Check Item Overview

Last updated : 2024-08-01 14:42:54

This document lists the check items for database migration, sync, and subscription tasks. If an error is reported for a check item, fix it as instructed in the corresponding document.

Partial checks can be skipped, blocked after verification failure, and require rechecking to continue the task.

Failed: It indicates that a check item fails and the task is blocked. You need to fix the problem and run the verification task again.

Alarm: It indicates that a check item doesn't completely meet the requirements, and the task can be continued, but the business will be affected. You need to assess whether to ignore the alarm or fix the problem and continue the task based on the alarm message.
