Cloud Korea Services (including any data that is held by or regarding such other platforms or services). It is the Requesting Authority's responsibility to make the appropriate request(s) to such other platforms or services (and their operators) as necessary.

3. general principles of this policy

We apply this Policy in accordance with the following principles. Further details are set out in the remainder of this Policy.

3.1 **We act in accordance with Requests when legally required to do so.** The basis for the Requests that we comply with may be pursuant to specific laws and regulations. Such actions may include the removal or disabling of certain content.

3.2 **We do not retain all user information and content, and such information and content may be deleted, de-personalised and/or revised from time to time.** Our end users maintain the right to treat their information, and we will treat their information, in accordance with our Terms of Service and Privacy Policy. This means that we do not retain all such information, and they may from time to time be revised or deleted. Further information regarding our data handling practice is set out in [Terms of Service](#) and [Privacy Policy](#).

3.3 **We may depart from this Policy from time to time for various reasons,** including for instance, due to applicable laws and regulations or pursuant to professional advice we have received on the matter.

3.4 **We aim to be transparent with our users in the actions that we take.** Before and/or after we comply with a Request (depending on the Request and applicable laws and regulations), we reserve the right to notify (and in certain cases, obtain consent from) our users of the Request (including the actions being sought by the Request) unless we are explicitly requested by the Requesting Authority or prohibited from doing so by applicable laws and regulations and subject to Section 7. This is to ensure that our users have a right to respond to the Request. In addition, where the Request is in relation to actions that may affect other users, we may also notify other users of the relevant Request that we have complied with, subject to applicable laws and regulations.

3.5 **We do not automatically comply with all Requests.** We will always carefully review all Requests to ensure that we comply with all applicable laws and regulations in our response, while respecting our users' rights. That may include taking appropriate internal and third-party professional advice.

4. HOW WE APPLY THIS POLICY

We note the following in relation to how we apply this Policy:

(a) **In certain circumstances, we may not be able to remove information and/or content due to a conflict of legal requirements in different jurisdictions.** In those cases, we may treat such information and/or content

differently for different jurisdictions.

(b) We will carefully review all Requests to make sure they comply with the applicable laws and regulations. Where relevant or necessary, we may require appropriate legal and/or supporting documentation to be provided by the Requesting Authority before we comply with the Request.

(c) Nothing in this Policy waives or limits any of our rights under all applicable laws and regulations – we expressly reserve all such rights and may respond to any Requests at our sole discretion. We may, as appropriate, question any Requests – including requesting governmental/judicial review of, and third-party legal advice regarding, any Requests.

5. an overview of how we deal with requests

5.1 When we receive a Request, we will generally deal with such Request in accordance with the following (and always subject to applicable laws and regulations):

- (a) Review of the Request, to ensure that it meets all relevant legal and our requirements.

- (c) Responding to the Requesting Authority regarding the outcome of the Request.

6. WHAT KINDS OF REQUESTS DO WE RESPOND TO?

6.1 General requirements

To the extent permitted by applicable laws and regulations, all Requests must:

Note that we may not respond to any Requests that do not meet the above requirements.

6.2 Who can send Requests?

Please note that we may be unable to respond to any vague or incomplete Requests.

7. NOTIFICATION OF OUR USERS

Further to Section 3.4, we respect our users' rights and privacy. We may notify (and in certain cases, obtain consent from) the relevant user about any Requests prior to acting on them, unless we are explicitly requested by the Requesting Authority or prohibited from doing so under applicable laws or regulations, by the terms of any legal process (such as a confidentiality order), or where we reasonably believe that such actions may create imminent danger or risk for us or any third party. This notification may allow the end user to seek appropriate protective relief.

Requesting Authorities who believe that notification would jeopardize an ongoing legal investigation should obtain an appropriate court order or legal process that specifically prohibits notification of our users or otherwise substantiate its Request on the basis of the applicable laws and regulations. It is the Requesting Authority's responsibility to Request and substantiate in conformance with by applicable laws and regulations that we do not notify a user of the Request.

If we are required or choose to legally provide a Requesting Authority with our users' data, to the extent such data contains personal information, in compliance with applicable laws and regulations, we will request the Requesting Authority to limit the purpose and method of use and other necessary matters, or to prepare necessary safeguards to ensure the safety of the personal information. If your Request is in relation to an ongoing or prior violation of our Terms of Service and Privacy Policy, we will take action to prevent further abuse, including actions that may notify the user that we are aware of their misconduct, all subject to and in conformance with by applicable laws and regulations. If you believe in good faith that such actions will jeopardize an ongoing investigation, it is your responsibility to request that we defer such action, whenever possible pursuant to applicable laws and regulations including providing to us the appropriate court order or legal process prohibiting such notification.

We reserve the right to challenge any non-disclosure requests or orders, pursuant to applicable laws and regulations.

A Requesting Authority that believes that notification would jeopardize a law enforcement investigation should obtain an appropriate legal process that specifically prohibits member notification. It is the Requesting Authority's responsibility to request that we do not notify a user of your Request because it would jeopardize a law enforcement investigation, including but not limited to providing the appropriate court order or legal process prohibiting such notification. We will carefully consider your Request and our compliance with the same will be subject to applicable laws or regulations. All our rights in this regard are expressly reserved. Through an MLAT or other request, a foreign government can request the Singapore government for assistance in procuring evidence from Aceville Pte Ltd. If the Singapore government approves the MLAT or other request from the foreign government, and such documentation of approval is provided to us, we will give our best endeavors to render our support in accordance with applicable laws and regulations.

(b) in any manner and by any law enforcement authority or other governmental authority other than pursuant to paragraph (a), we will treat such request in accordance with this Governmental Request Policy ("**Policy**") (all such request under this paragraph (b) being a "**Request**").

Requests that fall under paragraph (b) include but are not limited to:

(a) take down requests;

(c) general information requests; and

This Policy applies to Requesting Authorities (as defined above) making a Request. If you do not observe the requirements of this Policy in making your Request, we may not be able to comply with or respond to your Request.

1.2 The Tencent Cloud Group complies with the laws and regulations pertaining to the individual entities that control our data and we provide details and/or take steps as legally required in relation to Requests.

1.3 We may amend this Policy at any time without notice. We encourage you to check back regularly on this page for updates. This Policy is applicable to requests from Requesting Authorities only. Nothing in this Policy shall be used to create any legal obligations or any enforceable rights against the Tencent Cloud Group or any other member of the Tencent group.

1.4 In this Government Request Policy ("**Policy**"):

(a) "**we**", "**us**", "**our**" or "**Tencent Cloud Group**" means Aceville Pte Ltd and its affiliates that operate cloud services outside of the People's Republic of China, South Korea, North America, the European Economic Area (EEA), the United Kingdom and Switzerland (for which we have separate Governmental Request Policies);

(c) **“Request”** means any request pursuant to Section 1.1(b) that this Policy applies to; and

(d) **“Requesting Authority”** or **“you”** means the law enforcement authority or other governmental authority making the relevant Request.

2. our relationship with other third parties

2.1 From time to time, we receive requests for disclosure of data which do not belong to and/or are not held by us. To clarify: We cannot assist on requests relating to any platform or service other than Tencent Cloud International Services (including any data that is held by or regarding such other platforms or services). It is the Requesting Authority's responsibility to make the appropriate request(s) to such other platforms or services (and their operators) as necessary.

3. general principles of this policy

We apply this Policy in accordance with the following principles. Further details are set out in the remainder of this Policy.

3.1 **We act in accordance with Requests when legally required to do so.** The basis for the Requests that we comply with may be pursuant to specific laws and regulations. Such actions may include the removal or disabling of certain content in one or more jurisdictions.

3.2 **We do not retain all user information and content, and such information and content may be deleted, de-personalised and/or revised from time to time.** Our end users maintain the right to treat their information, and we will treat their information, in accordance with our Terms of Service and Privacy Policy. This means that we do not retain all such information, and they may from time to time be revised or deleted. Further information regarding our data handling practice is set out in [Terms of Service](#) and [Privacy Policy](#).

3.3 **We aim to apply this Policy consistently and fairly across all jurisdictions where we operate Tencent Cloud International Services, and in accordance with all applicable laws and regulations and our interpretation of potential differences between jurisdictions.** Tencent Cloud International Services are available outside of the People's Republic of China, South Korea, North America, the EEA, the United Kingdom and Switzerland, and to that end we aim to apply all of our terms (including this Policy) fairly and consistently across those jurisdictions.

3.4 **Further to Section 3.3, we may depart from this Policy from time to time for various reasons,** including for instance, due to applicable laws and regulations or pursuant to professional advice we have received on the matter.

3.5 **We aim to be transparent with our users in the actions that we take.** Before and/or after we comply with a Request (depending on the Request and applicable laws and regulations), we reserve the right to notify our users of the Request (including the actions being sought by the Request) unless we are explicitly requested by the Requesting Authority or prohibited from doing so by applicable laws and regulations and subject to Section 7. This is to ensure that our users have a right to respond to the Request. In addition, where the Request is in relation to actions that may

affect other users, we may also notify other users of the relevant Request that we have complied with, subject to applicable laws and regulations.

3.6 We do not automatically comply with all Requests. (b) **We will carefully review all Requests to make sure they comply with the applicable laws and regulations.** Where relevant or necessary, we may require appropriate legal and/or supporting documentation to be provided by the Requesting Authority before we comply with the Request.

(c) **Nothing in this Policy waives or limits any of our rights under all applicable laws and regulations – we expressly reserve all such rights and may respond to any Requests at our sole discretion.** We may, as appropriate, question any Requests – including requesting governmental/judicial review of, and third-party legal advice regarding, any Requests.

We may notify the relevant user about any Requests prior to acting on them, unless we are explicitly requested by the Requesting Authority or prohibited from doing so under applicable laws or regulations, by the terms of any legal process (such as a confidentiality order), or where we reasonably believe that such actions may create imminent danger or risk for us or any third party. This notification may allow the end user to seek appropriate protective relief.

Requesting Authorities who believe that notification would jeopardize an ongoing legal investigation should obtain an appropriate court order or legal process that specifically prohibits notification of our users or otherwise substantiate its Request on the basis of the applicable laws and regulations. It is the Requesting Authority's responsibility to Request and substantiate in conformance with by applicable laws and regulations that we do not notify a user of the Request.
