# Release Notes

Last updated : 2022-06-20 15:18:55

## March 2022

Update	Description	Release Date	Remarks
Released the "GAAP shared acceleration" feature	TCP/UDP monitoring and transmission acceleration are provided based on high-speed lines over the public network (only supported for Tencent Cloud users in the Chinese mainland).	March 2022	To use this feature, please submit a ticket.

## February 2022

Update	Description	Release Date	Remarks
SNI configuration for origin-pull	SNI is sent to the origin server before an SSL connection is established, so that the origin server can return the correct certificate.	February 2022	This feature is supported by default.
Origin domain	In HTTP/HTTPS listeners, the origin domain field of the origin-pull request can be modified.	February 2022	This feature is supported by default.

## January 2022

Update	Description	Release Date	Remarks
HTTP3	The HTTP3 feature can be enabled according to actual business needs. When it is enabled, acceleration connections will support HTTP3 (QUIC) transfer.	January 2022	This feature is supported by default.

## December 2021

Update	Description	Release Date	Remarks
Multiple domain names for the default entry of the unified domain name	The default entry of the unified domain name supports configuring multiple domain names, separated by semicolons.	December 2021	This feature is supported by default.
Domain name dimension for statistics	Statistics support the domain name dimension listened on by HTTP/HTTPS. Data types include request volume and status code.	December 2021	To use this feature, please submit a ticket.
CUCC cross-border leased line	If your business involves the Chinese mainland, use CUCC cross-MLC-border connections (currently only supported between Chinese mainland and Hong Kong (China)).	December 2021	This feature is supported by default.

## November 2021

Update	Description	Release Date	Remarks
Notification of primary/secondary origin server switch	When a primary/secondary origin server switch is triggered, notifications will be sent through Message Center and email.	November 2021	To use this feature, please submit a ticket.
Non-BGP statistics optimization	Statistics can be displayed for each ISP or all ISPs. Monitoring alarm policy supports alarms for non-BGP connection IPs.	November 2021	To use this feature, please submit a ticket.

## October 2021

Update	Description	Release Date	Remarks
IPV6 protocol	An IPV6 address can be used as origin server. Unified domain names can be resolved to IPv6 addresses.	October 2021	To use this feature, please submit a ticket.
Layer-7 listener	The domain name bound to the layer-7 listener is allowed to be modified and inconsistent with the origin server domain name.	October 2021	This feature is supported by default.

Update	Description	Release Date	Remarks
Connection status	Connections can be filtered by status in the console.	October 2021	This feature is supported by default.
Non-BGP acceleration solution	Over 10 non-BGP acceleration nodes for the Chinese mainland are available for connection, helping reduce costs.	October 2021	To use this feature, please submit a ticket.
Server certificate	Automatically verifying whether the server certificate changed for a layer-7 listener matches the domain name is allowed.	October 2021	This feature is supported by default.

## September 2021

Update	Description	Release Date	Remarks
Dedicated BGP solution supported in Hong Kong (China)	Dedicated bandwidth for a T1 line between the Chinese mainland and Hong Kong (China) is supported.	September 2021	To use this feature, please submit a ticket.
Linux TOA update	CentOS 8.2 and Ubuntu Server 20.04 are now supported.	September 2021	<a href="#">TOA Module Loading Method</a>

## August 2021

Update	Description	Release Date	Remarks
Statistics optimization	Statistics can be retained for 6 months and exported from the console.	August 2021	This feature is supported by default.
Certificate expiration alarm	An expiration reminder will be sent by WeChat, Message Center, email and SMS 30 days, 7 days, 3 days, and 1 day before a certificate expires.	August 2021	This feature is supported by default.

---

Update	Description	Release Date	Remarks
Silver acceleration connection	Cost-effective Silver acceleration connection is provided and supports monthly settlement.	August 2021	To use this feature, please submit a ticket.
